QUESTION 1

You are creating a Web application. The application will be consumed by client computers that run a variety of Web browsers. Which term is used to describe the process of making the application available for client computers to access?

- A. Casting
- B. Deploying
- C. Hosting
- D. Virtualization

Correct Answer: C

You host web applications.

QUESTION 2

Class C and Class D inherit from Class B. Class B inherits from Class A. The classes have the methods shown in the following table.

Class	Method
A	m1
B	m2
C	m3
D	m4

All methods have a protected scope.

Which methods does Class C have access to?

- A. only m1, m3
- B. only m2, m3
- C. m1, m3, m4
- D. m1, m2, m3
- E. m2, m3, m4
- F. only m3, m4

Correct Answer: D

QUESTION 3

In your student directory database, the Students table contains the following fields: firstName lastName emailAddress telephoneNumtoer You need to retrieve the data from the firstName, lastName, and emailAddress fields for all students listed in the directory. The results must be in alphabetical order according to lastName and then firstName.

Which statement should you use?

- A.

```
SELECT firstName, lastName, emailAddress
FROM Students
ORDER BY lastName, firstName
```
- B.

```
SELECT firstName, lastName, emailAddress
FROM Students
SORT BY lastName, firstName
```
- C.

```
SELECT firstName, lastName
FROM Students
ORDER BY lastName, firstName, emailAddress
```
- D.

```
SELECT firstName, lastName, emailAddress
FROM Students BY lastName, firstName
```

A. B. C. D.

Correct Answer: A

to sort use: ORDER BY LastName, FirstName

QUESTION 4

Which language uses Data Definition Language (DDL) and Data Manipulation Language (DML)?

- A. Java
- B. C++
- C. SQL
- D. Pascal

Correct Answer: C

SQL uses DDL and DML.

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

To minimize the amount of storage used on the hard drive by an application that generates many small files, you should make the partition as small as possible.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed\\\\" if the underlined text makes the statement correct.

- A. No change is needed
- B. file allocation table
- C. block size
- D. folder and file names

Correct Answer: C

QUESTION 6

The Dog class and the Cat class inherit from the Animal class. The Animal class includes a breathe() method and a speak() method. If the speak() method is called from an object of type Dog, the result is a bark. If the speak() method is called from an object of type Cat, the result is a meow.

Which term is used to describe this object-oriented concept?

- A. multiple inheritance
- B. encapsulation
- C. polymorphism
- D. data hiding

Correct Answer: D

QUESTION 7

The Dog class and the Cat class inherit from the Animal class. The Animal class includes a breathe() method and a speak() method. If the speak() method is called from an object of type Dog, the result is a bark. If the speak() method is called from an object of type Cat, the result is a meow.

Which term is used to describe this object-oriented concept?

- A. multiple inheritance
- B. polymorphism
- C. data hiding
- D. encapsulation

Correct Answer: D

QUESTION 8

This question requires that you evaluate the underlined text to determine if it is correct.

To minimize the amount of storage used on the hard drive by an application that generates many small files, you should

make the partition as small as possible.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. file allocation table
- C. block size
- D. folder and file names

Correct Answer: C

QUESTION 9

Which service can host an ASP.NET application?

- A. Internet Information Services
- B. Cluster Services
- C. Remote Desktop Services
- D. Web Services

Correct Answer: B

QUESTION 10

Which term is used to describe small units of text that are stored on a client computer and retrieved to maintain state?

- A. trace
- B. cross-page post
- C. cookie
- D. server transfer

Correct Answer: C

HTTP is a stateless protocol. This means that user data is not persisted from one Web page to the next in a Web site. One way to maintain state is through the use of cookies. Cookies store a set of user specific information, such as a reference identifier for a database record that holds customer information.

QUESTION 11

You plan to create an application for your company. The application will run automated routines and write the results to a text-based log file. Little or no user interaction is required.

Security requirements on the host computers prevent you from running applications on startup, and users must be able to see the status easily on the screen. The host computers also have limited memory and monitors that display only two colors. These computers will have no network connectivity. Which type of application should you use for this environment?

- A. Windows Store app
- B. console-based
- C. DirectX
- D. Windows Service

Correct Answer: A

QUESTION 12

This question requires that you evaluate the underlined text to determine if it is correct.

A data dictionary that describes the structure of a database is called metadata.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. normalization
- C. a database management system (DBMS)
- D. metacontent

Correct Answer: A

QUESTION 13

You are migrating several HTML pages to your website. Many of these pages contain HTML and tags. Which XHTML document type declaration should you use?

- A. `<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN" "http://www.w3.org/TR/html4/loose`
- B. `<!DOCTYPE html>`
- C. `<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Frameset//EN" "http://www.w3.org/TR/xhtml1/DTD/xhtml1`
- D. `<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Strict//EN" "http://www.w3.org/TR/xhtml1/DTD/xhtml1`

A. B. C. D.

Correct Answer: A

QUESTION 14

You need to create an application that processes data on a last-in, first-out (LIFO) basis. Which data structure should you use?

- A. Queue
- B. Tree
- C. Stack
- D. Array

Correct Answer: C

A stack implements LIFO.

QUESTION 15

What does the Console.Error property do within a console-based application?

- A. sets the standard error output stream
- B. gets the standard error input stream
- C. sets the standard error input stream
- D. gets the standard error output stream

Correct Answer: D
