**QUESTION 1**

Your developers have designed an application that acts as an authority for an agent password reset application. Which of the following is the minimum rights that must be assigned and to whom?

- A. The server document of each authorized server must give the end user "Run restrictedLotusScript/ Java agents"
- B. The server document of each authorized server must give the agent server "Run unrestrictedJava/ JavaScript/COM"
- C. The server document of each authorized server must give the administrator "Sign agents to run on behalf of someone else"
- D. The server document of each authorized server must give the agent signer "Sign or run restricted LotusScript/Java agents"

Correct Answer: D

---

**QUESTION 2**

You are in the process of upgrading your Domino environment to version 8.5 and have implemented the ID vault on one of the servers as well as some of the deployed clients. The clients are attempting to upload their ID files to the vault on home servers that are not version 8.5 yet. Which of the following will the client experience next?

- A. The Notes client presents an error that an ID vault is not available on the home server
- B. The Notes client asks its home server for a list of servers that have a replica of the vault
- C. The Notes client does NOT present an error but will not be able to upload the ID file to a vault
- D. The Notes client will generate a notification to the ID vault managers notifying them of the failed attempt

Correct Answer: B

---

**QUESTION 3**

Mike has implemented Lotus Traveler for his mobile users. The users have requested the ability to read and send encrypted mail. Which of the following are required for this request to be available?

- A. Users must mail themselves a copy of their Notes ID files
- B. Users must upload their Notes ID files to their mail database
- C. Users must upload their Notes ID files to their personal address book
- D. Users must attach their Notes ID files to a draft email message in their mail database

Correct Answer: B

---

**QUESTION 4**

An attempt was made by the Domino administrator to delete the ID vault on the Domino server. The vault was currently in use so the deletion was halted. Which of the following server commands will attempt to process the deletion again?

- A. show idvaults
- B. tell idvault process delete
- C. load idvault update -remove
- D. tell idvault delete

Correct Answer: A

---

**QUESTION 5**

Sam has been directed to create dynamic policies to set certain desktop settings depending on to which group a user belongs. What does Sam need to do in order to accomplish this task?

- A. Sam needs to create the policy and assign the policy to the corresponding group.
- B. Sam would create the policies and assign the policies based on the home server for each user.
- C. Sam needs Editor access to the Domino Directory and the PolicyCreator role to create the policy. Sam would then create the policy and assign groups to the policy.
- D. Sam needs Editor access to the Domino Directory, and the PolicyCreator and PolicyModifier roles to create the policy. Sam would then create the policy and assign groups to the policy.

Correct Answer: C

---

**QUESTION 6**

Domino roaming for the Notes standard configuration clients in Domino 8.5 and later offers the ability to synchronize which of the following?

- A. A notebook database and autosave database
- B. The user ID file and local Eclipse XML configuration files
- C. A feeds subscription database and an Eclipse plug-in data and preferences database
- D. The Activities plug-in configuration and the integrated Sametime Connect configurations

Correct Answer: C

---

**QUESTION 7**

How does custom Java code and standard Java API libraries differ from Signed Agents when executing in a Notes client?

- A. There is no difference. The signer of the XPage application will be checked against the ECL of the local workstation.

B. The permissions of the XPage application signer are checked against the Java Security Manager FCL to determine if the signer has permission to perform the operation.

C. When the code is executed the Java Security Manager passes a permission check to the Notes Client ECL to see if the XPage application signer has permission to perform the operation.

D. Custom Java code and standard Java API libraries are not bound by the local ECL like Signed Agents are. The runtime permissions are based on the XPage ECL which is contained in the XPage application.

Correct Answer: C

---

### QUESTION 8

In Lotus Notes 8.5, the start-up sequence has been reordered for users. Presume that the following notes.ini entry is configured: ENABLE\_EARLY\_AUTHENTICATION=0

Which of the following occurs to the user experience?

A. Users are not allowed to utilize Windows shared login

B. Users are prompted to authenticate before the Notes workbench

C. The Notes workbench appears, and users are prompted to authenticate

D. Users are forced to utilize Windows shared login instead of Notes login

Correct Answer: C

---

### QUESTION 9

Domino Attachment and Object Service is supported on each of the following, EXCEPT?

A. Mailbox databases

B. DB2 enabled databases

C. Non-mail file databases

D. Domino servers hosted on an operating system in a virtual environment

Correct Answer: B

---

### QUESTION 10

Mailbox event notification is also a router optimization, and it means when the router in Domino is running in a steady state and a new message is deposited in MAIL.BQX, a copy of the message is made and placed on a mailbox event queue which is then used by a new MailEvent thread in the router. The router can use the copy of the message for what purpose?

A. Makes extra copies of the note for delivery to multiple recipients.

- B. Discover new messages or transfer notes without fully opening them for delivery.
- C. Discovers new messages, but requires a search of MAILBOX and a full note open to deliver the message.
- D. Delivers new messages without a full note open, but requires a search of MAILBOX in order to discover new messages.

Correct Answer: B

---

**QUESTION 11**

By default, in which of the following ways is the DAOS storage encrypted?

- A. No encryption is applied
- B. Medium encryption by the server ID file
- C. Strong encryption by the server ID file
- D. Medium encryption for each user linked to an attachment

Correct Answer: A

---

**QUESTION 12**

You completed the process of upgrading your Domino server, and you are in the process of enabling DAOS for your user mail files. When can you enable the DAOS feature for mail files that will not be upgraded until a later date?

- A. Immediately
- B. After the mail file upgrade
- C. When users approve the mail file upgrade
- D. After running the required compact task

Correct Answer: A

---

**QUESTION 13**

Which version of Domino is the earliest version of Domino that DOT (Domino Configuration Tuner) can be run on to evaluate settings?

- A. Domino 7.0.0
- B. Domino 8.0.0
- C. Domino 8.5.0

D. Domino 6.5.0

Correct Answer: A

---

## QUESTION 14

Your development team has modified the client download site for Lotus Traveler. All of the changes, though, are not being seen as the server is still pointing to the old directory and files. You have successfully modified the Home URL in the Internet Site Document. Which of the following must also be modified?

- A. The servlet utilized by the Domino Web server
- B. The NTS\_WEBSITE\_HOME parameter in the notes.ini file
- C. Disable Internet Site documents in the Domino server
- D. Make TCP port 8642 available to all users to see the new site documents

Correct Answer: B

---

## QUESTION 15

Users in your organization utilize Lotus Traveler for their mobile devices. They are successfully able to search for user names and telephone numbers. What is the default number of returned results in their searches?

- A. 10
- B. 25
- C. 50
- D. 100

Correct Answer: B
