QUESTION 1

IBM Tivoli Storage Manager for Virtual Environments provides which three functions?

- A. File level restore
- B. instant restore
- C. Incremental file level backup
- D. Full and differential virtual machine backups
- E. Full and incremental virtual machine backups
- F. Full virtual machine and full virtual machine instant restore

Correct Answer: ABC

QUESTION 2

Which device information is represented by the alias name mt5?

- A. A tape drive on LUN 5
- B. A tape drive on SCSI ID 5
- C. A tape library with 5 drives
- D. The fifth tape in an automated library

Correct Answer: B

QUESTION 3

Which statement is true regarding a vStorage Backup Server?

- A. It only supports backup to disk.
- B. It supports only backup over LAN.
- C. It can be a virtual or a physical machine.
- D. It allows virtual machine full backups and incremental file level backups.

Correct Answer: C

QUESTION 4

New OEM tape hardware not manufactured by IBM will be attached and defined to a Tivoli Storage Manager (TSM)

server. These tape drives are new on the market and no driver for a Windows installation can be found. What can be used?

- A. TSM for SAN
- B. A generic tape driver
- C. Microsoft's tape driver
- D. The latest similar tape hardware driver from the manufacturer

Correct Answer: D

QUESTION 5

During a long period of time the backup data for a specific node is spread over many volumes. For a faster restore, how can the data be consolidated if active and inactive versions are needed for the restore?

- A. Create a new copy pool for this specific node and restore from the copy pool.
- B. Create an active data pool and copy the active versions from the primary pool hierarchy.
- C. Move the data for this node with move nodedata from all sequential storage pools to a random disk storage pool.
- D. Move the data for this node with move nodedata from the last sequential storage pool to a new sequential storage pool.

Correct Answer: C

QUESTION 6

A Tivoli Storage Manager (TSM) server has been configured so it can share access to another servers SCSI tape library and drives. Which three steps must be completed before tape sharing will operate properly?

- A. The library client's tape library definition must include LI BTYPE=SCSI.
- B. The server functioning as library client must be configured for SSL communications.
- C. Scratch tapes must be checked in on the library manager for use by the library client.
- D. Each server must be successfully defined to the other using a define server command.
- E. The library manager's tape library definition must be updated to have the SHARED=YES option.
- F. Drive path definitions must be created on the library manager to allow access by the library client.

Correct Answer: ACE

QUESTION 7

When switching from schedule mode polling to server-initiated sessions which statement is true when contacting the

client?

- A. The next backup will be a full backup.
- B. . The server will use SSL to access the client.
- C. The server will use information from a register node.
- D. The server will prompt for information from the client.

Correct Answer: C

QUESTION 8

When would enhanced scheduling be used?

- A. To schedule a backup on specific days of the month.
- B. When a schedule has to be spread over multiple servers.
- C. To load balance nodes across different schedules automatically.
- D. When multiple nodes need to be assigned to a specific schedule.

Correct Answer: A

QUESTION 9

After defining a collocation group to a Tivoli Storage Manager server, what must be done to utilize its capabilities?

- A. Update a node in the group.
- B. Register the pool to the group.
- C. Add a new member to the group.
- D. Define a storage pool to the group.

Correct Answer: A

QUESTION 10

In a Tivoli Storage Manager (TSM) server script some commands will be sent to different TSM servers. How can this requirement be solved?

- A. Command routing in server scripts is not possible.
- B. Server routing information and label statements cannot be combined.
- C. When writing scripts, use the parentheses for server routing information.

D. The colon after the server name indicates the end of the routing information and has precedence over the label statement.

Correct Answer: D

QUESTION 11

Migration is using only one tape but more tape drives are available. Which stgpool option should be reviewed?

- A. drives
- B. numdrives
- C. migprocess
- D. mountpoints

Correct Answer: C

QUESTION 12

What is the outcome of running this IBM Tivoli Storage Manager (TSM) V7.1 command: AUDIT LIBRARY [Library-Name] CHECKLABEL=BARCODE REFRESHSTATE=YES?

- A. New previously unknown SCRATCH volumes in the library are added to TSM\\'s inventory.
- B. New previously unknown PRIVATE volumes in the library are added to TSM\\'s inventory and the element addresses are updated.
- C. The TSM LIBVOLUMES table is synchronized with the library\\'s inventory, the number of drives and slots known by TSM to be in the library are updated, and no previously unknown volumes are checked in.
- D. The TSM LIBVOLUMES table is synchronized with the library\\'s inventory, the number of drives and slots known by TSM to be in the library are updated, and all previously unknown volumes are checked in as PRIVATE volumes.

Correct Answer: C

QUESTION 13

Which two operating systems are currently supported by IBM Tivoli Storage Manager V7.1 server?

- A. AIX
- B. z/OS
- C. Debian Linux
- D. Apple OS X Server
- E. Microsoft Windows Server

Correct Answer: AE

QUESTION 14

What are two characteristics of Microsoft Windows Volume Shadow Service (VSS) fast restores using Data Protection for Microsoft Exchange Server?

- A. Restore granularity is at the mailbox level.
- B. Only full and incremental backup types can be restored.
- C. It supports restoring a VSS backup to an alternate database.
- D. Any backup to LOCAL can be restored only to the same system.
- E. It does not support restoring a VSS backup to an alternate database.

Correct Answer: CD

QUESTION 15

A Windows client node has this directory structure:

```
C:\proposals
C:\proposals\dir1
C:\proposals\dir1\file1.txt
C:\proposals\dir1\file2.txt
C:\proposals\dir2
C:\proposals\dir2\file3.txt
C:\proposals\dir2\file4.txt
C:\proposals\file5.txt
C:\proposals\file6.txt
```

The command `dsmc archive c:\proposals` is run on the client. How many objects are archived to the Tivoli Storage Manager server by default?

- A. Nine: all directories and files.
- B. Ten: all directories and files, plus the `c:\directory`.
- C. Two: the directory `c:\` and the directory `c:\proposals`.
- D. Three: the directory `c:\proposals` and the files `file5.txt` and `file6.txt`.

Correct Answer: C
