QUESTION 1

What does SAP recommend you do to improve the overall reporting performance of an InfoCube in SAP BW 7.4? There are 3 correct answers.

- A. Include the InfoCube into a semantically partitioned object (SPO).
- B. Execute a pre-load OLAP cache process in a process chain.
- C. Create aggregates.
- D. Create one or more line item dimensions.

Correct Answer: ACD

QUESTION 2

What can you use to accelerate an SAP BW implementation project? (1)

- A. SAP BW Data Warehousing Workbench
- B. SAP BI Content
- C. SAP BW Accelerator (BWA)
- D. SAP BW Statistics

Correct Answer: C

QUESTION 3

Which of the following are features of the Write-Optimized DSO? (2)

- A. They utilize the single Active Data Table
- B. They are intended to contain aggregated data
- C. They enable mass data loads
- D. They utilize a semantic (business) key for record uniqueness

Correct Answer: AC

QUESTION 4

The Materials department has created several new products (0PRODUCT) and transactional data for them in the source system. Neither the new products nor the transactional data are visible in SAP BW reporting. Which of the following helps you analyze the issue? There are 3 correct answers.

- A. Check for the new data in the DataSource PSA.
- B. Check that the InfoCube compression is up to date.
- C. Check that the InfoCube contains the new master data.
- D. Check that the InfoCube contains the new transaction data.
- E. Check the Attribute Change Run.

Correct Answer: ACE

QUESTION 5

What are the features of using the Operational Data Provisioning (ODP) Infrastructure in BW 7.4? There are 3 correct answers.

- A. Extract once and deploy many times.
- B. Relies on the proven Delta Queue technology.
- C. High compression rate up to 90% of extracted data.
- D. Single point of monitoring.
- E. Makes complete use of mandatory PSA's.

Correct Answer: ABD

QUESTION 6

What is the purpose of the Enterprise Data Warehouse (EDW) Layer? (2)

- A. To ensure vertical consistency of the data flow
- B. To provide a layer where data can be overwritten to reflect the current status of business transactions
- C. To provide an enterprise wide repository of business data at a summary level
- D. To ensure that data is only extracted once from source systems

Correct Answer: AD

QUESTION 7

A MultiProvider has four InfoCubes as components. One InfoCube is a VirtualProvider and two of the others have aggregates. The total execution time of the MultiProvider query is 29 sec when you expect 10 sec. What can account for this scenario? There are 3 correct answers.

- A. The shadow aggregates are being used because of the roll up job.

- B. The query is running in a batch process.
- C. There are non-cumulative key figures in the InfoCubes.
- D. The query is configured for nonparallel processing.
- E. There are insufficient background processes at execution time.

Correct Answer: CDE

QUESTION 8

A Business Content transactional Datasource that uses delta queue processing was converted to Real Time Data Acquisition. An analysis reveals that no new deltas are being transferred into SAP BW 7.x, even though documents are regularly created in the SAP source system delta queue. What tools could you use? There are 2 correct answers.

- A. Process Chain Monitor
- B. Extractor Checker in SAP ECC
- C. SAP BW Delta Queue
- D. Data Load Monitor

Correct Answer: BD

QUESTION 9

Which of the following objects can you use as a source objects for a Transformation object? (2)

- A. Transient Provider
- B. InfoSet
- C. Open Hub Destination
- D. InfoSource
- E. InfoSet

Correct Answer: D

QUESTION 10

After transporting BEx workbooks to production from development, users state that they cannot find the workbooks. What would be the most logical reason? Select the correct answer.

- A. The BEx workbooks are not active in production.
- B. The users\' roles have to be updated in production.

C. The BEx workbooks have not been authorized.

D. The users\' roles have to be re-transported.

Correct Answer: D

QUESTION 11

A Flat interface DataSource is used to extract file data into the PS

A. The DTP, however, is having trouble loading the data into an InfoCube. What could be the possible solution? Select the correct answer.

B. The BW Delta Queue is empty.

C. The BW DTP is set to Full extraction.

D. The DataSource has a delta process of FILO.

E. The InfoPackage is not active.

F. The Transformation does not have rules for all destination fields.

Correct Answer: C

QUESTION 12

The Marines order 8 service members for deployment on Monday. This data is loaded to a Standard DSO. Then the office requests 2 less service members, for a total of 6. This new after image data is also loaded to the DSO. What records will be in the Change Log? Select the correct answer.

A. 8, -8, 6

B. 8, -8, 2

C. 8, 6

D. 8, 2

E. 8, 6, 2

Correct Answer: A

QUESTION 13

Which of the following initial tasks should you perform when designing an SAP BW data model? (2)

A. Analyze relationships between the characteristics and their attributes

B. Evaluate the volume of data to be loaded

- C. Evaluation of the number and types of users
- D. Evaluate the format of data to be loaded

Correct Answer: BC

QUESTION 14

Which of the following does the data propagation layer of your SAP BW system offer? There are 2 correct answers.

- A. Complete data history.
- B. Fast load of mass data.
- C. A single version of the truth.
- D. Ability to extract once and deploy many times.
- E. A single version of the truth.

Correct Answer: D

QUESTION 15

When is the Change Run required after successful completion of a master data load? Select the best answer.

- A. When changes are made to texts from Characteristics used in an Aggregate.
- B. When changes are made to attributes or hierarchies from Characteristics used in an Aggregate.
- C. When changes are made to attributes, hierarchies or texts from Characteristics used in an Aggregate.
- D. When changes are made to the structure of the InfoCube.

Correct Answer: B
