QUESTION 1

What do you have to consider regarding the data provider definition when you design a new standard Web template?

- A. The data provider must be created in the Web template and specified by a URL parameter.
- B. The data provider is automatically generated by specifying a query in the URL parameter.
- C. The data provider must be created in the Web template and specified by a Java script.
- D. The data provider must be created in the Web template and changed through a command sequence.

Correct Answer: A

QUESTION 2

How do portal themes affect Web templates at runtime?

- A. They change the representation of the Web items on the Layout tab.
- B. They apply formatting styles to the Web items in the Web application.
- C. They overwrite the CSS attributes of individually changed Web items.
- D. They align the Web items as defined in the theme.

Correct Answer: B

QUESTION 3

What is the objective of the semantic layer?

- A. To validate data loaded into BW
- B. To create transformations from various ERP systems to a BW system
- C. To provide business users access to data without them needing to be familiar with the structure of the data sources
- D. To enable database administrators to create a data warehouse from multiple data sources

Correct Answer: C

QUESTION 4

Which of the following combinations of structures can you create in BEx Query Designer? (Choose two)

- A. 1 characteristic structure and 2 key figure structures
- B. 1 characteristic structure and 1 characteristic structure

C. 1 characteristic structure and 1 key figure structure

D. 1 key figure structure and 1 key figure structure

Correct Answer: BC

QUESTION 5

Which of the following data sources can you choose directly to create a Web Intelligence document? (Choose two)

A. InfoCube

B. Universe

C. BEx Query View

D. Business View

E. Analysis View

Correct Answer: BE

QUESTION 6

Which of the following statements regarding refreshing mode in BEx Analyzer is correct?

A. The "pause automatic refresh" option should only be used when you perform ad hoc analysis directly against an InfoProvider.

B. The "pause automatic refresh" option is the best practice option. You only use the "automatic refresh" option for special scenarios to optimize the use of the OLAP processor.

C. The "automatic refresh" option is the best practice option. You only use the "pause automatic refresh" if you want to define more than one filter and send them all to the OLAP processor.

D. The "pause automatic refresh" option prevents automatic data refreshes when you report against VirtualProviders with real-time data access.

Correct Answer: C

QUESTION 7

Which tasks can you perform by using URL parameters in BEx Web Application Designer? (Choose two)

A. Change filter values.

B. Change Web item properties.

C. Change the authorization user.
