- A. Explicit proxy
- B. In every connection type
- C. Inline
- D. Transparent

Correct Answer: A

QUESTION 6

Which is the default TCP port for HTTP?

- A. 20
- B. 80
- C. 443
- D. 43

Correct Answer: C

Reference: https://support.symantec.com/en_US/article.TECH242551.html

QUESTION 7

How does the Management Console perform commands on the ProxySG?

- A. None of these answers
- B. By using proprietary APIs to perform function calls on the ProxySG
- C. By using Content Policy Language to control the ProxySG

D. By generating the appropriate CLI commands and executing them

Correct Answer: D

QUESTION 8

On the ProxySG, can more than one authentication realm be active at any given time?

- A. No
- B. Yes
- C. Only in explicit mode
- D. Only in transparent mode

Correct Answer: B

QUESTION 9

Why is authentication using Basic credentials typically used over HTTPS?

- A. Username and password are base-64 encoded
- B. No session identifier is required
- C. No cookies are required
- D. No other credentials are compatible with HTTPS

Correct Answer: A

QUESTION 10

Which one of these statements best describes how policy checkpoints evaluate the installed policy on a ProxySG?

- A. The Server In checkpoint decides which rules will be evaluated by the other checkpoints
- B. The Client In checkpoint decides which rules will be evaluated by the other checkpoints
- C. At each checkpoint, a decision is made whether to allow or deny the transaction
- D. Relevant rules are evaluated at each checkpoint based on the information about the transaction that is available at that point

Correct Answer: C

QUESTION 11

If you lose the password to the setup console, which of these methods can be used to regain access to the setup console? (Choose three.)

- A. Open a serial connection, and use the CLI command `restore-defaults factory-defaults`
