QUESTION 1

A company with various departments wants to use tagging to improve search capability. Each department is restricted to use its own tags. How should an Architect organize the tags?

A. Create a department sub-tag in each tag

B. Use department ID as a prefix of each tag

C. Create a namespace for each department

D. Create tags in "departmentName:tagName" format

Correct Answer: C

QUESTION 2

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

1.

The client currently has a dozen static templates that they want to move to editable templates.

2.

The existing pages use the parsys paragraph system for storing components.

3.

Each page based on one of the static templates has its own custom properties tab that is unique for that template type.

4.

The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

A. 1. Use a new page component for editable templates based on the core components page component

2. Migrate page properties to respective components dialogues

B. 1. Use a new page component for editable templates based on the core components page component

2. Convert page properties to policies

C. 1. Use the same page components for editable templates

2. Use a new template type for each static template

D. 1. Use the same page components for editable templates

2. Create a new editable template based on each of the existing page components

Correct Answer: D

QUESTION 3

A user is part of the Employees LDAP group synchronized with AEM. The same user is added to the authors group in AEM. The user is then removed from the Employees group on the LDAP server.

What is the result during the next synchronization with AEM?

A. The user is removed from both the Employees and the AEM authors groups

B. The user is removed from the authors group but not the Employees group in AEM

C. The user is removed from the Employees group but not the authors group in AEM

D. The user is not removed from either the Employees and the AEM authors groups

Correct Answer: A

QUESTION 4

A customer is about to go live with a new website on AEM on prem. The DNS (www.domam.com) already points to the load balancer of the AEM environment and final sanity checks are being performed. The website was tested in lower environments without SSL On production, the website is served over https. During sanity testing, all requests result in a 404.

While investigating this issue, an Architect determines the following:

1.

The requests land on port 443 on the load balancer where SSL is terminated and an HTTP header X-Forwarded-Proto is set

2.

The website Sling Mapping is created beneath /etc/map/http/www.domain.com.80

3.

The URLs on the website are externalized with http in the absolute links Which two actions should the Architect take to resolve this problem? (Choose two.)

A. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.80

B. Ensure the Sling Mapping exist at /etc/map/httpj)mwp
