QUESTION 1

When installing and configuring a standby Content Manager, what must the administrator do to ensure failover?

- A. Configure the content store to know the location of all standby Content Managers.
- B. Install the first standby Content Manager on the machine with the highest processor speed.
- C. Ensure that services are started on the machines hosting the standby Content Managers before they are started on the machine hosting the default active Content Manager.
- D. Configure authentication providers the same way on all machines hosting Content Managers.

Correct Answer: D

QUESTION 2

Computer 1 is set up as a gateway. Computer 2 is set up as a report server. Computer 3 is set up as a report server. Computer 4 is set up as a content manager. When configuring, why must the administrator configure and start services for the machine hosting the content manager first?

- A. To ensure that the Gateway URI property is specified on the content manager computer before the dispatcher is configured and services started.
- B. To ensure that the certificate authority service is available to issue certificates to other computers in the distributed installation.
- C. To ensure that the BI server can connect to the underlying reporting data sources.
- D. To ensure that the Dispatcher URIs for gateway property is specified on the content manager computer before the dispatcher is configured and services started.

Correct Answer: B

QUESTION 3

When a namespace is no longer used for authentication, what must the administrator do to permanently remove it from the content store?

- A. Delete the namespace in IBM Cognos Administration, and then delete it in Cognos Configuration.
- B. Delete the namespace in IBM Cognos Configuration only.
- C. Delete the namespace in IBM Cognos Configuration, and then delete it in IBM Cognos Administration.
- D. Delete the namespace in IBM Cognos Administration only.

Correct Answer: C

QUESTION 4

When creating the following IBM Cognos BI data sources, which one requires specifying a local path or a network path?

- A. IBM Cognos TM1
- B. IBM Cognos PowerCube
- C. IBM Cognos Now! - Real-time Monitoring Cube
- D. SAP BW

Correct Answer: B

QUESTION 5

What is one of the purposes of Tomcat in the IBM Cognos BI environment?

- A. Acts as a Java servlet container for the report and batch report services.
- B. Monitors the dispatcher and all user requests are lost upon failure.
- C. Monitors the IBM Cognos BI service and restarts the service upon failure.
- D. Acts as a Java servlet container for the presentation service.

Correct Answer: A

QUESTION 6

What is true about servlets and services?

- A. The Content Manager and dispatcher servlets run within the Java servlet container configured for IBM Cognos BI.
- B. If a service fails, users get email notification.
- C. The report service and batch report service run within the Java servlet container.
- D. The report service and batch report service are Java-based applications.

Correct Answer: A

QUESTION 7
