**QUESTION 1**

A customer has decided to modernize one of its main z/OS applications by using web technologies such as J2EE. Customer's cost studies indicate the only affordable platforms are based on distributed servers. What would be your best strategy to protect and grow System z?

- A. Create an offer based on Linux for System z for Application Development, System z Solution Edition for WebSphere and System z Solution Edition for Enterprise Management.
- B. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Application Development, System z Solution Edition for WebSphere and additional management tools, as needed.
- C. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Cloud Computing, adding development tools, WebSphere Application Server and additional management tools, if needed.
- D. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Linux, System z Solution Edition for Application Development, System z Solution Edition for WebSphere and System z Solution Edition for Enterprise Management.

Correct Answer: B

---

**QUESTION 2**

A System z FTSS needs POWER blades configured for a zBX.

Which of the following procedures should be used for this configuration?

- A. The z FTSS configures all components for the zBX using zManager configuration tool
- B. The z FTSS should provide the POWER blade requirements to the POWER team
- C. POWER team should configure the blade type normally acquired by the customer for a BladeCenter
- D. The customer should configure through the IBM Workload Estimator

Correct Answer: B

---

**QUESTION 3**

A post installation support plan must be in place after the sale of the System z. Which of the following is the best way to do this?

- A. Discuss typical problem resolution with the customer technical staff
- B. Create a formal Customer Support Plan document and review it with the customer for agreement
- C. The hardware SSR/CE is responsible for the post install support plan, the technical specialist should ensure this is

complete

D. The technical specialist should create a list of help desk phone numbers and hardware dispatch contacts to review with the customer

Correct Answer: B

---

#### **QUESTION 4**

A System z customer is planning to move their data center with several existing System z servers to a new space without a raised floor. Which of the following requirements should the technical specialist discuss with the customer?

- A. Ordering the height reduction feature if needed
- B. Top Exit Cabling Option is required for all the CPCs
- C. Confirm all the System z servers are z9 BC, z10 BC or z114
- D. Confirm the new installation is compliant with the Installation Manual for Physical Plugging

Correct Answer: C

---

#### **QUESTION 5**

A new customer has approached a System z Technical Specialist to help them upgrade their older System z mainframe. Growth is minimal. Which of the following is needed to create an initial z114 configuration?

- A. Energy consumption
- B. Disk Storage Growth Rates
- C. Installed Base System Report
- D. The number of distributed servers installed

Correct Answer: C

---

#### **QUESTION 6**

In a pre-Sale TDA review meeting, what requirement below is recommended before placing an order for new or upgrade system z114 or z196 machine being proposed. Which of the following requirements must be performed before the TDA review?

- A. SW Configuration

- B. Contract Proposal
- C. Capacity Planning Analysis
- D. Project Plan

Correct Answer: C

---

**QUESTION 7**

A customer is looking for a solution that delivers a workload management across the platforms that run his core application. Additionally he is interested in a continuous availability solution that controls all components of the application independent of the platform that is used for the deployment.

Which of the following makes zEnterprise the best match to those requirements?

- A. The new Infiniband coupling link of z196 offer the opportunity to interconnect all platforms. The Unified Resource Manager delivers a central tool to control all events.
- B. z/OS offers with Parallel Sysplex and WLM a best of breed solution. For the distributed part Tivoli System Automation for Multi Platforms (TSAMP) delivers the required functionality.
- C. The combination of Unified Resource Manager, GDPS and TSAMP meets all requirements without changes to the applications.
- D. The customer can consolidate all application parts either on z/OS or on Linux on System z to meet the requirements.

Correct Answer: C

---

**QUESTION 8**

Which of the following best describes zEnterprise architectural advantages?

- A. A System of Systems consisting of multiple architectures
- B. A centralized shared everything z/Architecture
- C. Shared nothing architecture
- D. Includes all IBM servers and storage systems

Correct Answer: A

---

**QUESTION 9**

An account team is working on a very large deal with the customer. The configurations and solution design are in place and have the customer agreement. Which of the following is the next logical step in this opportunity?

- A. Schedule a Customer meeting
- B. Schedule a Pre-Install meeting
- C. Schedule Pre-sales TDA meeting
- D. Schedule Post completion meeting

Correct Answer: C

---

## QUESTION 10

Which new z196 feature provides significant error detection and correction capabilities for bit, lane, DRAM, DIMM socket and memory channel failures?

- A. RAS
- B. RAID
- C. RACEv
- D. RAIM

Correct Answer: D
