QUESTION 1

In your system landscape, you create a Custom Business Object in the SAP S/4HANA On- Premise edition. Which steps are necessary to use the Custom Business Object as the basis for an SAP Fiori app?

There are 2 correct answers to this question.

- A. Create a project in the SAP Gateway Service Builder (SEGW) and reference your Custom Business Object as data source
- B. Register the OData service based on your Custom Business Object in SAP Gateway
- C. Activate the UI Generation checkbox in the Custom Business Objects app
- D. Activate the Service Generation checkbox in the Custom BusinessObjects app

Correct Answer: AB

QUESTION 2

You implement the behavior of a CDS-based BOPF Business Object. For which of the following tasks can you reuse the implementation from the BOPF public library?

Please choose the correct answer.

- A. Check for existing foreign keys
- B. Auto-fill a Last Changed By field
- C. Auto-fill semantic key fields
- D. Check for valid dates in input fields

Correct Answer: C

QUESTION 3

You want to use the extensibility app, Custom Fields and Logic, to define custom fields for an SAP Fiori app. Which of the following conditions is a prerequisite for this activity?

Please choose the correct answer.

- A. Custom fields can only be created for SAP Fiori apps that have been enabled by SAP for this type of extension.
- B. You must release the SAP Fiori app for extensibility via transaction Setup Adaptation Transport Organizer for Key User Tools (S_ATO_SETUP).
- C. You must release the SAP Fiori app for extensibility using the Enable Fields for Use transaction in the Custom Fields and Logic (SCFD_EUI) app.
- D. There is no specific requirement. Custom fields can basically be created for any SAP Fiori app.

Correct Answer: A

QUESTION 4

You want to use the UNION between 2 SELECT statements in a CDS view. What must both statements have in common?

There are 2 correct answers to this question.

- A. Identical name or alias for elements in the same position
- B. Same number of key elements
- C. Identical data types for elements in the same position
- D. Same number of elements

Correct Answer: AC

QUESTION 5

You have written the following code: START-OF-SELECTION. LOOP AT itab INTO DATA(line). * ENDLOOP. The system creates a variable called Line. When is it created and when can you address it?

Please choose the correct answer.

- A. It is created when the LOOP statement is processed. You can access it only within the loop.
- B. It is created at the beginning of the program. You can access it any time after the declaration.
- C. It is created when the LOOP statement is processed. You can access it any time after the declaration.
- D. It is created at the beginning of the program. You can access it only within the loop.

Correct Answer: C

QUESTION 6

You want to create custom fields using the Custom Fields and Logic extensibility app. Which of the following statements do you need to consider?

There are 2 correct answers to this question.

- A. You must assign the fields to a business context.
- B. You can only use String-like data types for the fields.
- C. You can translate the fields into different languages.
- D. You must define the fields as read-only fields.

Correct Answer: AC

QUESTION 7

You define an SAPUI5 application as the target in a target mapping. Which of the following are mandatory?

There are 3 correct answers for this question.

- A. Application ID
- B. OData service
- C. ICF path
- D. Component ID
- E. Application type

Correct Answer: ACD

QUESTION 8

How can you create an SAP Gateway service based on a CDS View? There are 2 correct answers to this question.

- A. Redefine the CDS View as service in an SAP Gateway project.
- B. Add annotation @VDM.viewType: #CONSUMPTION in the data definition.
- C. Add annotation @OData.publish: true in the data definition.
- D. Reference the CDS View as data source in an SAP Gateway project.

Correct Answer: CD

QUESTION 9

The root-node of a CDS-based business object is based on CDS View ZMY_VIEW. The persistent data is stored in the database table ZMY_TABLE. At least one key field of ZMY_TABLE has a different name in CDS View ZMY_VIEW.

Which kind of repository object is needed to map the fields of ZMY_VIEW to the fields of ZMY_TABLE?

Please choose the correct answer.

- A. SQL View
- B. Database View
- C. Structure Type

D. Global Class

Correct Answer: B

QUESTION 10

How could you replace the statement CONCATENATE a b INTO c.? There are 2 correct answers to this question.

A. `c = |{ a }{ b }|`.

B. `c = |aandandb|`.

C. `c = a and b`.

D. `c = a andand b`.

Correct Answer: AD
