QUESTION 1

What does setting the expandLevel property of a Navigator control to "0" do when the expandable property is set to "true"?

A. expands all the Navigator control levels

B. expands the first (index 0) Navigator child node

C. makes the Navigator control show only the parent levels

D. prevents the Navigator from displaying a twisty on levels that can be expanded

Correct Answer: C

QUESTION 2

Henry is creating a custom control. When this control is added to the XPage, Henry wants the developer to be able to create and enter a regular expression that will be used inside the custom control to validate data input. How can Henry make it easy for the developer to create and define this regular expression value that will be used in the custom property of the custom control?

A. Use the Regular Expression editor in Eclipse and then copy the code to the XPage.

B. Point the developer who will be using the custom control to a website that has a regular expression tester.

C. Create a Custom Control Property Definition and specify for the editor to use the Regular Expression Picker.

D. The developer can type in the regular expression into the custom property that Henry defined as part of the custom control after it has beenplaced on the XPage.

Correct Answer: C

QUESTION 3

Claire wants to add a field to her XPage to allow users to spell-check the entered text. How should she do this in the simplest manner?

A. Use a 3rd Party editor.

B. Use the inputRichText item.

C. She cannot spell-check a field.

D. Add a Spell Check control to the XPage.

Correct Answer: B

QUESTION 4

Luis is planning on moving his IBM Notes applications to the internet using XPages and removing the Notes client from some of his users. However, until all the applications are converted to XPages, users will still need to access the Notes applications. What can Luis do to provide access to the Notes applications that have not been converted yet for those users who will not have the Notes client?

A. Install the Notes 9.0 Browser Plug-in and allow users to access old applications via a web browser.

B. Enable Web Access on the IBM Domino server.

C. Applications cannot run via the Internet without XPages.

D. Use the IBM XPages Converter Tool to add all required XPages components for the application to run in web browsers.

Correct Answer: A
