QUESTION 1

What are three pre-requisites for utilizing VMware Site Recovery? (Choose three.)

- A. vSphere 6.0, Update 3 or higher at the protected site
- B. A maximum supported latency between regions of 150 milliseconds
- C. A Layer 2 stretched network connection between on-premises and VMware Cloud on AWS
- D. Sufficient VMware Site Recovery Manager licenses to protect the desired amount of virtual machines
- E. VMware Cloud on AWS VPC running in an AWS location with a minimum of three availability zones
- F. A Layer 3 network connection between the on-premises data center and the cloud SDDC

Correct Answer: ADF

QUESTION 2

A customer is looking for a reliable and cost-effective way to back up workload data running in VMware Cloud on AWS.

What is the most appropriate solution?

- A. Deploy a virtual machine AWS EC2 and mount AWS Elastic File Storage (EFS) to this virtual machine; configure this virtual machine as the backup target for image-based backups in VMware vSphere Data Protection.
- B. Deploy a virtual machine in VMware Cloud on AWS and mount AWS Elastic File Storage (EFS) to this virtual machine; configure this virtual machine as the backup target for image-based backups in VMware vSphere Data Protection.
- C. Create an S3 bucket in another availability zone and validate that the customers preferred backup solution is supported for VMware Cloud on AWS; otherwise guide the customer to choose another backup solution.
- D. Create an S3 bucket in the same availability zone and validate that the customers preferred backup solution is supported for VMware Cloud on AWS; otherwise guide the customer to choose another backup solution.

Correct Answer: B

QUESTION 3

In what order must the step for protecting a workload for VMware on AWS DRaaS be completed?

- A. Add a virtual machine to a protection group, then replicate the virtual machine, then add the virtual machine to a recovery plan.
- B. Replicate a virtual machine, then add the virtual machine to a recovery plan, then add the virtual machine to a protection group.
- C. Replicate a virtual machine, then add the virtual machine to a protection group, then add the virtual machine to a recovery plan.

D. Add a virtual machine to the recovery plan, then add the virtual machine to a protection group, then replicate the virtual machine.

Correct Answer: C

QUESTION 4

VMware Cloud on AWS includes which two of the listed NSX-T networking constructs? (Choose two.)

- A. Tier2 Router
- B. Tier1 Router
- C. Tier0 Router
- D. Edge Services Gateway
- E. Distributed Logical Router

Correct Answer: CE

QUESTION 5

What are two requirements for using the bulk migration feature of HCX for virtual machines migrating into VMware Cloud on AWS? (Choose two.)

- A. No mounted CD Drives
- B. Virtual RDMs
- C. NSX for vSphere
- D. Virtual Hardware 7 and above
- E. Physical RDMs

Correct Answer: AD

Reference: <https://docs.vmware.com/en/VMware-HCX/services/hcx-user-guide.pdf>

QUESTION 6

What are the two primary deliverables of a Hybrid Cloud Readiness Assessment? (Choose two.)

- A. Gap Analysis Excel document
- B. Migration Plan Excel document
- C. Gap Analysis Word document
- D. Networking Topology Visio document

E. On-boarding Process Word document

Correct Answer: AB

Reference: <https://www.bconn.nl/hybrid-cloud-readiness-assessment-white-paper/>

QUESTION 7

Which three service appliances does the HCX Enterprise Manager deploy? (Choose three.)

- A. HCX Network Extension
- B. HCX WAN Optimization
- C. HCX Migration
- D. HCX L2VPN
- E. HCX Interconnect
- F. HCX Cross Cloud vMotion

Correct Answer: ABE

QUESTION 8

What are two circumstances when it is appropriate to use HCX for workload migration? (Choose two.)

- A. When backing up on-premises SDDCs.
- B. When migrating from on-premises to Azure.
- C. When attempting to deploy firewall rules between on-premises and the cloud.
- D. When multiple (10+) VMs need to be moved within a limited maintenance window.
- E. When the bandwidth available is a constraint.

Correct Answer: DE

Reference: <https://docs.vmware.com/en/VMware-HCX/services/hcx-user-guide.pdf>

QUESTION 9

Which two methods could be used to gather relevant information during a Hybrid Cloud Readiness Assessment? (Choose two.)

- A. Application licensing analysis
- B. vSphere patching history analysis
- C. Application development methodology
- D. Stakeholder interviews
- E. VMware vRealize Operations Manager reports

Correct Answer: BE

QUESTION 10

What are two primary differences between an Elastic IP address and a Public IP address assignment? (Choose two.)

- A. A Public IP address assignment is associated with an AWS account.
- B. A Public IP address assignment could manually be attached and detached from an instance.
- C. An Elastic IP address has a cost associated with it.
- D. An Elastic IP address assignment is associated with an AWS account.
- E. An Elastic IP address assignment will be persistent during the Stop/Start process of an instance while a Public IP address would be dynamically reassigned.

Correct Answer: BD

It can be assigned to any network interface, which can be attached or detached from an instance.

An Elastic IP address is associated with your AWS account.
