QUESTION 1

Stefan would like to add a custom control to the department's order processing XPage application that displays the approval routing status. He wants the custom control to only display to certain users. How can Stefan accomplish this task?

- A. From the custom control, select the Properties view and click the All Properties tab. Expand the data > acl > entries > aclEntry[0] property. Add an entry for the person or group that you want to give access to.
- B. From the Xpage, select the Properties view and click the All Properties tab. Expand the data > acl > entries > aclEntry[0] property. Add an entry for the person or group that you want to give access to.
- C. From the custom control, select the Security view and click the All Properties tab. Expand the data > acl > entries > aclEntry[0] property. Add an entry for the person or group that you want to give access to.
- D. From the Xpage, select the Security view and click the All Properties tab. Expand the data > acl > entries > aclEntry[0] property. Add an entry for the person or group that you want to give access to.}w selected below is selected and also make sure that Outline is selected.

Correct Answer: A

QUESTION 2

Ida has developed the needed functionality in the Customers XPage of her application. The Web design team has provided her with the internal.css stylesheet. After Ida imports the stylesheet to her application, how can she add the stylesheet to the XPage?

- A. Open the XPage in Lotus Domino Designer. From the Style tab of the Properties view, click "Add style sheet to page" and select internal.css.
- B. Open the XPage in Lotus Domino Designer. Right-click an open area of the XPage and open the Properties window. Select internal.css for the Style Sheet option.
- C. From the Applications view, select Resources > Style Sheets > internal.css. From the Wiring tab of the Properties view, click "Add" and select XPage > Customers.
- D. From the Applications view, double-click to open the internal.css style sheet. From the Associations tab of the Properties view, click "Add association" and select XPage > Customers.

Correct Answer: A

QUESTION 3

Jackson is using the FTSearch method of the NotesDatabase class to return a NotesDocumentCollection. Jackson notices that the NotesDocumentCollection does not contain all the documents that he would expect. What would cause this issue?

- A. Jackson did not set the MaxDocs parameter on the FTSearch method to All to return all valid documents.
- B. Jackson did not set the MaxDocs parameter on the FTSearch method to 0 to return all valid documents.

- C. The maximum number of documents returned by FTSearch is 5,000 documents.
- D. The maximum number of documents returned by FTSearch is 2,000 documents.

Correct Answer: C

QUESTION 4

Melissa is modifying her Lotus Notes application to use XPages and wants to reuse the forms that they have already, because there are lots of validations done on the fields. How can she use the existing form logic in the XPage?

- A. There is no need to worry because the form logic that is already in the form is automatically used anyway, because the XPage is bound to the form.
- B. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load or on document save only.
- C. There is no way to reuse that form logic that is already in the form, so it must all be rewritten into the XPage.
- D. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load, on document save, or both.

Correct Answer: D

QUESTION 5

Dierdre is periodically asked to update the Readers field in documents created with the SalesOrder form. If a person's name changes, they are no longer able to access documents they'd been able to access in the past. Dierdre would like the Readers fields to be automatically updated when someone's name has been changed in the Domino directory. How can she do this?

- A. Open the Security tab of the SalesOrder Form properties. Place a checkmark next to "Enable adminp updates".
- B. Open the Advanced tab of the database ACL. In the selection list for Action, choose "Modify all Readers and Authors fields".
- C. Open the Security tab of the Database properties. In the selection list for Administration Actions, choose "Update all Readers and Authors fields".
- D. Ask a Notes Administrator to enable "Maintain Reader/Author field consistency" on the Security tab of the server document for her application server.

Correct Answer: B

QUESTION 6

DJ is developing his first Lotus Domino application. He wants to show a particular set of data to unauthenticated users and provide additional data to authenticated users. Which of the following can DJ use to determine whether the user is authenticated or not?

- A. @WebName to get the current user's name

- B. @UserName, which returns "Anonymous" for unauthenticated users
- C. @IsAuthenticated to determine if the user is authenticated or not
- D. @WebUserName, which returns an empty string ("") when a user is not authenticated

Correct Answer: B

QUESTION 7

Martha has a Submit button on her Timesheet XPage. When clicked, the button uses the Save Document simple action to save the data to the underlying document. What parameters does Martha have to provide to the Save Document simple action?

