QUESTION 1

DRAG DROP

Drag and Drop each task in the left column to its associated activity in the right column.

Select and Place:

Options, select from these

Conduct a Solution Value Assessment	Document Collaboration Messaging Features/Functions
Document Existing User Phone Feature Template	Conduct User Community Adoption Absorption Analysis
Document User-Level Functionality Requirements	Document Existing Data Applications
Generate an IP Addressing Scheme	Define Power and Environmental Requirements
Develop Quality of Service Specification	

Business Requirements Workshop

Place here	Options, place here
	Place here
	Place here

Host Physical Design Workshop

Place here	Options, place here
	Place here
	Place here

Data and Voice Infrastructure Site Structure

Place here	Options, place here

Document Existing User Phone Feature Template

Document Existing Data Applications

Data and Voice Infrastructure Site Structure

Generate an IP Addressing Scheme

Options, place here

Define Power and Environmental Requirements

Develop Quality of Service Specification

QUESTION 2

In the Implement phase, project close-out involves which of the following tasks?

- A. Customize ongoing support hand-off kit

- B. Deliver Education based on Staff planning Development Reports
- C. Conduct Engagement Profitability assessment
- D. Execute Network Migration Plan

Correct Answer: C

QUESTION 3

The staff training template is one of the templates and/or tools identified as essential for the informal advanced training for administration and operations activity during the implementation phase. What is the other Resources that is used to accomplish this activity?

- A. System Requirements Validation Report
- B. As Built Documentation
- C. IPC Project Plan
- D. Lessons Learned Template
- E. Phone Deployment Kit

Correct Answer: B

QUESTION 4

In the implement phase, staging involves installation and testing the customer's solution components in a non-production lab environment. Which of the following defines the benefit to the partner ?

- A. A Properly planned and executed Day 1 support plan improves the customer's and their end-users satisfaction with the implemented solution.
- B. Proper migration allows the customer to adopt the new hardware or software solution without an unacceptable disruption of their network services
- C. Staging a validates that the system is operational to the customer and provides the customer with increased confidence in the implemented system.
- D. Staging validates the system and proactively identifies and resolves any network implementation issues. It demonstrates to the customers that the partner will deploy a quality network in an efficient manner and mitigates risk that the incorrect software or hardware is delivered to the installation site

Correct Answer: D

QUESTION 5

In the Implement Phase, What is the possible customer benefit of implementation support (Day 1)?

- A. Increases revenue or lowers operating costs or does both by helping to ensure that the implemented system is

working to the measures defined in the system acceptance test plan

B. Provides instructions on how to get technical support when needed

C. Provides documentation needed to understand the details of network that will be useful when planning for future changes to the system

D. Assures customer of a fully operational system and that there is support if needed

Correct Answer: D

QUESTION 6

In the design phase, which service component provides the customer with a comprehensive design specific to addressing operations and network management processes and tools ?

A. Implementation Plan

B. Business Requirements Document

C. Detailed Design Development

D. Business Plan

E. Project Kick-off

F. Staging Plan

Correct Answer: C

QUESTION 7

In the design phase, which tasks is conducted during the host physical desing workshop activity?

A. Finalize legacy integration including Legacy Voice, Data and Active Directory

B. Design Dial Plan Architecture and Emergency call Routing

C. Develop Quality of Service Specifications

D. Define Message Store Options and sizing

E. Identify Network Management Design Objectives

Correct Answer: C

QUESTION 8

In the Operate Phase, the tasks of analyzing process exceptions belongs to which service component?

A. Incident Management

- B. Security Management
- C. Problem Management
- D. Change Management
- E. Service Assurance

Correct Answer: E

QUESTION 9

In the design phase, which service component includes developing and documenting the test case used to verify that a deployed infrastructure meets the operational, functional and interface requirements?

- A. Detail Design Development
- B. Implementation Plan
- C. Staging Plan
- D. Business Plan
- E. System Acceptance Test Plan Development

Correct Answer: E

QUESTION 10

What is the primary objective of the plan phase?

- A. Assess the existing environments to determine if it can support the proposed system.
- B. Identify the activities for installing and configuring the equipment at the customer sites.
- C. Gather high-level solution requirements, and understand the customer business needs and the opportunity.
- D. Prepare the activities for day-to-day support, management, and monitoring of the newly implemented system.

Correct Answer: A

QUESTION 11

Which of the following phases includes identifying and documenting customer business requirements?

- A. Prepare
- B. Initiate
- C. Design

D. plan

Correct Answer: A

QUESTION 12

The Project Kick-off in the plan phase provides an opportunity to complete which two of the following tasks? (Choose two)

- A. Confirm Project roles and responsibilities
- B. Perform preliminary application discovery
- C. Understand workflow between departments
- D. Confirm project and milestone dates
- E. Perform detailed analysis of customer requirements

Correct Answer: AD

QUESTION 13

Which Service Component within the prepare phase helps customers make a sound decision by providing information relating to financial justification and benefits?

- A. Operations Technology Strategy Development
- B. Business Requirements Development
- C. Proof of Concept
- D. Business Case Development
- E. Technology Strategy Development

Correct Answer: D

QUESTION 14

In the Operate Phase, Which three templates and or tools are used to in the tasks to accomplish the activity, monitoring an IPC System (Choose three)

- A. Supplier Management Reports
- B. Applications Development Document
- C. Remote Operational Support
- D. Network Implementation Plan

E. Operations, Administration and Management (OAM) tool

F. Network Management System (NMS) Console

Correct Answer: CEF

QUESTION 15

Which the design phase, a network development that lacks documented details and tasks related to deploying and commissioning a network infrastructure is likely to benefit from the deliverables in which service component?

A. Implementation Plan

B. Detail Design Development

C. Implementation Plan Development

D. Migration Plan Development

E. Business Requirements Document

Correct Answer: C
