QUESTION 1

Which of the following supports the largest number of Cascade analytics?

- A. Express
- B. Standard Profiler
- C. Enterprise Profiler
- D. B and C
- E. A, B, and C

Correct Answer: C

QUESTION 2

In the Cascade Profiler GUI, where can you map a name to the combination of IP Address and TCP Port Number?

- A. Definitions->Host Groups
- B. Definitions->Applications
- C. Definitions->Port Groups
- D. Definitions->Port Names
- E. Integration->Switch Port Discovery

Correct Answer: B

QUESTION 3

Protocols that are typically monitored in TCP/IP networks by visibility tools include (Select 3):

- A. SAN HBA Protocol
- B. TCP Protocols such as HTTP and HTTPS
- C. UDP Protocols such as SMTP and Video streaming
- D. IPv4 Protocols including TCP, UDP, and ICMP
- E. IPv4 Protocols such as x.25, TTY and TTL

Correct Answer: BCD

QUESTION 4

What is the maximum number of flows a Profiler Express is licensed to process?

- A. 25,000 flows per minute
- B. 50,000 flows per minute
- C. 75,000 flows per minute
- D. 100,000 flows per minute

Correct Answer: C

QUESTION 5

What is one of the benefits Cascade provides compared to other vendors that have both flow and probe technology?

- A. Cascade will de-duplicate/Coalesce data from all sources, both flow and sensor data. Other vendors have you look at each source's data separately
- B. Cascade Profiler will provide nanosecond granularity from flow data to detect micro-bursts.
- C. Cascade can also accept SNMP traps from other devices.
- D. Cascade integrates with sflow but not NetFlow.

Correct Answer: A

QUESTION 6

Two popular data center projects that network visibility tools can assist with include:

- A. Virtualization and Data Center Mobility
- B. Rationalization and Irrationalization
- C. Virtualization and Data Center Consolidation
- D. Remote Site monitoring and Packet Exportation
- E. Data Import and Data Export

Correct Answer: C

QUESTION 7

Which of the reports for monitoring Services include an Event List including Event IDs of the underlying alerts that were triggered from policy violations?

- A. Overall Service Performance Report
- B. Service Performance Report
- C. Service Incident Report
- D. All three of the reports above include an Event List
- E. None of the three reports above include an Event List. Only an Event report will generate Event Lists

Correct Answer: C

QUESTION 8

The exhibit includes a portion of the Cascade Pilot interface and shows:

- A. Two trace clips, the first has two views applied, the second has one view applied.
- B. Two capture job traces, the first has two trace clips associated with it, the second has one trace clip associated with it.
- C. Two Cascade Shark appliances, the first has two capture jobs, the second has one capture job.
- D. Two packet capture (pcap) files, the first has two trace clips associated with it, the second has one trace clip associated with it.

Correct Answer: B

QUESTION 9

In the Cascade Profiler GUI, which Email Formats are supported for Notifications? (Select 2)

- A. Syslog
- B. SNMP
- C. HTML

D. Facebook

E. PDF

Correct Answer: CE

QUESTION 10

Once the Cascade Shark appliance has an initial configuration with an IP Address set to 10.1.1.1 you can connect to it from a web browser using the URL:

A. <http://10.1.1.1>

B. <https://10.1.1.1>

C. <https://10.1.1.1:443>

D. <https://10.1.1.1:8080>

E. <http://10.1.1.1:8080>

Correct Answer: D

QUESTION 11

Where are Application Names used within the Cascade Profiler GUI?

A. On Dashboards

B. In Reports

C. In User Defined Policies

D. In Application Performance Policies E. All of the above

Correct Answer: E

QUESTION 12

Cascade Profiler encrypts data at rest with.

A. the same encryption strength and protocol selected for sending data from Gateways and Sensors to Profiler.

B. always 256bit AES, except for international customers who are not eligible for encryption.

C. Cascade does not encrypt data while at rest.

D. Configurable under Definitions ? Encryption.

Correct Answer: C

QUESTION 13

When specifying the time-frame of a traffic report in Cascade Profiler, what happens when one selects a data resolution of automatic?

- A. The Cascade Profiler determines the appropriate resolution to use, based on the time-frame selected.
- B. The report runs from 1 minute flows if a flow list is selected from the report format options.
- C. The resulting report indicates the data resolution the report was generated from.
- D. The resulting report runs against Profiler periods instead of flow logs.
- E. All of the above.
- F. A, B, C only.

Correct Answer: F

QUESTION 14

In the Cascade Profiler GUI, what format can be used for a Dashboard Content Block?

- A. They are based upon the 6-bit Differentiated Services Code Point (DSCP).
- B. They are based upon Host Group definitions, defined within the Cascade GUI.
- C. They are based upon Application definitions, defined within the Cascade GUI.
- D. They are based upon Port definitions, defined within the Cascade GUI.

Correct Answer: A

QUESTION 15

A trace clip is used within Cascade Pilot for:

- A. Indexing a packet capture (pcap) file
- B. Applying live views to interfaces
- C. Creating a watch on a live interface
- D. Exporting a packet capture (pcap) file to Wireshark
- E. Analyzing a specific time interval within a job trace

Correct Answer: E
