QUESTION 1

Which steps will produce the data required to create an application-specific matching rule?

- A. Use class criteria track to enable tracking on a specific class and then use class criteria recent to see a list of recent values for the class
- B. Use class criteria attributes to see attributes for a specific class and then use class criteria recent to see a list of recent values for the class
- C. Use class criteria trade to enable tracking on a specific class and to see a list of recent values for the class
- D. Use class criteria attributes to see attributes for a specific class and then use class criteria track to track the recent values for the class

Correct Answer: D

QUESTION 2

Which method does PacketShaper use to create child classes for Oracle databases?

- A. Individually for each published application
- B. Individually by encoding name
- C. Once, for all Oracle traffic running on the subnet
- D. Individually for each database that is discovered

Correct Answer: C

QUESTION 3

Which two (2) traffic types are ideal candidates for priority policies? (Select two)

- A. Telnet
- B. ICMP
- C. HTTP
- D. DNS
- E. FTP

Correct Answer: AB

QUESTION 4

After inserting a PacketShaper inline between a switch and a router, communications are slow. Which command, executed repeatedly, can help to determine if there are errors on the PacketShaper interfaces?

- A. link show
- B. net nic
- C. tap health
- D. traffic flow

Correct Answer: A

QUESTION 5

Refer to the exhibit.

The Global Intelligence Network Of WebPulse service classifies .1 website as "Entertainment; Mumor/tokes." The current configuration of PacketShaper has traffic discovery enabled within the Inbound/HTTP class and has the class tree shown as in the exhibit with WebPulse enabled.

What two (2) classes will the traffic flow into when the client makes a request to the website in question?

(Select two)

- A. Inbound/Local host
- B. inbound/Entertainment
- C. Inbound/HTTP/Default
- D. Inbound/HTTP/Entertainment
- E. Inbound/Humor_jotes

Correct Answer: AD

QUESTION 6

A university wants to provide each student a minimum of 30 Kbps and a maximum of 150 Kbps to be used in any way. Which control mechanism does Symantec recommend to ensure this capacity?

- A. Rate Policy
- B. Burstable Partition
- C. Dynamic Subpartition
- D. Fixed Partition

Correct Answer: B

QUESTION 7

When would Symantec recommend backing up measurement data, using the measurement engine?

- A. Prior to a software upgrade
- B. Before returning the appliance to the manufacturer
- C. When verifying that a transfer is complete
- D. After performing a restore of the data from backups

Correct Answer: D

Explanation: <https://originsymwisedownload.symantec.com/resources/webguides/packetguide/current/reference/cli/measurerestore.htm>

QUESTION 8

When would the traffic class Inbound/HTTP inherit its policy from another class?

- A. When Inbound/HTTP has an ignore policy applied
- B. When Inbound/HTTP has a rate policy applied
- C. When Inbound/HTTP has a priority policy applied
- D. When Inbound/HTTP does not have a policy applied

