QUESTION 1

A developer works on a multisite realm. A new site requires a different layout for the account landing page, but the business logic and data model remain the same.

1.

The existing code is in landing.isml and AccountControl.js in the app_custom_mystore cartridge.

2.

The app_custom_mystore cartridge contains any custom code for all other business functions.

3.

The cartridge path for the existing site is int_cybersource:int_paypal:app_custom_mystore:app_storefront_base.

The developer creates a new cartridge named app_custom_newproject that contains only the landing.isml template for the new site. Following best practices, which modification should be made to the new cartridge path?

- A. Set the cartridge path so that app_custom_newproject is before app_custom_mystore.
- B. Set the cartridge path so that app_custom_newproject is between app_custom_mystore and app_storefront_base.
- C. Set the cartridge path so that app_custom_mystore is before int_cybersource.
- D. Set the cartridge path so that app_custom_newproject is in the farthest right position.

Correct Answer: A

QUESTION 2

A Digital Developer wants to selectively retrieve products and process them from an iPhone. Which action should the Developer take, given that JavaScript controllers CANNOT be used?

- A. Use import/export in Business Manager.
- B. Create a webservice to retrieve products.
- C. Use OCAPI and invoke it in native language.
- D. Use WebDAV Client to retrieve products.

Correct Answer: D

QUESTION 3

To ensure SFRA best practices and protect against request forgery, the developer introduced CSRF token generation in the customer address form.

```
<form ... action="submit">
  <input name="$ (dw.web.CSRFProtection.getTokenName() )"
    value="$ {dw.web.CSRFProtection.generateToken() }">
  ...
  <the rest of the Form Fields>
  ...
</form>
```

To implement CSRF protection when the form is submitted, the developer needs to introduce the CSRF validation using one or both of these methods as applicable:

1.

validateRequest

2.

validateAjaxRequest

Where in the code does the developer need to add this CSRF validation check?

- A. In the middleware chain of the controller post route
- B. In the controller function that displays the form
- C. In the model function that persists the form data
- D. In the view function that handles the submitted form

Correct Answer: A

QUESTION 4

A developer is asked to write a log containing the ID and name of the product with a variable named myProduct. Which snippet of code should be used?

- A. `Logger.warn(' The current product is ${myProduct.getID()} with name ${myProduct.getName()}\');`
- B. `Logger.warn(' The current product is {0} with name {1}\', myProduct.getID(), myProduct.getName());`
- C. `Logger.warn(' The current product is %s with name %s\').context (myProduct.getID(), myProduct.getName());`
- D. `Logger.warn(' The current product is {0} with name {1}\').context (myProduct.getID(), myProduct.getName());`

Correct Answer: B

QUESTION 5

A developer is asked to create a controller endpoint that will be used in a client-side AJAX request. Its purpose is to display updated information to the user when the request is completed, without otherwise modifying the appearance of the current page.

According to SFRA practices, which method best supports this objective?

- A. res.json()
- B. res.render()
- C. res.print()
- D. res.log()

Correct Answer: B

QUESTION 6

Which two methods are efficient and scalable? (Choose two.)

- A. ProductMgr.queryAllSiteProducts()
- B. ProductSearchHit.getRepresentedProducts()
- C. ProductSearchModel.getProductSearchHits()
- D. Category.getProducts()

Correct Answer: CD

QUESTION 7

A client has two B2C Commerce sites in the same instance: one for the U.S. market, the other for the European market. The product they make are sold with different safety certificates based on the world location.

For example, they sell a smartphone with certificate A in the U.S. and certificate B in Europe, a hairdryer with certificate C in the U.S. and certificate D in Europe, and more.

How should a developer allow the merchant to display the appropriate certification logo in the product details page, depending on the customer's location?

- A. Add a Localizable custom preference to the SitePreference system object type.
- B. Add a Site-specific custom attribute to the Product system object type.
- C. Add a Localizable custom attribute to the Certificate system object type.
- D. Add an Image custom preference to the SitePreference system object type.

