

## 5V0-31.20<sup>Q&As</sup>

VMware Cloud Foundation Specialist

**Pass VMware 5V0-31.20 Exam with 100% Guarantee**

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/5v0-31-20.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by VMware  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

What is the valid server type within SDDC Manager that should be used when registering an external server for the file-based backup of VMware NSX Managers?

- A. SFTP
- B. FTP
- C. NFS
- D. HTTPS

Correct Answer: A

---

**QUESTION 2**

An administrator has been tasked with adding capacity to an existing workload domain. The new hosts have arrived but will need to be prepared before they can be added to VMware. Which two steps must be performed to facilitate imaging with the VMware Imaging Appliance? (Choose

two )

- A. Configure Legacy boot mode in BIOS.
- B. Ensure that UEFI is enabled in BIOS.
- C. Configure the hosts to boot from SAN.
- D. Configure option 43 on DHCP servers
- E. Configure the hosts to PXE boot

Correct Answer: AE

---

**QUESTION 3**

A system administrator needs to perform an image based backup of SDDC Manager using VMware vSphere Storage APIs - Data Protection. Which type of backup must be performed to reduce the backup time and storage cost?

- A. Synthetic full
- B. Mirror
- C. Differential
- D. Incremental

Correct Answer: D

---

**QUESTION 4**

An administrator has been tasked with updating license keys in a VMware Cloud Foundation environment. These licenses include:

1.  
VMware vSphere
2.  
VMware vSAN
3.  
VMware vCenter Server
4.  
VMware NSX-T Data Center

Where must an administrator go in order to update the specified license keys?

- A. SDDC Manager > Administration > Licensing
- B. SDDC Manager > Inventory
- C. VMware vCenter > Administration > Licensing
- D. VMware vRealize Suite Lifecycle Manager > Locker

Correct Answer: B

---

**QUESTION 5**

SDDC Manager has been configured to use a Microsoft Certificate Authority. The administrator must replace certificates for the VI workload domain. What is the first step that must be taken to complete this task?

- A. Delete the existing certificates.
- B. Generate a Certificate Signing Request (CSR) for the VI workload domain in SDDC Manager.
- C. Generate a Certificate Signing Request (CSR) from the Microsoft Certificate Authority.
- D. Export the default Certificate Signing Request (CSR) from the Microsoft Certificate Authority

Correct Answer: B

---

**QUESTION 6**

Which two statements accurately characterize vSphere Pods? (Choose two )

- A. A vSphere Pod is the smallest building block of vSphere with Tanzu that can run containerized applications.

- B. A vSphere Pod can run only one container, and the minimum number of vSphere Pods in a cluster is three pods.
- C. A vSphere Pod is just a VM that runs a minimal version of Photon OS and container runtime on top of it.
- D. A vSphere Pod is a Kubernetes pod that runs on Tanzu Kubernetes Cluster
- E. A vSphere Pod can use normal vSphere Standard Switch and vSphere Distributed Switch

Correct Answer: AD

---

#### QUESTION 7

An administrator creates network pools in preparation for the workload domain. Which two values must be defined in the network pool configuration? (Choose two )

- A. MTU
- B. NTP
- C. VLAN ID
- D. DNS
- E. PTP

Correct Answer: AC

---

#### QUESTION 8

What is the correct syntax to collect SDDC Manager logs to Amp folder while performing health check?

- A. `/usr/bin/sddc-support/sos --api-Jogs --log-dir /tmp`
- B. `/usr/bin/sddc-support/sos --sddc-manager-logs --log-dir/tmp`
- C. `/opt/vmware/sddc-support/sos -- sddc-manager-logs --log-dir /tmp`
- D. `/opt/vmware/sddc support/sos --sddc-manager-logs --Jog dir /tmp --no-health-check`

Correct Answer: C

---

#### QUESTION 9

Which two Password Management options are available for passwords that are locally managed within VMware SDDC Manager? (Choose two.)

- A. Reset
- B. Update
- C. Rotate

D. Change

E. Replace

Correct Answer: BC

---

**QUESTION 10**

An architect designs a VMware Cloud Foundation which includes three workload domains in addition to the management domain. Each workload domain is comprised of two clusters with 19 hosts in each. There is a requirement to keep the NSX-T Manager instances to a minimum for ease of management.

Which NSX-T Manager VM appliance sizing option should the architect choose to support the workload domains using the minimum number of NSX-T Manager clusters?

A. Deploy one NSX-T Manager cluster using the large VM appliance size to support all three workload domains.

B. Deploy three NSX-T Manager clusters using the medium VM appliance size and assign one NSX-T Manager cluster per workload domain.

C. Deploy one NSX-T Manager cluster using the medium VM appliance size to support all three workload domains.

D. Deploy three NSX-T Manager clusters using the large VM appliance size and assign one NSX-T Manager cluster per workload domain.

Correct Answer: A

---

**QUESTION 11**

What is a valid use case for using multiple clusters in a workload domain?

A. Sixty-six hosts are required in the workload domain.

B. vSAN is required as a principal storage option.

C. NFS is required as a principal storage option.

D. Thirty-three hosts are required in the workload domain.

Correct Answer: C

---

**QUESTION 12**

Which two actions are prerequisites for upgrading VMware Cloud Foundation 4.x? (Choose two.)

A. Validate that all required bundles for the upgrade are downloaded successfully.

B. Acquire a temp IP range for the new products components deployed during the upgrade.

C. Take a backup of SDDC Manager.

- D. Take a snapshot of all workloads running on VMware Cloud foundation
- E. Validate that all required license keys are available for the newer products versions

Correct Answer: AC

---

### QUESTION 13

During a design discussion around VMware Cloud Foundation, it was identified that

1.

The customer has workloads that have requirements related to logical load balancing

2.

The customer would like to size the different Edge nodes based on application requirements

How can these requirements be met when planning for VMware Cloud Foundation NSX-T Edge deployment through SDDC Manager?

- A. Use Workload Management
- B. Use NSX-T API calls
- C. Use the Custom option
- D. Deploy Bare Metal Edges

Correct Answer: C

---

### QUESTION 14

An architect has been tasked with designing a stretched workload domain between two sites in an active configuration due to number of recent failures in the company's infrastructure.

- A. vSAN Witness Appliance can be deployed in VMware Cloud on AWS
- B. The witness appliance should be running different version of fc:SVi as the ESXi hosts in the stretched cluster.
- C. Static routes on the vSAN Witness host must be configured to enable network communication for the vSAN kernel traffic.
- D. The management domain cluster must be stretched before stretching a cluster in a VI workload domain.
- E. First cluster only in every VI workload domain can be stretched.
- F. The vSAN Witness Appliance must be available on the same broadcast domain

Correct Answer: C

---

## QUESTION 15

An administrator creates a management domain using the VMware Cloud Bulkier appliance Which type of storage must be used as principal storage for the management domain?

- A. NFS
- B. vSAN
- C. VMFS on FCoE
- D. VMFS on FC

Correct Answer: B
