QUESTION 1

To be able to access and modify any object within the portal, regardless of any security policies set for the object, the administrator must be a member of which built-in role?

- A. Server Administrators
- B. Report Administrators
- C. System Administrators
- D. Directory Administrators

Correct Answer: C

QUESTION 2

Computer 1 is set up as a gateway. Computer 2 is set up as a report server. Computer 3 is set up as a report server and a failover content manager. Computer 4 is set up as the default content manager. Where does the administrator need to disable anonymous access?

- A. Computers 1, 2, and 3 only
- B. Computers 3 and 4 only
- C. Computers 2 and 3 only
- D. Computer 4 only

Correct Answer: B

QUESTION 3

When the default active Content Manager fails, which of the following occurs?

- A. The system automatically activates all standby Content Managers, and spreads the load of requests based on the Weighted Round Robin load balancing mode.
- B. The system automatically activates all standby Content Managers and spreads the load of requests across them all.
- C. The system automatically switches to a standby Content Manager, and requests are directed to it.
- D. Users are prompted to rerun failed requests on the initial Content Manager once it is back on line.

Correct Answer: C

There are 2 load balanced report servers.

The dispatcher on Computer X has the following characteristics:

RAM: 1024 MB
CPU: Dual P4 1.5 Ghz
Hard drive: 80 GB

The dispatcher on Computer Y has the following characteristics:

RAM: 2048 MB
CPU: Dual P4 3.8 Ghz
Hard drive: 80 GB

What would an administrator set the processing capacity on Computer Y to?

- A. 1
 - B. 2
 - C. 4
 - D. 8
-

QUESTION 4

What is one of the purposes of Tomcat in the IBM Cognos BI environment?

- A. Acts as a Java servlet container for the report and batch report services.
- B. Monitors the dispatcher and all user requests are lost upon failure.
- C. Monitors the IBM Cognos BI service and restarts the service upon failure.
- D. Acts as a Java servlet container for the presentation service.

Correct Answer: A

QUESTION 5

When monitoring the status of services in IBM Cognos Administration, which services are listed?

- A. Only services that are running and stopped
- B. Only services that are running
- C. Only services that are enabled in IBM Cognos Connection
- D. Only services that are enabled in IBM Cognos Configuration

Correct Answer: D

QUESTION 6

What must the administrator do to set up the sample audit reports that come with IBM Cognos BI?

- A. Create a separate data source connection to the content store.
- B. Set up an audit database and configure log messages to be sent to the database.
- C. Set up a log file and configure log messages to be sent to the file.
- D. Create a Framework Manager model using either a database or flat file as the data source, and then publish a package.

Correct Answer: D

QUESTION 7

What is a recommendation for tuning during high interaction request processing?

- A. Set the number of jobs lower during peak hours.
- B. Set the number of jobs higher during peak hours.
- C. Increase the processing capacity on the dispatcher.
- D. Increase the peak period hours.

Correct Answer: A

QUESTION 8

Why would an administrator want to copy a user profile?

- A. The user was deleted using a third-party authentication provider.
- B. The administrator wants to copy trusted credentials for multiple users.
- C. The user has changed names and the administrator is setting up an account in the new name.
- D. The user requires enhanced security permissions before logging on to IBM Cognos BI for the first time.

Correct Answer: D

QUESTION 9

An administrator wants to show the folder hierarchy of IBM Cognos Connection in a portlet. Which portlet must the administrator use?

- A. IBM Cognos Viewer

- B. IBM Cognos Search
- C. IBM Cognos Navigator
- D. IBM Cognos Extended Applications

Correct Answer: C

QUESTION 10

A user wants to be able to view the contents of a container entry, such as a package or a folder, and view general properties of the container itself without having full access to the content. Which permission does the administrator assign to the user?

- A. Read
- B. Write
- C. Traverse
- D. Set Policy

Correct Answer: C