Correct Answer: A

QUESTION 8

A Digital Developer is working on a project to convert a pipeline to a JavaScript controller. UX Studio has a functioning pipeline debugger configured for the site. Assume the Developer will add a breakpoint to the controller when it is written. What must be done in order to use the debugger with the new controller when it is written?

- A. Create and use a new script debug configuration.
- B. Use the existing pipeline debugger.
- C. Modify the debugger configuration and use the existing pipeline debugger.
- D. Create and use a new controller debug configuration.

Correct Answer: C

QUESTION 9

In Log Center, a developer notes a number of Cross Site Request Forgery (CSRF) log entries. The developer knows that this happens when a CSRF token is either not found or is invalid, and is working to remedy the situation as soon as possible.

Which two courses of action might solve the problem? (Choose two.)

- A. Extend the CSRF token validity to avoid timeouts
- B. Delete the existing CSRF whitelists in Business Manager
- C. Add the token in the ISML template
- D. Add `csrfProtection.generateToken` as a middleware step in the controller

Correct Answer: AB

QUESTION 10

A Digital Developer has detected storefront pages being rendered with an error message. After inspecting the log files, the Developer discovered that an enforced quota is being exceeded. What action should the Developer take to stop the quota violation?

- A. Rewrite the code that is causing the overage.
- B. Change the Business Manager configuration for the quota settings.
- C. Take no action, the overage will be resolved when concurrent visitors are reduced.
- D. Ask support to remove the quota limit.

Correct Answer: B

QUESTION 11

Given a template rendered by a controller with caching and a remote include without caching, which situation applies?

- A. The remote include portion is not cached, but the rest of the page is cached
- B. Both the remote include portion and the rest of the page are cached
- C. The page is cached only for returning customers because of the remote include
- D. The page is not cached because the remote include introduces an uncached portion

Correct Answer: A

QUESTION 12

A Digital Developer has a site export file on their computer that needs to be imported into their sandbox. How should the developer update their sandbox with the data in this file?

- A. Connect and import the file using the remote option within the Site Import and Export Business Manager module.
- B. Upload and import the file using the local option within the Site Import and Export Business Manager module.
- C. Upload the file to the Impex WebDAV directory and import using the Site Import tool within UX Studio.
- D. Upload the file to the Static WebDAV directory and import using the Import and Export Business Manager module.

Correct Answer: B

QUESTION 13

When looking at Custom Object instances for a site, a merchant notices that the creation date is not showing up on the instances in Business Manager. Where should the developer add this attribute to the Custom Object so it is visible for the merchant to see in Business Manager?

- A. Add the creation date to the attributes of the Custom Object.
- B. Mark the existing creation date attribute as visible.
- C. Add the creation date to the attribute group for the Custom Object.
- D. Assign the current date/time to a new custom attribute, creationDate, via code.

Correct Answer: A

Reference: <https://documentation.b2c.commercecloud.salesforce.com/DOC3/index.jsp?topic=%2Fcom.demandware.dochelp%2FScriptProgramming%2FCreatingCustomBusinessObjectsInstance.html>

QUESTION 14

Why should a Digital Developer use `ProductSearchModel.getProducts()` instead of `Category.getOnlineProducts()` to access products?

- A. It is more readable code.
- B. It has fewer lines of code.
- C. It uses the search index.
- D. It reduces accesses to the application server.

Correct Answer: D

QUESTION 15

A developer is tasked with implementing the necessary code for a new Page Designer component.

What are the two purposes of the JSON metadata definition file that the developer creates? (Choose two.)

- A. Defines the responsive layout of the rendered template.
- B. Defines regions within the component type.
- C. Defines the attributes that a merchant enters when using the component type.
- D. Defines the business and rendering logic of the component required by the merchant.

Correct Answer: BC