- A. none
- B. pageName, mergeConflicts
- C. forceSave, createResponse
- D. documentName, saveImmediate

Correct Answer: A

QUESTION 8

Which of the following statements describes the function of SSL?

- A. SSL encrypts the database ahead of transmission by using a SOCKS proxy.
- B. SSL encrypts the database by creating a certificate authority as a key ring.
- C. SSL encrypts the transmission of HTTP by using the user's ID as an encryption key
- D. SSL encrypts the transmission of HTTP by using a registered certificate as an encryption key.

Correct Answer: D

QUESTION 9

The DiscussionTopics XPage includes a button to take users to the Feedback XPage. Ted has created the Feedback XPage. He now wants to add a Save and close button that saves the user's input, and take the user back to the DiscussionTopics XPage. What is one way that he can do this task?

- A. Drag a new Button control onto the XPage canvas. Set the button type to Submit. For the onclick event, add the following server-side JavaScript: Feedback.save();
- B. Drag a new Button control onto the XPage canvas. Set the button type to Submit. For the onclick event, add the following server-side JavaScript: Feedback.save(); context.getUrl("../");
- C. Drag a new Button control onto the XPage canvas. Leave the button type as Button. For the onclick event, add a

simple action selecting Save Document. Specify DiscussionTopics as the argument.

D. Drag a new Button control onto the XPage canvas. Leave the button type as Button. For the onclick event, add a simple action selecting Save Data Sources. Specify DiscussionTopics as the argument.

Correct Answer: D

QUESTION 10

Jason has entered the group salesforce to the ACL of all of his XPages in the new CRM application. He gave this group Editor rights. Unfortunately, none of the group members are able to access the application. What could be the reason for it?

A. There is no entry for the salesforce group in the Application ACL.

B. Jason needs to go to the Application properties, select the XPages tab and activate Allow ACL in XPages.

C. When Jason saved the XPages design element, there was an error ACL Entry not found message. He forgot to correct this problem.

D. ACL in XPages are a feature, that will be supported only in a future version of Lotus Domino. The property is there, so that people are able to prepare their applications for the future.

Correct Answer: A

QUESTION 11

Marcel puts an XPage together, which is used for registration of users. He plans to use three different buttons: Newsletter, Forum, or Cancel. Each button should load a different next page. How can this task be accomplished?

A. Using the Open Next Page Simple action, simply select each button for the next page.

B. There is no way to accomplish this task. After pressing any submit button an XPages application always returns to the home page.

C. For each button, define server-side JavaScript that returns the name of the page to be loaded. Define a navigation rule in the XPagesproperties for each value.

D. To achieve this task, you have to write your own Java servlet and install it to all the servers and clients, so that your application can run. Then you can trigger your servlet to produce the page for each button.

Correct Answer: C

QUESTION 12

Dudley is looking to improve the performance on an XPages application he built for the marketing department. This application is not used by a large amount of users at one time. Which server page persistence setting would work best in this scenario?

A. Server default

- B. Keep pages on disk
- C. Keep pages in memory
- D. Keep only the current page on disk

Correct Answer: C

QUESTION 13

XPages are Ajax-enabled. Which option best describes what that statement means?

- A. With Ajax, XPages can provide type-ahead.
- B. With Ajax, XPages can be partially refreshed instead of reloaded completely for each change.
- C. Ajax allows for lazy loading of content and code.
- D. All of the above.

Correct Answer: D

QUESTION 14

Earl is working with the global view object available within JavaScript in XPages. With what kind of view is he working?

- A. A JSF view
- B. A Notes view
- C. A Domino view
- D. An Eclipse view

Correct Answer: A

QUESTION 15

With server-to-server replication, what is the minimal access level, that a server must have to an application to replicate not only documents, but also design elements?

- A. Reader
- B. Designer
- C. Manager
- D. Servers always replicate any document independent of their access rights.
