## QUESTION 1

Which Customizing element controls the determination of planned costs in production orders?

- A. Costing variant
- B. Calculation procedure
- C. Settlement profile
- D. Accounting type

Correct Answer: A

---

## QUESTION 2

During the processing of production orders planned and actual costs are determined.

On which of the following objects can you collect these costs? (Choose two)

- A. Work center
- B. Planned order
- C. Product cost collector
- D. Production order

Correct Answer: CD

---

## QUESTION 3

You want to plan a finished material using material requirements planning in an SAP ECC system. The resulting planned orders should be scheduled using basic date scheduling (not lead-time scheduling).

Which of the following statements is true for the resulting dependent requirements?

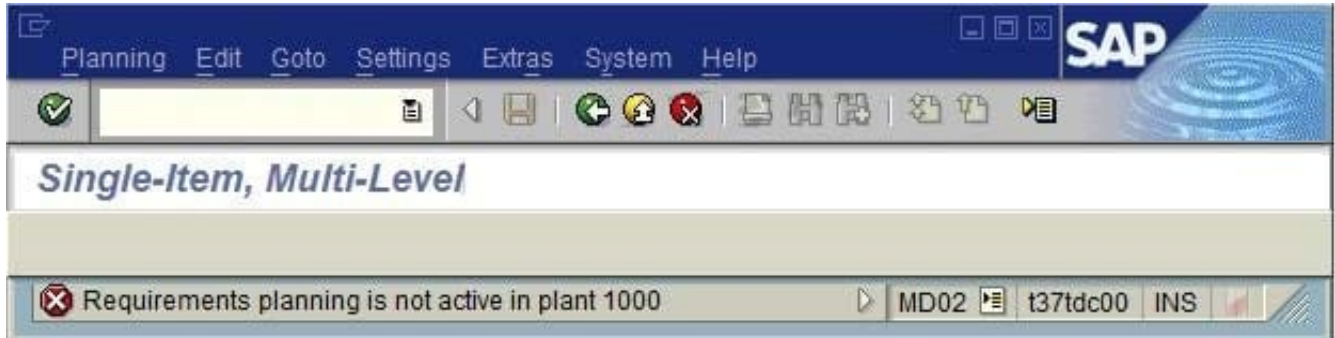

- A. When a customer order is created for the finished material, the dependent requirements are automatically triggered for the components in the bill of material without a planning run.
- B. In multi-level backward scheduling, dependent requirements are calculated to the exact second.
- C. In multi-level backward scheduling, dependent requirements are triggered at the start date for the planned order of the finished material.
- D. If the individual material components are explicitly assigned to the operations of a routing, the requirement dates of the dependent requirements are scheduled at each start date of the operations.

Correct Answer: C

---

## QUESTION 4

When testing requirements planning in plant 1000, you receive the error message displayed below. Large numbers of materials are already available in plant 1000. As a first step in solving the problem, you activate requirements planning in the Customizing for plant 1000.

What further tasks do you perform before you can use requirements planning in plant 1000 in SAP ECC?

- A. Set up the planning file in Customizing and specify the plant parameters for plant 1000 in Customizing.
- B. Set up the planning files in Customizing and specify the plant parameters for plant 1000 in Customizing of the MRP group.
- C. Set up the planning file in Customizing and specify the plant parameters for plant 1000 in the MRP views in material master.
- D. Activate requirements planning in Customizing for MRP areas in plant 1000 and specify the plant parameters for plant 1000 in the MRP views in material master.

Correct Answer: A

## QUESTION 5

For which of the following objects can you enter a confirmation? (Choose two)

- A. Production order
- B. Production order operation
- C. Trigger Point
- D. Work Center

Correct Answer: AB

## QUESTION 6

What sequence do you follow in master data maintenance to define the production of a material?

- A. Create BOM -> Create work centers -> Create routing -> Carry out component assignment in BOM or routing

- B. Create BOM -> Create work centers -> Create routing -> Carry out component assignment in work center
- C. Create routing -> Create work centers -> Create BOM -> Carry out component assignment in BOM or routing
- D. Create work centers -> Create routing -> Create BOM -> Carry out component assignment in work center

Correct Answer: A

---

## QUESTION 7

You want to send production order-related data like confirmations, goods receipts, goods issues, and other user-specific actual data from an external process control system to SAP ECC.

How can you fulfill this requirement?

- A. Use the core interface (CIF).
- B. Use the service application interface (SAPI).
- C. Use the PI-PCS interface.
- D. Use the PP-PDC interface.

Correct Answer: C

---

## QUESTION 8

Which of the following properties applies to multi-site planning in SAP ECC?

- A. Multi-site planning can be activated using the corresponding planning strategy.
- B. Both withdrawal from alternative plant and stock transfer from another plant are defined via special procurement keys.
- C. The use of "scope of planning" (cross-plant total planning) is mandatory for multi-site planning.
- D. When using one-step stock transfer posting, transfer stock is created in the receiving plant.

Correct Answer: B

---

## QUESTION 9

During a project phase, your customer raises some questions concerning parameters of the procurement type in the material master in the SAP ECC system.

Which of the following procurement type properties are valid? (Choose two)

- A. If procurement type E (in-house production) is set, external procurement may still be possible depending on the material type.
- B. A material's procurement type can be freely selected between E (in-house production), F (external procurement)

and X (both procurement types) independent of material type.

C. Procurement types E (in-house production) and F (external procurement) have to be further refined with special procurement types.

D. If both procurement types are allowed with entry X (both procurement types), requirements planning assumes in-house production.

Correct Answer: AD

---

#### **QUESTION 10**

What is SAP Solution Manager?

A. A part of the SAP ECC System

B. A managed system in a system landscape

C. A stand-alone system that communicates with other systems in a system landscape

D. An add-on industry solution

Correct Answer: C

---

#### **QUESTION 11**

Which activities lead to a reduction of the capacity requirements for an operation? (Choose three)

A. Confirming the operation

B. Rescheduling the operation

C. Setting the status technically complete (TECO)

D. Reducing the order quantity

E. Posting the goods receipt for the production order

Correct Answer: ACD

---

#### **QUESTION 12**

Which activity can trigger an automatic availability check for the components of a production order?

A. Goods receipt for a missing part

B. Material staging

C. Order release

D. Order rescheduling

Correct Answer: C

---

## QUESTION 13

Which of the following activities within the KANBAN procedure normally triggers subsequent stock posting of the goods receipt?

- A. Set "Container in transport"
- B. Set "Container empty"
- C. Set "Container full"
- D. Set "Container in process"

Correct Answer: C

---

## QUESTION 14

Which of the following statements regarding lot size procedures is correct?

- A. The lot size quantity can be influenced using a minimum lot size and the rounding profile.
- B. If a make-to-order production strategy is used, only the lot-for-lot (exact) lot size can be applied.
- C. If a long-term lot size is used, procurement is conducted with a long-term perspective.
- D. The procurement quantity of a lot size procedure can be specified using a safety time period profile.

Correct Answer: A

---

## QUESTION 15

Where can you define the default storage location for the material component of a production order? (Choose three)

- A. Material master (component)
- B. Routing
- C. Production supply area of a work center
- D. Production version (product)
- E. BOM header (product)

Correct Answer: ACD
