QUESTION 1

Which operating system(s) are supported for the IBM Maximo Asset Management V7.5 installation on the administrative workstation?

A. Windows

B. Windows and AIX

C. Windows and Linux

D. Windows, AIX, and Linux

Correct Answer: A

QUESTION 2

Application Server Security has been enabled in the IBM Maximo Asset Management V7.5 (Maximo) configuration, the EAR file has been rebuilt and redeployed, and Maximo is up and running. Which two additional steps are needed to update the Maximo user data from the directory server?

A. restart the directory server

B. restart the Maximo Java Virtual Machine

C. set LDAPSYNC or VMMSYNC cron to Active

D. Q log in to Maximo to test the LDAP configuration

E. define the required parameters for the LDAPSYNC or VMMSYNC cron job

Correct Answer: BC

QUESTION 3

A user inquires about why a text search is taking so long on some applications\' Long Description fields. Why is this happening?

A. A different operating system is being used which adds overhead to transactions with the application server.

B. The search string is longer than 256 characters which is larger than the text field, and the search is getting cutoff.

C. A leading wildcard character in the text search string is being used which does not allow the use of the full text search catalog.

D. The browser\'s language is different than IBM Maximo Asset Management base language and has characters that are unique to the language set.

Correct Answer: C

QUESTION 4

After installing IBM Maximo Asset Management V7.5 (Maximo), an administrator connects to the database and runs this query:

Select * from maxvars where varname=TMAXUPGT

When the SQL query tool returns an error such as "No object found" or "Table or view does not exist," which statement is true?

A. The Maximo database has been created but Maximo objects have not been installed.

B. Maximo is installed but database privileges have not been granted to the Maximo database or schema owner.

C. The Maximo EAR file must be deployed and the application server must be started before the database can be accessed.

D. The Maximo database has been created but the table that includes the database version must be created and then populated manually.

Correct Answer: A

QUESTION 5

Which statement is true about the generic Java Virtual Machine (JVM) parameter Dsun.rmi .dgc.ackTimeout regarding Remote Method Invocation (RMI)?

A. This parameter must be added only on JVMs that are used for User Interface connections.

B. Use different timeout settings for application servers that have the RMI Registry web application installed.

C. If it is set too high, garbage collection will clear RMI objects out of memory that are still in use. This can create problems with client-side performance.

D. If it is set too high, garbage collection will clear RMI objects too slowly. This can cause problems with database connection counts increasing beyond acceptable limits.

Correct Answer: D

QUESTION 6

At the Database Input screen during the installation of IBM Maximo Asset Management V7.5, which three parameters are available for input for all database types?

A. Database Name

B. Database Port Number

C. Database Schema Name

D. Database Data Tablespace Name

E. Database Index Tablespace Name

F. Database Server Name or IP Address

Correct Answer: ABC

QUESTION 7

Click the Exhibit button.

```
[ERROR] Failed to perform the LdapSyncCronTask. This message will be repeated if the task fails again when the task is run the next time.

....
psdi.security.ldap.LdapSyncException: Failed to retrieve group members.
        at psdi.security.ldap.ads.ActiveDirectorySynchronizer.retrieveGroupMembers(Unknown Source)
        at psdi.security.ldap.ads.ActiveDirectorySynchronizer.retrieveAllGroupMembers(Unknown Source)
        at psdi.security.ldap.AbstractLdapSynchronizer.syncGroups(Unknown Source)
        at psdi.security.ldap.AbstractLdapSynchronizer.performSync(Unknown Source)
        at psdi.security.ldap.LdapSyncTask.performTask(Unknown Source)
        at psdi.security.ldap.LdapSyncCronTask.cronAction(Unknown Source)
        at psdi.server.CronTaskManager$CronThread.run(Unknown Source)
Caused by: psdi.security.ldap.LdapSyncException: Failed to get member account name.
        at psdi.security.ldap.ads.ActiveDirectorySynchronizer.getMemberUserAccountName(Unknown Source)
        ... 7 more
Caused by: javax.naming.NamingException: [LDAP: error code 1 - 000020D6: SvcErr: DSID-031006CC, problem 5012 (DIR_ERROR), data 0
....

This is the distinguished name of the user from MSAD:

user: "CN=Saulman\, Jerry IBM/SWG,OU=Users,OU=TX,OU=ServiceDesk"
```

The Exhibit references log information reveals the LDAPSYNC cron task failed to import a user. Which LDAP user information is described?

