QUESTION 1

How does SOA achieve alignment between business and IT?

- A. By ensuring services represent the underlying IT functions that the business must use in order to function
- B. By hiding operational details allowing services to be loosely coupled and changed to suit the situation
- C. By creating business processes that are direct representations of the business which can be simulated and refined
- D. By providing service operations that represent business tasks allowing those operations to be used in whatever combination the business decides is appropriate

Correct Answer: D

QUESTION 2

What does the information in the service registry support?

- A. The complete service lifecycle
- B. Runtime lookup of service endpoints
- C. Enhances messages through mediation
- D. Transformation of messages between different technologies

Correct Answer: B

QUESTION 3

Which requirement is fulfilled by dynamic management of services during the execution in SOA?

- A. Meeting Service Level Agreements (SLAs) for Gold customers
- B. Assigning premiere customers to the Gold customer status
- C. Identifying an incoming request as coming from a Gold customer
- D. Changing a business process to provide enhanced capabilities for Gold customers

Correct Answer: A

QUESTION 4

Which two roles do Web services play in an SOA?

- A. They provide mediation for service requests.

- B. They provide the framework for information as a service.
- C. They support interoperability between disparate technologies.
- D. They provide an open standard means for describing service interfaces.
- E. They provide the messaging infrastructure for the Enterprise Service Bus (ESB).

Correct Answer: CD

QUESTION 5

What describes a task within a modeled business process?

- A. The description of steps required to complete a unit of work
- B. Each task represents a work item performed by a system or human
- C. The transition that takes place for the business process to continue
- D. When a human completes a task it is marked complete allowing the process to proceed

Correct Answer: B

QUESTION 6

When is the location of the service provider first determined in the SOA lifecycle?

- A. Model business process and design according to requirements
- B. Construct and assemble service components
- C. Configure and deploy from test through production
- D. Manage to business and IT goals

Correct Answer: C

QUESTION 7

What does the SOAP specification define?

- A. A format for XML messaging
- B. An interface to a business process
- C. An Internet communications protocol
- D. The payload contents for a Web service message

Correct Answer: A

QUESTION 8

Which statement describes the importance of SOA governance?

- A. It provides a tool for controlling the distribution of Web services for a line of business.
- B. It eliminates the risk in migrating a business from standard integration mechanisms to SOA.
- C. It creates a clearly articulated decision framework for designing, implementing and managing SOA services.
- D. It provides a mechanism for the lines of business to provide input to IT staff for the design of services.

Correct Answer: C

QUESTION 9

Which statement describes a business process in the context of SOA?

- A. It is a business policy or decision procedure.
- B. Items are accumulated and then processed together.
- C. It is a series of tasks connected together like building blocks.
- D. It enables interactions between message consumers and providers.

Correct Answer: C

QUESTION 10

Why is defining appropriate Key Performance Indicators (KPIs) important for the success of an SOA?

- A. To provide IT performance metrics
- B. To determine the marketability of the SOA processes
- C. To justify funding for migration of the processes to SOA
- D. To provide feedback indicating Return on Investment (ROI) back to the business
- E. To enable business executives to identify impediments and bottlenecks in performance of the business processes

Correct Answer: D

QUESTION 11

Why is business and IT alignment so important to SOA?

- A. Applications can be rewritten to suit the needs of the business.
- B. It allows for a significant investment in technology and hardware.
- C. Business and IT can collectively fulfill the business needs and goals.
- D. Business and IT can decide which vendors to use and which business functions to outsource.

Correct Answer: C

QUESTION 12

In applying SOA, which principle can reduce overall cost?

- A. Reuse services across lines of business.
- B. Build services for only the most important business functions.
- C. Build general services that can perform a variety of business tasks.
- D. Reimplement all services on a consistent hardware and software platform.

Correct Answer: A

QUESTION 13

Which approach is considered the most effective first step in ensuring funding for the service lifecycle of shared services at the enterprise level?

- A. Chargeback mechanisms are put in place to prevent illegitimate use of services.
- B. Use a "tax" based approach based on the overall usage of IT by each line of business.
- C. Form an SOA governance organization and provide this group with the required funding.
- D. Use the "first need" approach, where each project that needs a service first funds its creation.

Correct Answer: C

QUESTION 14

How can disparate services communicate with each other in an SOA?

- A. Use XML messages to provide interoperability.
- B. Service providers adopt one common data model for all services.
- C. Enforce a common data model at the Enterprise Service Bus (ESB) layer.
- D. Business analysts create the integration logic details to negotiate between services.

Correct Answer: A

QUESTION 15

Which action should they take first?

- A. Create a service registry.
- B. Define an SOA governance model.
- C. Perform an SOA maturity assessment.
- D. Create an SOA Center of Excellence (CoE).

Correct Answer: C
