QUESTION 1

Which Symantec NetBackup 7.5 option provides integrated, end-to-end protection of NAS storage devices using snapshots?

- A. Symantec NetBackup Accelerator
- B. Symantec NetBackup Replication Director
- C. Symantec NetBackup Shared Storage Option
- D. Symantec NetBackup Snapshot Manager

Correct Answer: B

QUESTION 2

For most organizations, the password for the database accounts is changed on a regular basis.

Which action is recommended for the account that is used by Symantec Control Compliance Suite 9.0 (CCS 9.0)?

- A. Require that the CCS 9.0 have a password exception
- B. Coordinate the password change to ensure database connectivity
- C. Require that the CCS 9.0 administrator also have database administrator rights
- D. Create a job that refreshes the settings information automatically

Correct Answer: B

QUESTION 3

The master server catalog is being recovered to a new server. The administrator receives the message displayed below.

Please insert the following media and run the volume configuration wizard or the vmupdate command to update the NetBackup database.

Host - train1 MediaID - GBP847 Barcode - GBP847S1

In the Administration Console, barcode GBP847S1 is associated with media ID P847S1.

How should the administrator proceed?

- A. use bplabel to change the media ID, then re-inventory the library and perform recovery
- B. find the tape labeled P847S1, insert it into the robot, and then perform recovery
- C. delete the tape and set the media ID generation rule accordingly, then re-inventory the library and run recovery

D. delete the tape and set the barcode rule accordingly, then re-inventory the library and run recovery

Correct Answer: C

QUESTION 4

Which setting would restrict deduplication backups within Symantec NetBackup 7.5?

- A. Media multiplexing
- B. Maximum concurrent jobs
- C. Maximum fragment size
- D. Job priority

Correct Answer: B

QUESTION 5

How can agentless asset data collection speed be improved on a large network?

- A. install the console on a faster machine
- B. tune the SQL database for performance
- C. set up multiple information server deployments on the network
- D. install RMS and Symantec Control Compliance Suite 9.0 on the same box

Correct Answer: C

QUESTION 6

An administrator is using storage lifecycle policies to create multiple backup copies.

What is the result if one of the copies fails?

- A. the copy fails and the cascaded jobs continue
- B. the copy retries once and then fails
- C. all copies fail
- D. the copy will retry

Correct Answer: D

QUESTION 7

A Symantec NetBackup administrator has three media servers (named prod-media, dev-media, and test-media) that are available for client backups. The administrator would like the jobs to run to the prod-media server first, unless it is down only.

How should the administrator configure the storage?

- A. Configure three storage units and then select any available in the policy
- B. Configure a storage unit group and set the storage unit selection to prioritized
- C. Configure a storage lifecycle policy and set the selection to first available
- D. Configure the storage unit group and set the storage unit selection to failover

Correct Answer: D

QUESTION 8

Which three bv-Control for Windows services may be checked when troubleshooting agentless data collection? (Select three.)

- A. bvProcessManager
- B. Data Processing Service
- C. Directory Support Service
- D. BindView Query Engine
- E. Enterprise Configuration Service

Correct Answer: ADE

QUESTION 9

An administrator is unable to back up all client data within a given backup window. The current configuration is displayed below.

One Master/Media server 4x 1GB network connection

4GB Fibre Channel HBA to tape

Library with 4 LTO3 tape drives (max 4 drives)

150 clients with 100 MB network connections.

How should the administrator improve performance and decrease backup elapsed time?

- A. Enable multiplexing in the policy schedules
- B. Replace LTO3 drives with LTO5 drives
- C. Replace the network switch with a 10GB switch

D. Enable client side compression

Correct Answer: A

QUESTION 10

A Symantec NetBackup 7.5 master server has a Microsoft Windows policy that protects over 500 servers using the directive ALL_LOCAL_DRIVES. The backup window for this policy is between 3:00 PM and 5:00 PM and is unshared with any other policy. When the backup window for this policy is open, the overall performance of the disk storage unit gets degraded.

Which setting should the administrator modify to reduce the number of concurrent streams writing to the disk storage unit to 10 during the backup window?

- A. Disable multiplexing on the policy schedules
- B. Set the "Maximum backup copies" host property to 10
- C. Enable multiplexing for the storage unit and set the value to 10
- D. Enable the "Limit Jobs per policy" attribute

Correct Answer: D

QUESTION 11

Which command is used to configure tape drives and robotic devices in Symantec NetBackup 7.5?

- A. tpautoconfig
- B. tpconfig
- C. tapeconfig
- D. tldconfig

Correct Answer: D

QUESTION 12

Which two operations are valid first steps in a storage lifecycle policy in Symantec NetBackup 7.5? (Select two.)

- A. backup
- B. backup from snapshot
- C. duplication
- D. replication
- E. import

Correct Answer: AE

QUESTION 13

An administrator needs to tune how frequently storage lifecycle policies are processed.

Which setting should an administrator modify?

- A. DUPLICATION_SESSION_INTERVAL_MINUTES
- B. MAX_MINUTES_TIL_DUPLICATION_JOB
- C. DUPLICATION_SESSION_INTERVAL_SECONDS
- D. MAX_SECONDS_TIL_DUPLICATION_JOB

Correct Answer: A

QUESTION 14

A user receives this error message in the Symantec event log:

An error occurred while attempting to run a scheduled job; Reason for failure: Password doesn't exist for username.

The Symantec Control Compliance Suite 9.0 is configured to store the user credentials for job runs.

Where must the user supply the correct credentials?

- A. Home > User Preferences
- B. Monitor > Jobs
- C. Settings > General
- D. Settings > Secure Configuration

Correct Answer: A

QUESTION 15

An administrator needs to protect multiple clients that contain multiple data volumes to removable media.

Which policy setting in Symantec NetBackup 7.5 will perform the backup the fastest?

- A. Accelerator
- B. Multiplexing
- C. Disable client deduplication
- D. Enable client compression

Correct Answer: B
