QUESTION 1

Which of the following is an example of a typical project risk?

A. The application may not meet its performance targets when under load.

B. The users may find that the application does not meet their expectations.

C. The developers may not have the right skills to code the application.

D. The system architecture for the application may not be secure.

Correct Answer: D

QUESTION 2

When comparing Static and Dynamic test techniques, which of the following statements is TRUE?

A. Static Testing finds failures, whilst Dynamic Testing only finds the cause of failures.

B. Static Testing techniques, such as reviews, can be undertaken before Dynamic Testing, making defects cheaper to remove.

C. Static Testing is based on the execution of code, whist Dynamic Testing relies on examination and analysis.

D. Only Static Testing has the objective of identifying defects.

Correct Answer: B

QUESTION 3

Which of the following is NOT a valid use of decision coverage?

A. Checking that all decisions have been exercised in a single program.

B. Checking that all decisions have been exercised in a business process.

C. Checking that all decisions are based on a numeric value.

D. Checking that at least 100% decision coverage has been achieved, as this guarantees 100% statement coverage.

Correct Answer: C

QUESTION 4

You are performing a review of your colleague\\'s test cases based on the following test basis document:

```
User Login

        User Name  [                    ]

        Password   [                    ]

                              [  LOGIN  ]
```

Validation failure #	Field Name	Validation rule	Error Number for validation failure
V1	User Name	Mandatory	12
V2	User Name	Must already exist on database	23
V3	Password	Mandatory	13
V4	Password	Must match user's password on database	24

The Test Cases are as follows:

TC1. Success – valid 'User Name' and 'Password'; Customer Menu displayed

TC2. Failure – 'User Name' field has blank entry; Error Number 12 displayed

TC3. Failure – 'User Id' entered does not exist on database (i.e. unregistered user); Error Number 23 displayed

TC4. Failure – 'Password' entered does not match user\\'s password on database; Error Number 24 displayed

You are guided by the following checklist in your review:

C1. There must be one test case to cover success

C2. There must be one test case for each error path (e.g. validation failure)

C3. Each test case must use terminology consistent with the test basis document (field names, error numbering, etc.)

Record a separate defect for each missing test case (checklist items C1 and C2) and for each test case that does not meet checklist item C3.

How many defects should you record?

A. 1

B. 2

C. 3

D. 4

Correct Answer: A

QUESTION 5

Which of the following BEST describes a Test Case?

A. A statement about "what to test" in terms of measurable coverage criteria from analysis of the test basis.

B. A set of preconditions, inputs, actions, expected results and postconditions developed based on test conditions.

C. A description of the test objectives to be achieved and the means and the schedule for achieving them.

D. A source to determine expected results to compare with the actual result of the system under test.

Correct Answer: B

QUESTION 6

Which ONE of the following is the BEST way to take advantage of the different mindsets of testers and developers?

A. Insist on independent testing at all stages in the lifecycle.

B. Have all developers undergo ISTQB training.

C. Keep developers and testers in separate teams.

D. Bring the two mindsets together.

Correct Answer: D

QUESTION 7

Which one of the following is an example of how product risk analysis can influence the testing approach?

A. The complex business rules could result in costly failures, so decision table testing will be used for test case design.

B. Performance failures were much lower than expected, so more test analysis will be conducted in this area.

C. There is a lack of automation skills in the test team, so training for the automation tool will be rolled out.

D. There are no product risks recorded around security, so security testing will be given priority as a contingency measure.

Correct Answer: D

QUESTION 8

A holiday club restricts those booking the holiday, to people between the ages of 18 and 30 inclusive. Using three-point boundary values, what ages would be required to test the lower and upper boundary?

A. 17, 18, 19, 29, 30, 31.

B. 17, 18, 19, 30, 31, 32.

C. 18, 19, 20, 28, 29, 30.

D. 16, 17, 18, 30, 31, 32.

Correct Answer: A

QUESTION 9

The following checklist has been produced to help reviewers detect defects with user stories:

Use Story Checklist:

The user story must have a unique identifier.

The user story must contain the user/customer.
The user story must contain the need.

The user story must contain the reason.

The user story must contain testable acceptance criteria.

Using the checklist above what is wrong with the following user story?

User story: US2018

As a bank account customer, I would like to transfer money from one account to another using the mobile banking application by using the drag and drop feature.

This is acceptable when:

I can drag and drop from one account to another and select any of the pre-defined amounts.

I can drag and drop from one account to another and type in any positive amount.

Once I confirm the details the amount is debited from the first account and credited to the second account.

A. The acceptance criteria are not testable.

B. The user story does not contain the customer.

C. The user story does not contain the reason.

D. The user story does not contain the unique identifier.

Correct Answer: A

QUESTION 10

Which of the following are triggers for Maintenance testing?

a) System migration from one platform to another.

b) Retirement of a system.

c) Preparation for an audit of a system.

d) Modifications to a system.

e) Development of a whole new system.

A. a, c and d.

B. b, c and e.

C. a, d and e.

D. a, b and d.

Correct Answer: A