A. A common name user with the name "Saulman, Jerry" exists within an organization structure of IBM > SWG > Users > TX > ServiceDesk

B. A common name user with the name "Saulman, Jerry IBM" exists within the organization structure of SWG > Users > TX > ServiceDesk

C. A common name user with the name "Saulman, Jerry" exists within the organization structure of IBM/ SWG > Users > TX > ServiceDesk

D. A common name user with the name "Saulman, Jerry IBM/SWG" exists within an organization structure of Users > TX > ServiceDesk

Correct Answer: D

QUESTION 8

When the product installation program runs an upgrade task, it attempts to use values in the install.properties file and the maximo.propertiesfile. During the upgrade process, if the user name or password for a system is not updated, the installation program uses the credentials in the properties files. If the installation program cannot log in to a system with the credentials found in the properties files, the user is prompted to supply the correct information and updated values are written to the appropriate property file. Which property must always be current before an upgrade operation is attempted?

A. mxe.db.password

B. mxe.db.rmi password

C. mxe.db.AdminPassword

D. mxe.db.RemoteAccessPassword

Correct Answer: A

QUESTION 9

What can cause the IBM Maximo Asset Management V7.5 installation to fail?

A. Simple file sharing is disabled.

B. The Windows firewall is disabled.

C. The database server is inaccessible.

D. The Oracle WebLogic Server is inaccessible.

Correct Answer: C

QUESTION 10

Which security configuration is recommended for a customer who requires the use of centralized authentication services, but whose information technology security team is not set up to handle the requests of application users to be added to/from security role groups for an application?

A. manage authentication using a LDAP capable server and manage group membership using IBM Maximo Asset Management (Maximo)

B. manage authentication and group membership using Maximo

C. manage users and passwords using Maximo and manage groups using a LDAP capable server

D. allow users to be managed using a LDAP capable server and put all security roles into the default user group

Correct Answer: A

QUESTION 11

A user, administrator, is undertaking the installation of a new IBM Maximo Asset Management V7.5 environment on a Windows 2008 Server. The default installation path will be C:\IBM\SMP.

The installation has not been running very long and the user interface indicates that files are being copied when the installer fails. The default log folder has not been created yet. Where is the CTGInstallTraceOO.log located?

A. C:

B. C:\IBM\SMP

C. C:\IBM\SMP\logs

D. C:\Users\adrninistrator

Correct Answer: D

QUESTION 12

What is the correct order of installation for IBM Maximo Asset Management V7.5 (Maximo) products?

A. Maximo V7.5. latest fix pack interim fix. latest fix pack

B. Maximo V7.5, latest fix pack, latest fix pack interim fix

C. Maximo V7.5. latest fix pack interim fix, all industry solutions being implemented

D. Maximo V7.5. all industry solutions being implemented, latest fix pack interim fix

Correct Answer: C

QUESTION 13

Which statement explains how a Java Virtual Machine can have a memory leak despite having garbage collection?

A. Coding errors in Java prevent the garbage collection process.

B. Garbage collection only cleans unused objects without references.

C. Garbage collection is not given a chance to run when memory leaks occur in Java.

D. The heap can contain large numbers of objects that are marked as non-recyclable which can spawn garbage collection-proof objects.

Correct Answer: B

QUESTION 14

Which two Start Center portlet(s) contains SQL that should be carefully examined if Start Center Performance is poor? (Choose two.)

A. KPIs

B. Favorites

C. Result Sets

D. Quick Insert

E. Bulletin Board

Correct Answer: AC

QUESTION 15

While the installer is checking whether the deployment engine needs to be installed or upgraded, a message states that the deployment engine failed to initialize. Another technical colleague has told the administrator that occasionally locked files are left from an installation that was stopped before completion and that the files should be deleted from the log folder. Where does the administrator look?

A. C:\IBM\SMP\logs

B. C:\IBM\SMP\wasclient\logs

C. C:\IBM\SMP\CTG_DE\acsi\logs

D. C:\IBM\SMP\maximo\tools\maximo\log

Correct Answer: D
