**QUESTION 1**

Which hidden view in the Domain Catalog can an administrator use to find which databases are included in the domain index?

- A. \$MultiDbIndex
- B. \$DbCategories
- C. \$DocumentContent
- D. \$DomainRepository

Correct Answer: A

---

**QUESTION 2**

Clive is using an IBM Lotus Notes 7.0 client and needs to access a database that has been saved with the latest ODS revision. Can he do this?

- A. Yes, as long as the file is stored locally.
- B. No, ODS revisions are not backward compatible.
- C. Yes, as long as the file is retrieved via an IBM Domino server and not locally.
- D. Yes, ODS revisions are backward compatible regardless of where the file is retrieved from.

Correct Answer: C

---

**QUESTION 3**

The IBM Domino Configuration Tuner database in the environment contains outdated rulesets. In what way are new rules applied?

- A. The new rules must be manually copied from the Domino server into the existing database.
- B. The new template design is retrieved from the Domino server and applied to the database with the new rules.
- C. The new rules must be manually created for the environment from the descriptors provided by the Domino server.
- D. The Domino Configuration Tuner server task must be stopped, and the existing database must be deleted. Restarting the Domino Configuration Tuner task will build a database with the new rulesets.

Correct Answer: B

---

**QUESTION 4**

Mitchell wishes to disable transaction logging for a particular database on a server with transaction logging enabled.

However, he cannot see the Advanced Database Properties to do so. What is the cause of this?

- A. He is not in the "Administrators" field on the server document.
- B. He cannot selectively turn off transaction logging for individual databases.
- C. Transaction logging can only be disabled per document, not for an entire database.
- D. He must add the notes.ini parameter to the server: DisableTransLog=[name of database].

Correct Answer: A

---

**QUESTION 5**

To find the status of work done by the Administration Process, which database would the administrator check?

- A. Administration Log
- B. Administration Events
- C. Administration Requests
- D. Administration Monitoring

Correct Answer: C

---

**QUESTION 6**

What is the requirement to be able to run the Quality of Service (QoS) feature in IBM Domino 9.0?

- A. The Domino server must have the Event task running.
- B. The Domino server must run under the Java controller.
- C. The Domino server must run under the local system account.
- D. The Domino server must have Domino Domain Monitoring configured.

Correct Answer: B

---

**QUESTION 7**

When an IBM Domino database reports it cannot allocate space, which task can be run against it to repair the database?

- A. Fixup
- B. Updall
- C. Design

D. Compact

Correct Answer: D

---

## QUESTION 8

How can an administrator set the IBM Sametime server for all users?

- A. Using a Setup policy
- B. Using a Desktop policy
- C. Using a Sametime policy
- D. Using a Registration policy

Correct Answer: B

---

## QUESTION 9

What type of directory catalog can be used with Directory Assistance?

- A. Domain Catalog
- B. Personal Address Book
- C. Extended Directory Catalog
- D. Condensed Directory Catalog

Correct Answer: C

---

## QUESTION 10

Which file type must be made available via HTTP to deploy a self-signed SSL certificate to IBM Lotus Notes Traveler users?

- A. .cer
- B. .key
- C. .ssl
- D. .ver

Correct Answer: A

---

## QUESTION 11

Jess created an IBM Lotus Notes Traveler policy setting document. After applying it to users, she found that they are receiving calendar entries outside of the future event range Jess established. Which describes the reason users would have these entries on their devices?

- A. Users always receive all future calendar entries.
- B. Users manually added the entries to the device.
- C. The calendar events are part of a repeating instance.
- D. Users manually issued a synchronization which does not obey the policy settings.

Correct Answer: C

---

**QUESTION 12**

Mark needs to upgrade an IBM Domino server to the latest version. What are the two suggested database maintenance tasks he needs to perform on the server before starting the upgrade? (Choose two.)

- A. ndesign
- B. updall -f names.nsf
- C. ncompact names.nsf -R
- D. ncompact names.nsf -c
- E. fixup names.nsf -f -j -v

Correct Answer: DE

---

**QUESTION 13**

Karl is working at the abc/renovations server console and wants to receive changes from the xyz/renovations server. What command will accomplish this task?

- A. pull xyz/renovations
- B. replicate abc/renovations
- C. tell replica xyz/renovations
- D. push xyz/renovations abc/renovations

Correct Answer: A

---

**QUESTION 14**

Kat is setting up an LDAP client to connect to the IBM Domino LDAP service. Which statement is true about the LDAP service that Kat wants to connect to?

- A. Kat would have to set up Directory Assistance before an LDAP service can be started.
- B. Kat would have to set up a Directory Catalog before an LDAP service can be configured.
- C. The LDAP task is not necessary for Kat to connect to the LDAP service. She should be able to connect to the Domino Directory using an LDAP client.
- D. The LDAP task runs automatically on the administration server for the primary Domino Directory. On other servers in the domain, Kat would have to run the LDAP task manually.

Correct Answer: D

---

## QUESTION 15

How would Miguel encrypt NRPC communication on a server port?

- A. using the IBM Notes Client's User Tools pane
- B. using the IBM Domino Designer's Server Tools pane
- C. using the Domino Administrator's Ports Tools pane
- D. using the Domino Administrator's Security Tools pane

Correct Answer: C
