- B. Capture and document explicit knowledge about an organization's data and systems
- C. Managing the availability of data throughout the data lifecycle
- D. Provide the starting point for customizations, integration or even replacement of an application
- E. Managing the performance of data transactions
- F. Make the integration between data management and data analytics possible

Correct Answer: ACE

QUESTION 8

Device security standard include:

- A. Installation of anti-malware and encryption software
- B. Relational security policies
- C. Access policies regarding connections using mobile devices
- D. Regulation compliance standards
- E. None of the above
- F. Awareness of security vulnerabilities

Correct Answer: ACF

QUESTION 9

Operational reports are outputs from the data stewards.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 10

A deliverable in the data modelling and design context diagram is the logical data model.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 11

A limitation of the centralized approach include: Maintenance of a decentralized repository is costly.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 12

Through similarity analysis, slight variation in data can be recognized and data values can be consolidated. Two basic

approaches, which can be used together, are:

- A. Realistic
- B. Opportunistic
- C. Deterministic
- D. Probabilistic
- E. Procedural
- F. All of the above

Correct Answer: CD

QUESTION 13

Operational Metadata describes details of the processing and accessing of data Which one is not an example:

- A. Error logs
- B. Schedule anomalies
- C. Purge criteria
- D. Failure logs

Correct Answer: D

QUESTION 14

An advantage of a centralized repository include: High availability since it is independent of the source systems.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 15

Data governance requires control mechanisms and procedures for, but not limited to, assignment and tracking of action items.

- A. FALSE
- B. TRUE

Correct Answer: B
