QUESTION 1

What must be added to an application before creating a Java External Service?

- A. Import the BPM UI toolkit
- B. Import the BPM Java Toolkit
- C. Add the .jar file that contains the classes
- D. Add the .ear file that contains the classes

Correct Answer: C

QUESTION 2

How can process applications be enabled to create, update, or download ECM documents?

- A. Use an external ECM server instead of the internal IBM BPM document store.
- B. Select '\\Always use this connection information\\' properties of the ECM server definition.
- C. Use the Document List or Document Viewer coach views to create, update, or download the documents.
- D. Add the '\\enable-document-authorization-security-service\\' configuration setting to the 100Custom.xml.

Correct Answer: B

QUESTION 3

Which logging command is used to print log statements to the system out logs?

- A. log.wam(\\\\"info")
- B. log.alert("info")
- C. log.trace("info")
- D. log.statement(\\\\"infor")

Correct Answer: D

QUESTION 4

What would be the first step for a developer asked to replicate functionality from an out-of-the-box IBM BPM Process Portal Dashboard in a new custom coach view?

- A. Retrieve the Process Portal .ear file from the WAS console and inspect the file for the desired functionality.

- B. Copy the existing coach views and functionality in the Process Portal process application that comes with IBM BPM.
- C. Open the Process Portal Dashboard and use the browser's developer tools to inspect and recreate the desired functionality.
- D. Create a new process application, add the BPM UI toolkit dependency, and refer to the BPM UI toolkit controls that were part of the Process Portal Dashboard.

Correct Answer: D

QUESTION 5

Which component is only available in IBM BPM and not in IBM BPM Express?

- A. Process Server
- B. Process Portal
- C. Case Management
- D. IBM BPM messaging engine

Correct Answer: A
