## QUESTION 1

As part of the improvement program, the organization is also looking at tool support.

Which type of tool could be used to ensure higher quality of the code to be reviewed?

- A. Review tool
- B. Test execution tool
- C. Static analysis tool
- D. Test design tool

Correct Answer: C

---

## QUESTION 2

Regarding the process described above, what is the most important recommendation you would make using IEEE 1044 as a guide?

- A. No priority or severity assigned
- B. Incident numbering is manual rather than automated
- C. No mentioning of reproduceability
- D. No classification on type of incident

Correct Answer: A

---

## QUESTION 3

Within the projects, a master test plan and phase test plan will be used. Following is a list of characteristics applicable for test plans:

Which TWO mentioned characteristics relate to the phase test plan?

- A. Any deviation from the procedures described in the test
- B. strategy document
- C. The overall estimated costs, timescales and resource
- D. requirements
- E. A detailed schedule of testing activities

- F. The development deliverables to be tested
- G. Which test staff members (names) will be involved and when
- H. Level of requirements coverage achieved

Correct Answer: CE

---

## QUESTION 4

Considerable attention will be given in this project to defining exit criteria and on reporting back on their status. Which combination of TWO exit criteria from the list would be best to use?

- I. Total number of defects found
- II. Percentage of test cases executed
- III. Total test effort planned versus total actual test effort spent
- IV.

Defect trend (number of defects found per test run over time)

- A.
  - (i) and (ii)
- B.
  - (i) and (iv)
- C.
  - (ii) and (iii)
- D.
  - (ii) and (iv)

Correct Answer: D

---

## QUESTION 5

Relying only on the information provided in the scenario, select the TWO items and/or features for which sufficient information is available to proceed with test design.

- A. All supported credit cards
- B. Language localization

C. Valid and invalid advances

D. Usability

E. Response time

Correct Answer: AC

---

## QUESTION 6

Which of the following phases in the fundamental test process is considered to deliver a document which can be used as a major input for test process improvement?

A. Test planning and control

B. Test implementation and execution

C. Evaluating exit criteria and reporting

D. Test project closure

Correct Answer: D

---

## QUESTION 7

Identify THREE items that would be part of the work-breakdown structure showing the key testing activities for the acceptance test project.

A. Test planning, test case preparation and test execution for each of the four iterations

B. Work should be explicitly allocated to test completion, test management, installation and to training on using the system

C. Activities to deploy the system in the user environment

D. Regression testing in the second, third and fourth iterations

E. Development activities for unit and integration testing

F. Reviews on requirements documentation

G. Defining test environment requirements for system testing

Correct Answer: ABD

---

**QUESTION 8**

Consider the typical objectives of testing. Which of the following metrics can be used to measure the effectiveness of the testing process in achieving one of those objectives?

- A. Average number of days between defect discovery and resolution
- B. Percentage of requirements covered
- C. Lines of code written per developer per day
- D. Percentage of test effort spent on regression testing

Correct Answer: B

---

**QUESTION 9**

Explain how the above mentioned report may differ from a report that you produce for the project manager, who is a test specialist. Select TWO items from the following options that can be used to report to the project manager and would not be included in a report to senior management.

- A. Show details on effort spent
- B. List of all outstanding defects with their priority and severity
- C. Give product risk status
- D. Show trend analysis
- E. State recommendations for release

Correct Answer: AB

---

**QUESTION 10**

Why might a RAD approach be a better option for the test manager rather than a sequential development?

- A. It will extend the development team's abilities and enhance future delivery capabilities.
- B. It will allow the marketing, clerical and testing staff to validate and verify the early screen prototypes.
- C. Time-box constraints will guarantee code releases are delivered on schedule.
- D. More time can be spent on test execution as less formal documentation is required.

Correct Answer: B

---

**QUESTION 11**

During test process improvement it is recommended to use standards where possible. Standards originate from various sources and they cover different subjects in relation to testing.

Pick TWO sources of software standards, useful to software testing from the ones mentioned below.

- A. ISO 9126-1 `Software engineering- Product quality Part 1: Quality model` is an international standard, that provides a basis on which to define quality assurance solutions.
- B. ISA 4126-1 `Software engineering- Product quality Part 1: Quality model` is an international standard, that provides a basis on which to define quality assurance solutions.
- C. BS-7925-2 `Software testing. Software component testing` is a national standard used internationally. It covers a number of testing techniques that may be useful both on component testing level and on system testing level.
- D. SY-395-01 `Standard for East Coast Hospital software` is a regional standard adapted from a national one. Besides hospital software, this standard ought to be used also by other types of software system in the region.
- E. IEEE 829 `standard for software test documentation` is an international standard to be following mandatory by all testing origination regardless of lifecycle models.

Correct Answer: AC

---

**QUESTION 12**

You have investigated different possibilities and selected four of them to present to IT management.

Which of the proposals will you most likely give your highest recommendations?

- A. Insourcing of test automation based on an offer from a local company ABC that has people who are specialists in system level capture-replay automation tools and they also do regular training courses in test automation methods and tools. They can then work closely with Vicki.
- B. Outsourcing of test automation based on an offer from an Asian company, AsiaAutoTest, which has people who are specialists in system level capture-replay automation tools. They also offer training and besides they offer to run and maintain the regression tests in the future.
- C. Internal offer from the development department of XYZ to create the regression package using CppUnit as test automation tool. One of the development groups have very good experiences in automating unit tests, and they are willing to do training as well.
- D. Solution from a tool vendor offering to educate two test team members in the use of their easy- to-use test automation capture replay tool over the first 3 month and based on that build the regression test suite. In addition to Vicki, Steve is the only one that has time available to be educated.

Correct Answer: A

---

## QUESTION 13

You are considering involving users during test execution. In general, what is the main reason for involving users during test execution?

- A. They are a cheap resource
- B. They have good testing skills
- C. This can serve as a way to build their confidence in the system
- D. They have the ability to also focus on invalid test cases

Correct Answer: D

---

## QUESTION 14

You are about to release a test progress report to a senior manager, who is not a test specialist. Which of the following topics should NOT be included in the test progress report?

- A. Product risks which have been mitigated and those which are outstanding.
- B. Recommendations for taking controlling actions
- C. Status compared against the started exit criteria
- D. Detailed overview of the risk-based test approach being used to ensure the exit criteria to be achieved

Correct Answer: D

---

## QUESTION 15

Which of the following would you least expect to form part of the analysis of initial tool costs?

- A. Integration with other tools
- B. Learning time required to use the new tool
- C. Tool portability
- D. Evaluation of suitable tools

Correct Answer: C

---
