QUESTION 1

When you configure tenant-aware device discovery for the Shared Collection Model, which steps do you perform? (Choose three)

A. Configure an IP domain for each tenant.

B. Create an IP domain in the Default Space.

C. Create service provider groups for each tenant.

D. Create SNMP and discovery profiles for each tenant.

E. Assign the relevant Data Collectors to the Default Tenant IP domain.

Correct Answer: BCE

QUESTION 2

You are installing the Data Repository in a clustered configuration. What is the minimum number of hosts that you can use for your cluster?

A. Two

B. Three

C. Four

D. Five

Correct Answer: B

QUESTION 3

CA Performance Center can be uninstalled:

A. by using the Uninstall_PerformanceCenter program.

B. only if you first uninstall the Event Manager and then run sudo apt-get remove.

C. by using the Installation Wizard only,which will also uninstall MySQL data and temporary directories by default.

D. by first uninstalling the Data Aggregator and then following the prompts that will enable you to select the database and UI-related components to remove.

Correct Answer: A

QUESTION 4

To log into a specific server and uninstall a Data Collector, which account do you use?

A. Root

B. Admin

C. IT Operator

D. Any user with access to the server

Correct Answer: A

QUESTION 5

How can Data Collector poll logs help you troubleshoot? (Choose two)

A. They help you to address user login problems.

B. They enable you to examine SNMP traffic between a Data Collector and a specific IP address.

C. They help you to debug synchronization problems between CA Performance Center and the Data Aggregator.

D. They help you to resolve issues such as unexpected dashboard values and metric family discovery not working.

Correct Answer: BD

QUESTION 6

When you are editing a monitoring profile for the first time, you notice that the default detection rate is zero and the Update Metric Families check box is selected. How does this affect how the Data Aggregator monitors device reconfiguration?

A. Device configuration will be set to false.

B. Device configuration changes will be ignored.

C. Device configuration changes will be immediately updated upon detection.

D. Device reconfiguration will be checked when changes to the metric family occur.

Correct Answer: C

QUESTION 7

In which circumstance do you typically need to create a new metric family?

A. Each time you create a new monitoring profile

B. Each time you create a custom vendor certification

C. When you need to monitor a new type of technology

D. When you want to restrict what you monitor to maximize performance

Correct Answer: C

QUESTION 8

Sue White is a Global Administrator who logs into a recently configured tenant as a tenant administrator. Why might Sue need to do this?

A. Because this enables Sue to monitor tenants using a read-only view ofsettings configured by the tenant

B. Because this is the standard way to create the Custom Vendor Configuration template that Sue can use for all future tenants

C. Because this enables Sue to administer the tenant from the tenant perspective and perform tasks such as creating IP domains and user accounts

D. Because as a Global Administrator who logs in as a tenant administrator,Sue can perform additional tasks that a tenant administrator would not be able to perform

Correct Answer: C

QUESTION 9

In the Data Aggregator, what is the purpose of collections?

A. To group devices for data collection

B. To restrict users from viewing collected data

C. To categorize sites with similar monitoring requirements

D. To collect metric data into logical categories such as location or significance

Correct Answer: A

QUESTION 10

When you review the list of management information bases (MIBs) on the Select NIB page of the Create Vendor Certification wizard, an error message indicates that a MIB did not compile. Which steps might help you resolve the issue? (Choose two)

A. Delete all unused MIBs.

B. For dependency errors,upload the missing MIBs.

C. For the relevant Data Aggregator data source,on the Polled Metric Families tab,click Update Configuration.

D. For syntax errors,check the error message,correct the syntax error in the MIB,and import the corrected MIB.

Correct Answer: BD
