QUESTION 1

A change has been made to a business object and form state family and they have been published. The change is not being seen. What should be done?

A. Reboot the server.

B. Reboot the workstation.

C. Log out of the system and log back in.

D. Flush the state data cache in the Administration Console.

Correct Answer: C

QUESTION 2

Which two statements are true about System Geography?

A. There is no impact on data a user can access.

B. It is for reporting purposes only.

C. It is not related to the geography hierarchy.

D. It allows data to be filtered based on the user\\'s geography.

E. It may be combined with System Organization to provide a dual filter of data the user can access.

Correct Answer: DE

QUESTION 3

Records have been created with a field called cstExeptionUsedLI, and some have a value of Days Away From Work. The client has decided they want the list updated with new values and to also remove from the list Days Away From Work.

How does this affect the record?

A. The record\\'s list field will come up blank, the record should be updated again providing a value from the list.

B. The system will not allow the removal of Days Away From Work since there is a record that is using that value.

C. It does not affect the record; the record will continue to use the previous list values, and it can never use the new values for auditing purposes.

D. It does not affect the record; the record will still have Days Away From Work as its list field value, and it can also use the new values in the list.

Correct Answer: D

QUESTION 4

What happens when a related portal section is deleted from the Related Portal Section library?

A. It requires changes in the Security Manager.

B. It permanently deletes the section from the system.

C. It removes the section as an option for users of the particular portal.

D. It stays on the user\\'s portal until the next time the system is restarted.

Correct Answer: B
