

## ATA02<sup>Q&As</sup>

Designing a Blue Prism (Version 6.0) Environment

### Pass Blue Prism ATA02 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/ata02.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Blue Prism  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

What network connections should be considered, when deploying runtime resources on the other side of a firewall from the Application server? (Choose two.)

- A. Remoting connections between Application server and runtime resource
- B. Instructional communications between Interactive Clients and Runtime resource
- C. Database connection between the database server and Runtime resource
- D. Inbound web services connections from the Application server to Runtime resource

Correct Answer: AC

---

**QUESTION 2**

Which of the following are supported connection modes within a V6 Blue Prism environment? (Choose two.)

- A. WCF: Soap with Message Encryption and Windows Authentication
- B. WCF: Soap with Remote Encryption
- C. WCF: Soap with Transport Encryption
- D. .NET Remoting with Transport Encryption
- E. HTTPS Connection mode

Correct Answer: AC

---

**QUESTION 3**

Which of the following should be taken into account, when designing the security model for a Blue Prism environment? (Choose five.)

- A. Integration with Active Directory
- B. The location of the credential store keys
- C. Integration with an external LDAP service
- D. The encryption method for the credential store
- E. The encryption method for the operational communications between database server and runtimes
- F. The separation of duties between roles and environments
- G. Remote access to the Blue Prism components

Correct Answer: ABEFG

---

## QUESTION 4

Which of the following statements is true, when considering Virtualizing the Blue Prism Database Server?

- A. Virtualization of the database server should only be considered after fully reviewing the specific vendor recommendations for the Hypervisor and SQL server version
- B. The Database server should never be virtualized
- C. Virtualization is only supported on Vmware Hypervisor technology
- D. Virtualization should be considered only in very small environments

Correct Answer: A

---

## QUESTION 5

Which of the following statements are true, when considering the security of INSTRUCTIONAL communications to runtime resources? (Choose three.)

- A. By default the connection is native TCP and not encrypted
- B. The runtime resource can be configured to use certificate-based encryption for all inbound communication
- C. The login agent will automatically use a certificate if the runtime resource is configured to use one
- D. The connection will be established via .NET remoting and will be encrypted as long as the "Use Secure Connections" flag is set
- E. A central setting within Blue Prism can be used to prevent all associated Runtime Resources from accepting any instructional communications which are not encrypted.

Correct Answer: BCE

---

## QUESTION 6

What must be considered before operating multiple Runtime Resources on a single Windows desktop?

- A. There are no conditions, only one Runtime Resource can be set to listen per Windows session.
- B. Each Runtime Resource must listen on a different port and the processes which run on the device must not impact other processes on the same device.
- C. Each Runtime Resource must listen on the same port and the processes which run on the device must not impact other processes on the same device.
- D. Each Runtime Resource must listen on a different port.

Correct Answer: B

---

**QUESTION 7**

When process automations are designed appropriately, which connections between Blue Prism devices can support high-latency?

- A. Interactive Clients to Runtime Resources
- B. Application Server to Runtime Resources
- C. Application Server to Database Server
- D. Application Server to Interactive Client
- E. No components can be supported over a high-latency connection

Correct Answer: A

---

**QUESTION 8**

Which of the following should be taken into account, when considering Automating applications that are delivered via Application Virtualization or layering Software (such as VMWare Horizon App Volumes, or Citrix XenDisk)? (Choose three.)

- A. There may be additional implications to the overall complexity of the architecture, due to the additional components involved in the virtualization technology
- B. It will only ever be possible to use Surface Automation to Automate these applications
- C. The Login Agent application must be available prior to User Login
- D. The mapping between virtualized applications and users is often 1:1. This needs to be considered when designing the credential management approach for the Runtime Resources
- E. Customizations to the application may be lost after the user is logged out or the system is rebooted, unless additional mechanisms are used to preserve them
- F. Surface Automation will always need to be used in these scenarios

Correct Answer: BCE

---

**QUESTION 9**

Within a PRODUCTION environment, which of the following tasks would an Interactive Client be used for? (Choose four.)

- A. Developing automated processes
- B. Configuring Application models
- C. Creating packages using Release Manager
- D. Importing packages using Release Manager

E. Assigning Processes to Runtime Resources

F. Managing Active Queues

G. Managing Schedules

Correct Answer: BEFG

---

## QUESTION 10

Which of the following statements is true, when considering the Virtualization of Blue Prism? (Choose two.)

A. Type 1 hypervisors, such as VMWare Vsphere and Citrix XenServer should be used for production grade deployments of Blue Prism.

B. Type 2 hypervisors, such as Oracle Virtualbox and Vmware Workstation may be used for production grade deployments of Blue Prism.

C. All desktop virtualization strategies are suitable for deployment of Runtime Resources.

D. Consideration should be given to the system resource requirements of the automated applications, on top of the Blue Prism minimum specifications.

E. The Blue Prism minimum specifications should be sufficient for all use cases.

Correct Answer: AD
