A. File Upload

B. Image Upload

C. File Download

D. Image Download

Correct Answer: C

QUESTION 7

John wants to use Themes to help him define controls properties. He wants to use the OneUI theme but also extend it to be able to manage a different style for some buttons. How can he override the global theme properties for some of his buttons?

A. You cannot override any property of a specific control.

B. He has to change the Style attribute of his button.

C. He needs to specify one theme file.

D. He can use the option for the concerned controls.

Correct Answer: D

QUESTION 8

Steve wants to add a style sheet to his Web application. What does he need to do to accomplish this?

A. Build the style sheet with one of the numerous available CSS editors, and import it into an XPage.

B. From the Application Navigator in Lotus Domino Designer, expand Resources and double-click Style-Sheets. From the buttons, select "New Style-Sheet" and build it by using the built-in CSS editor.

C. He cannot; Web applications in Lotus Domino cannot use style sheets.

D. From the application navigator in Lotus Domino Designer, double-click Pages. Click the "New Page" button, and build your style sheet as apage. Then open your XPage and import the page with the style sheet.

Correct Answer: B

QUESTION 9

Sean is trying to use an XPage application, and he needs to fill some fields located in the XPage. Even if he clicks the edit button located at the bottom of the page, the XPage is not switched into edit mode.

What can be the cause of this behavior?

A. The rights assigned to Sean are Author rather than Editor.

B. The OnClick Event of the button does not have "Edit" associated with "Change Document Mode" in the "Document Mode" field.

C. The OnClick Event of the button does not have "Auto Edit" associated with "Change Document Mode" in the "Document Mode" field.

D. Sean needs to access the XPage application as "Manager" set in the ACL of the database, which is the only user-level right that allows theediting of documents.

Correct Answer: B

QUESTION 10

Henry wants to display responses in an XPage. Which best describes what he has to do?

A. Nothing; you cannot display any response document in XPages.

B. Important coding has to be done for that to run in XPages; no control exists.

C. A repeat container in a custom control is needed.

D. A repeat container in a custom control and a server-side JavaScript iteration are needed.

Correct Answer: D

QUESTION 11

Odette is designing the index XPage that is used for navigation for her Domino application. For what purpose might Odette use the Outline view in Domino Designer in Eclipse while working with the index XPage?

A. To drag elements to rearrange sections and change the sequence of elements on the XPage.

B. To drag controls from the controls palette onto a hierarchical representation of the XML source code, typically during the initial design of the XPage.

C. Aside from the expand and collapse icons, nothing in an Outline view is clickable. Nonetheless, the Outline view provides an extremely usefulmeans to browse the XML elements of an XPage.

D. The Outline view provides a hierarchical representation of the XML source code in XPages. The developer can quickly update varioussettings from within the Outline view using right-click menu options for each element.

Correct Answer: A

QUESTION 12

Nathan is adding the ability to upload files to his XPages application. What can he do to have the files placed in a particular rich text field.

A. In the Properties view, on the Data tab, select Simple Data Binding and specify a Domino document data source and bind to the specific richtext field.

B. In the Properties view, on the All Properties tab, under Basics, select the fieldName property and specify a Domino document data sourceand bind to the specific rich text field.

C. In the Properties view, on the File Upload tab, under Options, select the Add File to Field option and specify a Domino document data sourceand bind to the specific rich text field.

D. The file is uploaded as a V2Attachment and stored outside of the fields. To add it to a particular rich text field, Nathan can write an agent tosave the file to the operating system and reattach using the NotesRichTextItem classes.

Correct Answer: A

QUESTION 13

Renee is developing the Product Support Contact XPage. When a product manager enters the name of a support technician, the page is submitted and a lookup is done to try and populate the technician\\'s e-mail address and phone number on the XPage. If there is no e-mail or phone number found, then messages should display to inform the product manager that the E-mail and Phone fields must be entered. On the XPages tab in the Application properties, the Client Validation check box is unchecked.

What steps can Renee take to provide the needed validation messages on the XPage?

A. Drag a Display Errors control from the core controls palette onto the XPage.

B. Drag a Server Validation control from the core controls palette onto the XPage and select the names of the fields needing validation.

C. On the XPages tab in the Application properties, click to select Client Validation. Drag a Display Errors control from the core controls paletteonto the XPage.

D. On the XPages tab in the Application properties, click to select Server-side Validation. Drag a Display Errors control from the core controlspalette onto the XPage.

Correct Answer: A

QUESTION 14

Jane has a view that she will display on several XPages using a custom control. How can she add the view to the custom control?

A. From the Create Menu, select Core Controls -> View

B. Drag a view container from the Data Palette to her custom control

C. Drag a view container from the Controls Palette to her custom control

D. Define a view data source based on the view and drag it from the Data Palette to the XPage

Correct Answer: C

QUESTION 15

Lenni added a style sheet to an XPage using a URL link. The style sheet contains a class to format text to be red and bold. She applied the class to a label control; however, when she previews the XPage in a web browser, the label text is bold but the font is black.

Which of the following could be causing the label font to be black?

A. A color style cannot be applied to label text.

B. Black is selected in the font color properties of the label.

C. The style sheet must be imported into the XPage application.

D. The style applied to the table cell where the label resides is overriding the label style.

Correct Answer: B
