- 800,000+ Satisfied Customers

#### **QUESTION 1**

Refer to the exhibit.

굣	Go into effect at:	4/21/2015 ÷ 3:12:52 PM ÷
Г	Backup Network Drives	
Г	Cross mount points	
V	Compression	
V	Encryption	
Co	flect disaster recovery information f	for:
	☐ Bare Metal Restore	
Г	Collect true image restore informa	tion
	with move detection	
Г	Allow multiple data streams	
Г	Disable client-side deduplication	
Г	Enable granular recovery	
Г	Use Accelerator	
Ke	yword phrase:	
Г	Enable indexing for search (Must also be enabled for the sch	and the second efficients

What is the outcome of the policy shown in the exhibit?

- A. The client encrypts then compresses the data before sending it to the Media Server.
- B. The client compresses and the Media Server encrypts the data before sending it to the tape drive.
- C. The client compresses then encrypts the data before sending it to the Media Server.
- D. The client sends the data to the Media Server, which compresses and then encrypts the data.

Correct Answer: C

#### **QUESTION 2**

Which volume pool must be manually created in NetBackup?

- A. NetBackup
- B. DataStore
- C. Scratch
- D. CatalogBackup

# Leads4Pass

2024 Latest leads4pass 250-272 PDF and VCE dumps Download

Correct Answer: C

#### **QUESTION 3**

Which option is available with a Trusted Master Server?

- A. Backup of other Master Server domains
- B. Duplications
- C. Automatic Image Replication
- D. Catalog backups

Correct Answer: C

#### **QUESTION 4**

What should an administrator do to enable backups to span multiple BasicDisk storage units?

- A. configure a storage unit group and add BasicDisk storage units from multiple Media Servers
- B. configure a storage unit group that consists only of disk storage units defined on a single Media Server
- C. confirm that a load balancing storage unit is selected at the group level
- D. select Storage Units > Storage Unit > Allow backup to span disks

Correct Answer: B

#### **QUESTION 5**

A NetBackup Master Server has commenced writing four long-running duplication jobs on an

AdvancedDisk disk pool. The value of Maximum concurrent jobs for the storage unit and Limit I/O streams

for the disk pool are both set to 4.

There are 35 jobs queued on the Master Server that require this disk pool:

5 replication jobs with priority 9999 10 backup jobs with priority 999 20 duplication jobs with priority 99 Two restore jobs that require this disk pool are then submitted with default priority. Which job type goes active next?

- A. Backup
- B. Duplication
- C. Replication
- D. Restore

https://www.leads4pass.com/250-272.html 2024 Latest leads4pass 250-272 PDF and VCE dumps Download

Correct Answer: D

### **QUESTION 6**

An administrator wants clients in a remote office to perform client-side deduplication instead of Media Server deduplication.

Where should the administrator set the parameter in the Host Properties to ensure client-side deduplication is performed?

- A. Master Server > Client Attributes > client\_hostname > General > Always use client-side deduplication
- B. Clients > General > Always use client-side deduplication
- C. Master Server > Client Attributes > General > Always use client-side deduplication
- D. Clients > Deduplication > Always use client-side deduplication

Correct Answer: A

#### **QUESTION 7**

An administrator wants to specify which networks or interfaces to use for outgoing NetBackup traffic from a selected host.

Which option under Master Server Host Properties should the administrator use to configure this?

- A. Preferred Network
- B. Port Ranges
- C. Network Settings
- D. Bandwidth

Correct Answer: D

### **QUESTION 8**

What is required to implement Auto Image Replication?

- A. BasicDisk or AdvancedDisk storage units and at least one Master Server
- B. OST-compliant appliances or MSDP and at least one Master Server
- C. OST-compliant appliances or MSDP and at least two Master Servers
- D. BasicDisk or AdvancedDisk storage units and at least two Master Servers

clients listed in the Clients list Allow multiple data streams is selected Limit Jobs per policy is set to 4 How many jobs go Active when the job is started, excluding parent jobs?  A. 3  B. 4  C. 12  D. 15	QUESTION 11
B. 4 C. 12 D. 15	clients listed in the Clients list Allow multiple data streams is selected Limit Jobs per policy is set to 4 How many jobs go
C. 12 D. 15	A. 3
D. 15	B. 4
	C. 12
Correct Answer: B	D. 15
	Correct Answer: B

## **QUESTION 12**

# **Leads4Pass**

#### https://www.leads4pass.com/250-272.html

2024 Latest leads4pass 250-272 PDF and VCE dumps Download

An administrator of a multi-site, multi-domain NetBackup environment wants to be able to provide redundancy for backups as well as protecting the NetBackup image database. All backups must have on-site and off-site disk copies as well as off-site tape copies and must be restorable at all times, even if a single NetBackup server/storage failure occurs. Which NetBackup feature should the administrator use to implement the functionality?

- A. Replication Director
- B. Automated Image Replication
- C. Storage Lifecycle Policies
- D. Vault

Correct Answer: B

#### **QUESTION 13**

The administrator of a large bank needs to preserve financial information for an extended period of time. The bank\\'s NetBackup 7.6.1 catalog is now over 800GB in size, causing the catalog backups to contend for resources with production system backups. How can the administrator shorten the time needed to back up the catalog?

- A. use the NetBackup 7.6.1 Agent for Symantec Enterprise Vault to perform an online archive of the catalog
- B. create a catalog archive policy and execute it from the command line using the bpcatarc command
- C. use the NetBackup 7.6.1 client-side deduplication feature to shorten the time it takes to perform a catalog backup
- D. back up the catalog by scheduling an online Sybase database backup policy to allow the backup to run without contending for resources

Correct Answer: B

#### **QUESTION 14**

Which command should an administrator use to determine which storage lifecycle policy\\'s image copies are incomplete?

- A. nbstl
- B. nbreplicate
- C. bpimage
- D. nbstlutil

Correct Answer: C

#### **QUESTION 15**

A file system on a server is corrupt and a restore is required. The system is being backed up using True Image Restore with move detection enabled.

https://www.leads4pass.com/250-272.html 2024 Latest leads4pass 250-272 PDF and VCE dumps Download

The most recent backups of this file system are displayed below.
-Monday: A full backup
-Tuesday: A differential incremental backup
-Wednesday: A cumulative incremental backup
-
Thursday: A differential incremental backup
What is the minimum number of backup images that will be used to fully restore the server?
A.
one
B.
two
C.
three
D.
four
Correct Answer: C