Correct Answer: D

QUESTION 9

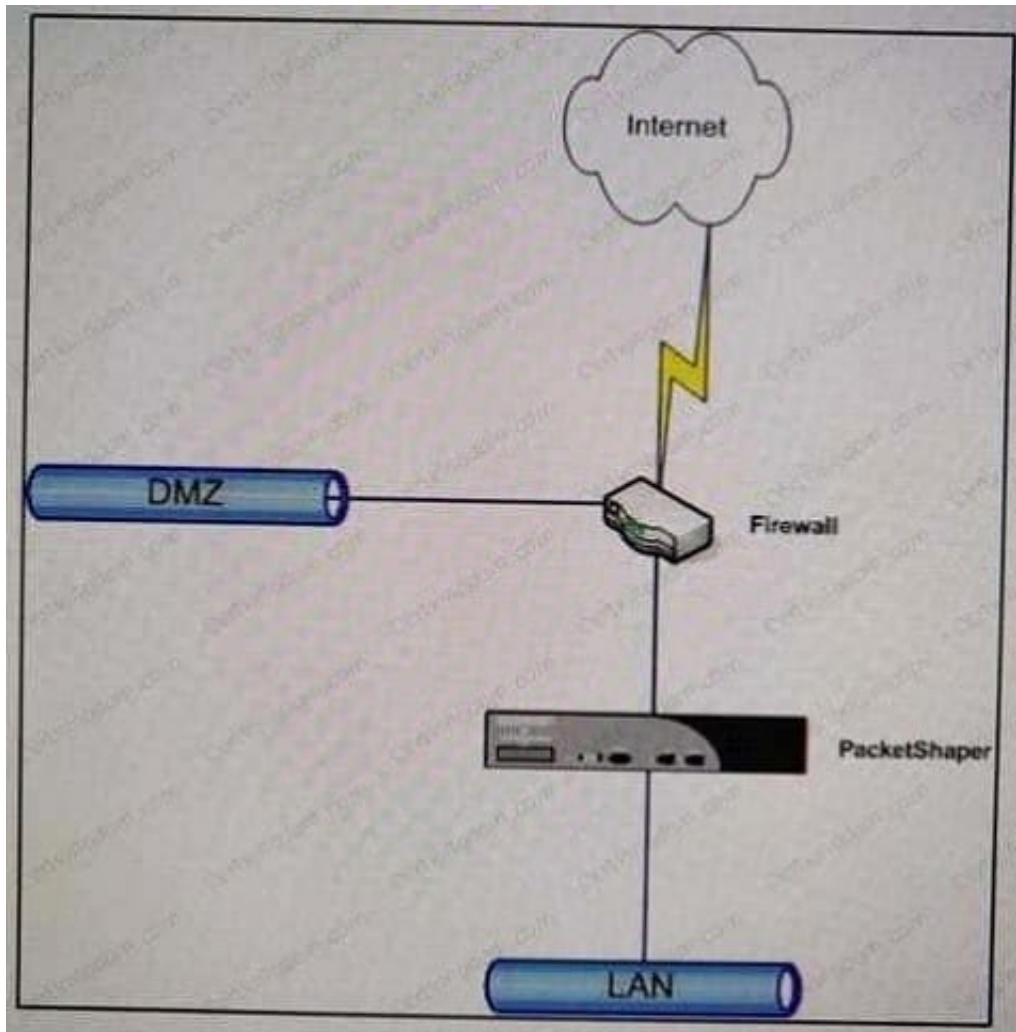

What are the two (2) main functions of the Symantec PacketShaper? (Select two)

- A. Control of network traffic
- B. Next generation firewall
- C. Network traffic visibility
- D. Increased bandwidth
- E. Secure transparent proxy

Correct Answer: AC

QUESTION 10

Refer to the exhibit.

Which task must the administrator perform to make sure that traffic between (he IAN and DMZ is treated as pass-through PacketShaper installed as shown?

- A. Create a class for LAN-to-DMZ traffic and apply a 100 MB partition to it. ...
- B. Create a class for IANto-OMZ traffic and apply a 100-MB rate policy to it.
- C. Create a class for IAN-tO-DMZ traffic and apply an ignore policy to it.
- D. Configure the PacketShaper to automatically identify Inside and Outside hosts, therefor* no special configuration is required.

Correct Answer: B

QUESTION 11

Which option best defines an "unreliable network" within PacketShaper?

- A. It has NO traffic trees defined in the PacketShaper

- B. Its latency is decreased, meaning that the frequency of time-outs and retransmissions spike
- C. It offers no guarantees that packets will NOT be delayed, damaged, or lost
- D. Its acknowledgments are in UDP, NOT TCP

Correct Answer: A

QUESTION 12

Which statement accurately describes the PacketShaper measurement engine?

- A. It collects histogram data that can be backed up to the PacketShaper
- B. Its data is stored in tab-delimited lists
- C. It collects histogram data that can be exported to a die
- D. It is a background process that collects traffic tree data

Correct Answer: C

QUESTION 13

Which CLI command will display the current rate and connection information about active hosts?

- A. hostdb hosts
- B. hostdb accounting
- C. hostdb info
- D. hostdb show

Correct Answer: B

QUESTION 14

Which PacketShaper report displays the percentage of bytes that are NOT retransmits?

- A. The TCP Health graph
- B. The Network Efficiency graph
- C. The Normalized Network Delay graph

D. The Top 10 Classes graph

Correct Answer: B

Explanation: <https://originsymwisedownload.symantec.com/resources/webguides/packetguide/11.10/Content/PDFs/AdaptiveResponse.pdf>

QUESTION 15

What is the purpose of a "Traffic Class"?

- A. It enforces the policy by normalizing all traffic
- B. It applies source routing features for load balancing
- C. It identifies the traffic type, which allows a policy to be applied
- D. It forwards traffic to the Measurement Engine

Correct Answer: A
