QUESTION 1

Rudy wants to delete a portal page by using the Controller service provider interface (SPI).

He wrote the following code:

```
final Locator locator = cmController.getLocator(); final ContentPage page = (ContentPage)
locator.findByUniqueName("MyPage");
```

```
cmcontroller.delete(page);
```

How can he use this code to delete the page?

- A. This code alone will delete the page.
- B. There is not a delete method so this code is not valid.
- C. He needs to find the page by URL instead of UniqueName.
- D. He needs to commit the controller to persist the modification.

Correct Answer: A

QUESTION 2

Which statement is true regarding JSR 286 event support in IBM WebSphere Portal?

- A. Events can be wired to IBM API cooperative portlets.
- B. Events can be wired to JSR 168 cooperative portlets.
- C. Events cannot be used in tandem with public render parameters.
- D. When the "Global" check box is set on the wires page. JSR 286 event processing is automatic; wires are not needed and. therefore, are ignored.

Correct Answer: B

Interoperability between JSR 286 portlet events and JSR 168 cooperative portlets By concept, cooperative portlets are similar to JSR 286 portlet events. Both concepts describe publish/subscribe communication patterns that are based on typed information that is published and received by portlets and propagated via communication links.

Because the concepts are quite similar, the portal supports data exchange between JSR 168 cooperative portlets and JSR 286 portlets that support events. This means that you can extend an existing setup using JSR 168 cooperative portlets with new JSR 286 portlets and that you can smoothly migrate individual cooperative portlets to the new API without losing communication possibilities.

QUESTION 3

When developing with IBM Web Sphere Portal 8.5 themes, which parameter for the r:datasource tag will help speed up development by requiring fewer server restarts?

- A. max-age
- B. theme-uri
- C. reloadInterval
- D. reloadingEnabled

Correct Answer: D

Explanation: DB2 data source, automatic client reroute enabled, restart admin

QUESTION 4

Which folders are two of the root folders in the fs-type1 WebDAV entry point? (Choose two.)

- A. skins
- B. layout
- C. resources
- D. layout-templates
- E. theme-templates

Correct Answer: AD

older structure and reserved folder names The fs-type1 WebDAV entry points provide the following set of predefined root folders used by themes: themes skins layout-templates common-resources iwidgets

QUESTION 5

Isabel wants to display different content automatically to users, depending on their group access. Which IBM WebSphere Portal feature should Isabel use to configure this objective?

- A. dynamic UI
- B. preferences
- C. customization
- D. personalization

Correct Answer: D

SyncML DM is based on the SyncML protocol and is designed to enable the customizing, personalization, and servicing of mobile device, taking into account the same limitations as SyncML DS does for mobile environments.

QUESTION 6

Which two statements are true about inter-portlet communication in the Web Dock portlet? (Choose two.)

- A. Client-side communication uses Dojo events.
- B. Client-side communication is built on OpenAjax.
- C. The Web Dock portlet does not support portlet wires.
- D. Server-side communication is based on JSR 286 events.
- E. The Web Dock portlet supports only public render parameters.

Correct Answer: CD

QUESTION 7

Which is true about the Cache Manager Service resource environment provider in IBM WebSphere Portal?

- A. It can be used to manage the cache scope of a portlet.
- B. It can be used to manage different caches used by WebSphere Portal.
- C. It can be used to define the cache mechanism of a WebSphere Portal page.
- D. It can be used to define the cache strategy of the WebSphere Portal's theme.

Correct Answer: B

Cache Manager Service

The portal Cache Manager Service is responsible for managing the different caches used in WebSphere Portal Express.

QUESTION 8

Which statement is true regarding the relative width of the wpthemeCol2of 5 CSS class?

- A. It cannot be used in a custom layout.
- B. It is a semantic type relative-width class.
- C. It is a CSS class for a column that takes two-fifths of the width of the page.
- D. It is a CSS class for the second column on a page that consists of five columns.

Correct Answer: A

QUESTION 9

John, an IBM WebSphere Portal developer, is writing a portlet to help support specialists with reproducing users' issues. Which WebSphere Portal feature can John use to run his task?

- A. Personalization
- B. People Awareness
- C. User Impersonation
- D. User and Groups Management

Correct Answer: C

While impersonating the user use the "My Sites" menu in the dockbar to go to any of his sites Result: The impersonation is lost, the site is accessed as the administrator user
