- A. 6.5, 7.0, or 7.1
- B. 7.5 only
- C. 7.1 or 7.5 only
- D. 7.0, 7.1, or 7.5

Correct Answer: B

---

## QUESTION 10

A Symantec NetBackup 7.5 administrator needs to prevent all client systems from performing user-directed restore operations, while maintaining the client administrator's ability to view the contents of backup images. How should the administrator proceed?

- A. add DISALLOW\_CLIENT\_RESTORE to the Symantec NetBackup configuration settings on the client systems
- B. select the Allow browse only parameter for the clients included in the Client Attributes of the master server Host Properties
- C. select the Allow client browse parameter in the Host Properties of the client system
- D. deselect the Allow client restore parameter in the Host Properties of the master server system

Correct Answer: D

---

## QUESTION 11

A UNIX client host contains the mount points listed below. / /home /opt /tmp /usr /var The policy is configured for Allow Multiple Datastreams. The Backup Selections are listed below. /[A-M]\* /[N-U]\* How many mount points will be backed up?

- A. none
- B. four
- C. five
- D. six

Correct Answer: A

---

## QUESTION 12

If all the backup images on a FULL tape are expired using the Catalog tool in the Administration Console, when will the tape become AVAILABLE?

- A. immediately
- B. when the next image cleanup job runs
- C. at midnight when Symantec NetBackup does housekeeping
- D. when the status is manually changed to AVAILABLE

Correct Answer: C

---

**QUESTION 13**

A site needs to perform file system backups of Solaris, Red Hat, Windows 2003, and Windows 2008 clients. Backups are initiated by the Symantec NetBackup 7.5 scheduler and the backup of specific files are also initiated by the administrators of the client hosts. Both full and differential backups must be performed. What is the minimum number of policies and schedules that must be configured?

- A. 2 policies with 3 schedules in each policy
- B. 2 policies with 4 schedules in each policy
- C. 4 policies with 2 schedules in each policy
- D. 4 policies with 3 schedules in each policy

Correct Answer: A

---

**QUESTION 14**

An organization is installing a Symantec NetBackup 7.5 master server and the license key is unavailable during the installation process. What will be the result of the installation?

- A. All features will be enabled for a 30-day evaluation period.
- B. Only core functionality will be enabled.
- C. Installation of the master server will fail.
- D. Symantec NetBackup services will fail to start on the master server until a license key is installed.

Correct Answer: C

---

**QUESTION 15**

A backup administrator needs to perform file system restore operations for two important client systems, client1 and client2. Dedicated resources are available for restore jobs but only one restore job may run at a time. When submitted, the restore jobs will be queued until a restore job that is already running is completed. The restore job for client1 must be performed first and the restore job for client2 must run before any other restore jobs that may be added to the job queue. In the Backup, Archive, and Restore (BAR) GUI, which job priority values would allow for the client1 restore to run first, followed by the client2 restore, and finally any other restore jobs that may be submitted?

- A. client1: 84000; client2: 85000
- B. client1: 85000; client2: 84000
- C. client1: 91000; client2: 92000
- D. client1: 92000; client2: 91000

Correct Answer: D
