QUESTION 1

Which of the following statements regarding the client concept and the client copy tools in ABAP- based

SAP Systems (for example, SAP ECC) are true?

(There are 3 correct answers to this question)

Response:

A. Clients can be copied within a single SAP System.

B. Application data can only be copied from one client to another, when all clientspecific customizing is also copied.

C. User master records cannot be copied between clients.

D. Clients can be copied between SAP Systems of the same release.

E. Client-independent customizing is always automatically copied between clients.

Correct Answer: ABD

QUESTION 2

You would like to connect two SAP systems using RFC. RFC communication should be possible from each

client of the calling system and should connect to three different clients of the target system.

What do you need to consider?

There are 2 correct answers to this question.

Response:

A. No work is required in the remote system.

B. In this scenario, you need to define three RFC connections of type "3" within each client of the calling SAP system.

C. For the scenario described, you will need to define three RFC connections in the calling system.

D. The RFC connection to be defined needs to be of type "M", because multiple clients should be addressable in the target system.

Correct Answer: AD

QUESTION 3

What are benefits of using property variants in Computing Center Management System (CCMS)- based

system monitoring?

There are 2 correct answers to this question.

A. You can transport monitor definitions between AS ABAP-based SAP systems.

B. You can transport threshold settings between AS ABAP-based SAP systems.

C. You can create customer-defined monitor definitions in AS ABAP-based SAP systems.

D. Depending on the operation mode of the AS ABAP-based SAP system, you can switch sets of threshold values.

Correct Answer: BD

QUESTION 4

You are analyzing an ICF service in transaction SICF (Maintain Services). The ICF service is displayed in a blue font color. What does this color indicate?

A. The ICF service is active. It has been activated explicitly.

B. The ICF service is inactive. It has been switched from active to inactive because a superior ICF service has been deactivated.

C. The ICF service is active. It has been switched from inactive to active because a subordinate ICF service has been activated.

D. The ICF service is inactive. It has been deactivated explicitly.

Correct Answer: B

QUESTION 5

An SAP system\\\'s Oracle database has four online redo logs, also known as database transaction logs. Each online redo log has a mirrored copy. What is the effect of a log file switch?

A. The database switches between writing to the original redo log files and the mirrored redo log files.

B. The database alternates between writing to the online and offline redo log files.

C. The current online redo log is closed and the next online redo log becomes open for writing. The ARCH process is triggered to begin backing up the recently closed redo log.

D. The current online redo log is copied to its mirrored copy, then the next online redo log becomes open for writing.

Correct Answer: C

QUESTION 6

For which of the following options do you need to install and configure SAProuter? There are 2 correct answers to this question.

A. EarlyWatch Service session done remotely by an SAP Support employee

B. Connection to https://scn.sap.com

C. Remote Consulting from SAP

D. Connection to https://service.sap.com

E. Create a support message in case of problems with the SAP system

Correct Answer: CE

QUESTION 7

Which of the following statements concerning user master records in AS ABAP- based SAP systems are

correct?

There are 2 correct answers to this question.

A. One or more roles can be assigned to a user master record.

B. An authorization object can be assigned to a user master record.

C. One or more authorization profiles can be assigned to a user master record.

D. A single authorization value can be assigned to a user master record.

Correct Answer: AC

QUESTION 8

What does SAP recommend when importing transport requests? (There are 3 correct answers to this question)

A. Transport requests should only be imported if the software component vector of the transport requests fit to the software components and their Support Package level of the target system.

B. Transport requests should be imported into the productive system one by one in the order of their sequence in the import queue

C. Transport requests should always be imported into the productive system in the sequence of their export from the development system

D. In general importing transport requests into the productive systems requires a maintenance window (downtime window).

E. Transport requests should be imported project wise into the productive system

Correct Answer: ADE

QUESTION 9
