

## 510-033<sup>Q&As</sup>

Sybase Replication Server Administrator Pro Exam

### Pass Sybase 510-033 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/510-033.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Sybase  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following operations can NOT be replicated? (Choose 2)

- A. Drop table
- B. Reorg rebuild
- C. Slow bcp
- D. Truncate table
- E. Update statistics

Correct Answer: BE

---

**QUESTION 2**

What change will enable the RepAgent to reduce the number of objects transferred to the Replication Server?

- A. Increase the value of the parameter "scan batch size"
- B. Unmark all objects marked for replication that do not have a subscription
- C. Set the value of the parameter "batch\_ltl" from FALSE to TRUE
- D. Increase the value of the parameter "send\_buffer\_size" to increase the packet size

Correct Answer: B

---

**QUESTION 3**

Which of the following is TRUE for a Warm Standby configuration? (Choose 2)

- A. Requires Replication Definition for tables
- B. Does not utilize the outbound queue
- C. Subscription is not used
- D. Supports concurrent bi-directional transaction replication
- E. Can be configured to support multiple standby

Correct Answer: BC

---

**QUESTION 4**

What is the serialization method with the highest degree of parallelism called?

- A. Wait\_for\_start.
- B. Isolation level 3.
- C. No\_wait.
- D. None.

Correct Answer: C

---

## QUESTION 5

When you drop a function string, which condition is TRUE?

- A. The Data Server connection gets suspended.
- B. The table or procedure defined in the function string will be unmarked for replication.
- C. The Replication Definition associated to the function string need to be dropped and recreated.
- D. The Replication Server automatically inherits the default function string from the Parent Class.

Correct Answer: D

---

## QUESTION 6

Which of the following are TRUE about the DSI Executor? (Choose 2)

- A. Reads transactions from the transaction log
- B. Reads transactions from the DSI SQT cache
- C. Reads transactions from the outbound queue
- D. Performs exception processing

Correct Answer: BD

---

## QUESTION 7

What action must be taken to properly affect a change to a RepAgent configuration parameter in a running Replication Server System?

- A. The RepAgent connection to the primary database must be suspended before a change is made to the parameter and then the connection must be resumed.
- B. The RepAgent thread must be stopped before a change is made to the parameter and then restarted.
- C. The parameter can be modified at any time and the RepAgent connection to the primary database must be suspended then be resumed before the modification is applied.

D. The parameter can be modified at any time and the RepAgent thread must be stopped and restarted before the modification is applied.

Correct Answer: D

---

**QUESTION 8**

Which of the following is NOT true about autocorrection?

- A. Required with nonatomic materialization
- B. Can reference Replication Definitions that include the replicate minimal columns clause
- C. Converts update to the replicate table to delete followed by insert
- D. Eliminates duplicate key errors that could be caused by users changing primary data during materialization

Correct Answer: B

---

**QUESTION 9**

What are the two ways to replicate stored procedures? (Choose 2)

- A. Breaking down the stored procedure to multiple transactions at the replicate
- B. An applied function replicating from a primary to a replicate database
- C. A request function replicating from a replicate to a primary database
- D. Marking the table with sp\_setreplicate will replicate all procedures on the table

Correct Answer: BC

---

**QUESTION 10**

Which of the following tables contain the Replication Server exception log? (Choose 3)

- A. Rs\_systext
- B. Rs\_excepthdr
- C. Rs\_msgs
- D. Rs\_locator
- E. Rs\_exceptscmd
- F. Rs\_recovery

Correct Answer: ABE

---

**QUESTION 11**

For which materialization method does the Replication Server initiate a holdlock on the primary table and maintain it during the entire data movement?

- A. Manual atomic
- B. Automatic nonatomic
- C. Automatic atomic
- D. Manual nonatomic

Correct Answer: C

---

**QUESTION 12**

What are the tables that make up the exception log? (Choose 3)

- A. Rs\_locator
- B. Rs\_exceptshdr
- C. Rs\_exceptscmd
- D. Rs\_exceptslast
- E. Rs\_systext

Correct Answer: BCE

---

**QUESTION 13**

What is the relationship of the name of a function Replication Definition to the name of a stored procedure?

- A. They have no relationship.
- B. They must be the same.
- C. They must be different.
- D. They can be different.

Correct Answer: B

---

## QUESTION 14

Where are function Replication Definitions created for request functions?

- A. Primary database
- B. Primary Replication Server
- C. Replicate database
- D. Replicate Replication Server

Correct Answer: B

---

## QUESTION 15

Which of the following are TRUE about request functions? (Choose 2)

- A. A function replicate definition is needed for both the primary Replication Server and the replicate Replication Server.
- B. A function Replication Definition is created in the Primary Replication Server.
- C. Request functions do not use subscriptions.
- D. Request functions do not have to be marked for replication.

Correct Answer: BC
