QUESTION 1

When is it appropriate to use the Advanced database property "Don't overwrite free space"?

- A. Database performance is not a factor.
- B. The "% used" disk space of a database is less than 50%.
- C. Data security is not an issue -- for example, in an informal discussion database.
- D. The data is already secure -- for example, the database is on a server in a locked room.

Correct Answer: D

QUESTION 2

Which statement describes the embedded navigators?

- A. Embedded navigators are not supported in a page.
- B. Embedded navigators are not supported in subforms.
- C. Embedded navigators are not supported in a browser.
- D. Embedded navigators are not supported in the IBM Notes Basic client.

Correct Answer: D

QUESTION 3

What does the com.ibm.notes.branding/enable.update.ui=true enable?

- A. personalization of the mail client
- B. the Eclipse update manager (EUM)
- C. personalizations (branding) of the IBM Notes client
- D. personalizations in the Notes client to be updated automatically

Correct Answer: B

QUESTION 4

In which file are XPages application runtime configuration settings saved?

- A. notes.ini
- B. jsf.properties
- C. xsp.properties
- D. application.properties

Correct Answer: C

QUESTION 5

Simon has been asked to create an agent that will return a list of all of the attachments in an IBM Notes document.

Which method or property of the NotesRichTextNavigator or NotesRichTextItem class will Simon use to complete the task?

- A. EmbeddedObjects property of NotesRichTextItem
- B. GetEmbeddedObjects method of NotesRichTextItem
- C. EmbeddedObjects property of NotesRichTextNavigator
- D. GetEmbeddedObjects method of NotesRichTextNavigator

Correct Answer: A

QUESTION 6

Lee has a form with an Authors field on it. That field is computed and its value is "Users". When a document is created with the form, what effect does the field have on that document?

- A. The Users group will be listed in the CreatedBy field.
- B. Only members of the Users group will be able to modify the document.
- C. Only members of the Users group will be able to replicate or copy the document.
- D. There will be no effect if the members of the Users group have higher than Author level access to the database.

Correct Answer: D

QUESTION 7

Which three field types allow multiple values? (Choose three.)

- A. Text
- B. Listbox
- C. Rich Text
- D. Checkbox
- E. Combobox
- F. Radio Button

Correct Answer: ABD

QUESTION 8

If a document is created with a form containing a Text field that has the "Allow multiple values" property set and multiple values are entered into the field, how are those values stored within the document?

- A. They are stored as a text list.
- B. They are stored as a CD records.
- C. They are stored as delimited items.
- D. They are stored as a delimited string.

Correct Answer: A

QUESTION 9

John has a database that replicates across two servers with documents that are created and updated regularly on each server.

Which two document ID components will always return the same value for a given document across both replicas of the database? (Choose two.)

- A. UNID
- B. NoteID
- C. Serial Number
- D. Sequence Number
- E. Database Replica ID

Correct Answer: AE

QUESTION 10

Ian is creating a database with document encryption.

Where are document encryption keys stored?

- A. on each document
- B. within the keys.properties file
- C. within the database header note
- D. within each user ID file that has access

Correct Answer: D

QUESTION 11

Which statement is correct when using a theme in an XPage application?

- A. Themes are restricted to using CSS styles.
- B. Themes can be used in any CSS style sheet.
- C. Themes allow the designer to set and control any XML property.
- D. Themes are a standard XML design element and can be used in any HTML application including XPages.

Correct Answer: C

QUESTION 12

Which fields are available for programmatic access on a response document when it is initially created?

- A. fields from the parent view
- B. fields from the parent document
- C. fields from the parent database properties
- D. only fields from the parent document designated with an inheritance property

Correct Answer: B

QUESTION 13

Why would a developer create a role?

- A. to prevent users from creating folders and views on a server
- B. to select an access level for each person, group, and server
- C. to assign special access to database design elements and database functions
- D. to allow users to replicate or copy the database, or documents from the database

Correct Answer: C

QUESTION 14

Mary is the IBM Domino administrator and needs to deploy an agent she has written. Mary's agent reads and writes data directly to the file system, is scheduled to run on server daily, and is signed by Mary's IBM Notes ID. What does Mary need to update to ensure the agent runs correctly?

- A. the agent Security setting "Runtime Security Level" to "2. Allow restricted operations"
- B. the Execution Control List (ECL) on each workstation to trust Mary's hierarchical name
- C. the access control list of the database hosting the agent to include her hierarchical name as Manager
- D. the Server document field "Sign or run unrestricted methods and operations" with Mary's hierarchical name

Correct Answer: D

QUESTION 15

Which two options are required when developing a server-side agent which connects to IBM DB2 via JDBC? (Choose two.)

- A. The IBM Domino database must be ODS 51.
- B. The IBM Notes application must be an NSFDB2 database.
- C. The JDBC class must be defined in the agent via the include call.
- D. The JDBC class must be defined via the IMPORT Java function prior to use.
- E. The JDBC driver JAR file must be imported into the Notes database or available in the JavaUserClasses notes.ini.

Correct Answer: CE
