- A. Data Collection job
- B. Asset Import job
- C. Evaluation job
- D. Evidence Collection job
- E. Reporting job

Correct Answer: AB

QUESTION 5

Which two benefits does the Policy Module provide? (Select two.)

- A. determines coverage gaps for multiple, overlapped regulatory, industry-specific, or best practices frameworks
- B. lowers the cost of policy creation and maintenance and measures policy knowledge and retention
- C. defines, reviews, and disseminates written policies to end users as mapped to specific measurable controls
- D. integrates the policy compliance process with existing asset management systems
- E. identifies problems within policies or internal controls and prevents policy compliance failure or data breach

Correct Answer: AC

QUESTION 6

The administrator of a large bank needs to preserve financial information for an extended period of time. The bank's Symantec NetBackup 7.5 catalog is now over 800 GB in size, causing the catalog backups to contend for resources with production system backups.

How can the administrator shorten the time needed to back up the Symantec NetBackup catalog?

- A. use the Symantec NetBackup 7.5 Agent for Symantec Enterprise Vault to perform an online archive of the Symantec NetBackup Catalog
- B. create a catalog archive policy and execute it from the command line using the catarc command
- C. use the Symantec NetBackup 7.5 client-side deduplication feature to shorten the time it takes to perform a Symantec NetBackup Catalog Backup
- D. back up the Symantec NetBackup catalog by scheduling an online Sybase database backup policy to allow the Catalog Backup to run without contending for resources with the production system backups

Correct Answer: B

QUESTION 7

Who is responsible for approving who has access to which data in an organization?

- A. the business data owner
- B. the owner of the business
- C. the chief security officer
- D. the information technology officer

Correct Answer: A

QUESTION 8

Where should the Symantec NetBackup administrator look in the Symantec NetBackup Administration Console to determine whether an AdvancedDisk Storage server is already configured?

- A. Media and Device Management > Devices > Storage Servers
- B. Media and Device Management > Hosts > Storage Servers
- C. Media and Device Management > Credentials > Storage Servers
- D. Media and Device Management > Device Monitor > Storage Servers

Correct Answer: C

QUESTION 9

An administrator configures STU-A with the "On Demand Only" option. When will backups write to this storage unit?

- A. when the Any Available storage unit is selected in the policy
- B. when all other storage units are unavailable
- C. when the policy specifies STU-A as an attribute
- D. when the storage unit specified in the policy is full or unavailable

Correct Answer: B

QUESTION 10

What happens when an administrator cancels a child job created by a storage lifecycle policy?

- A. All child jobs are cancelled, but the parent job continues to run.
- B. Only the single child job is cancelled.
- C. All child jobs and the parent job are cancelled.

D. All child jobs continue to run.

Correct Answer: C
