QUESTION 1

What is an accurate statement about the Common Internet File System (CIFS) protocol?

A. Enables a CIFS server to maintain connection information regarding every connected client

B. Uses a Remote Procedure Call mechanism to provide access to the CIFS supported file systems

C. Contains an open variation of the stateless user datagram protocol that stores information about open files

D. Uses file system locking to enable users to simultaneously overwrite all metadata of a file system

Correct Answer: A

QUESTION 2

What is a benefit of a "recovery-in-place" backup approach in a virtualized data center?

A. Provides instant recovery of a failed virtual machine

B. Reduces the recovery point objective

C. Eliminates redundant data during virtual machine backups

D. Eliminates the backup window

Correct Answer: A

QUESTION 3

What is an advantage of a software-based object storage implementation?

A. Provides the flexibility to reuse the existing infrastructure

B. Requires less storage capacity to store a large number of objects

C. Provides the flexibility to create more than one object ID for an object

D. Requires less hardware to support scalable architecture

Correct Answer: A

QUESTION 4

What is a benefit of backing up data to a disk library?

A. Provides improved backup and recovery performance

B. Provides built-in portability to meet offsite requirements

C. Supports the shoe shining effect for improved backup performance

D. Pre-configured and dedicated appliance is only used for backups

Correct Answer: A

QUESTION 5

Which VMware product provides a network virtualization platform for a software-defined data center?

A. NSX

B. ESXi

C. Horizon

D. AirWatch

Correct Answer: A

QUESTION 6

What is an accurate statement about three-way NDMP backup in a NAS environment?

A. Backup device can be shared among multiple NAS heads

B. Each NAS head should have a dedicated backup device

C. Backup data traverses at least three NAS heads before reaching the backup device

D. Backup is performed only when three or more NAS heads are present

Correct Answer: A

QUESTION 7

An organization has several virtual machines (VMs) deployed in their data center. The VM files are stored on a block-based storage system. The applications on the VMs are impacted during VM backup because the backup agents on the VMs are consuming a large amount of resources.

Which alternate backup solution is recommended to address this issue?

A. Image-based backup

B. Three-way NDMP backup

C. Two-way NDMP backup

D. Target-based deduplication backup

Correct Answer: A

QUESTION 8

How do VSANs ensure security in an IT infrastructure?

A. By providing isolation over a shared infrastructure

B. By authenticating a new switch that joins a fabric

C. By limiting the number of switches in a fabric

D. By prohibiting an unused switch port from being used

Correct Answer: A

QUESTION 9

What is a benefit of implementing a virtual machine (VM) storage migration?

A. Balances storage utilization by redistributing VMs across different storage systems

B. Enables VMs to keep functioning even if the source data is lost due to a failure

C. Improves the security of applications running inside VMs on the migrated storage system

D. Reduces the overall storage system capacity requirements for organizations

Correct Answer: A

QUESTION 10

What is an advantage of performing cumulative backups compared to incremental backups for the same data?

A. Facilitates faster restores

B. Facilitates faster backups

C. Reduces the storage space required for backups

D. Eliminates the need for full backups

Correct Answer: A

QUESTION 11

What describes an advantage of the changed block tracking backup technique?

A. Increase backup device performance

B. Enable restoration to any point-in-time

C. Eliminate the need for data deduplication

D. Reduce the backup window

Correct Answer: A

QUESTION 12

What is an accurate statement about a denial-of-service attack?

A. Prevents legitimate users from accessing resources or services

B. Intentional misuse of privileges to compromise data security

C. Gaining unauthorized access to a user\\'s accounts and data

D. Captures a user\\'s credentials and then sends to the attacker
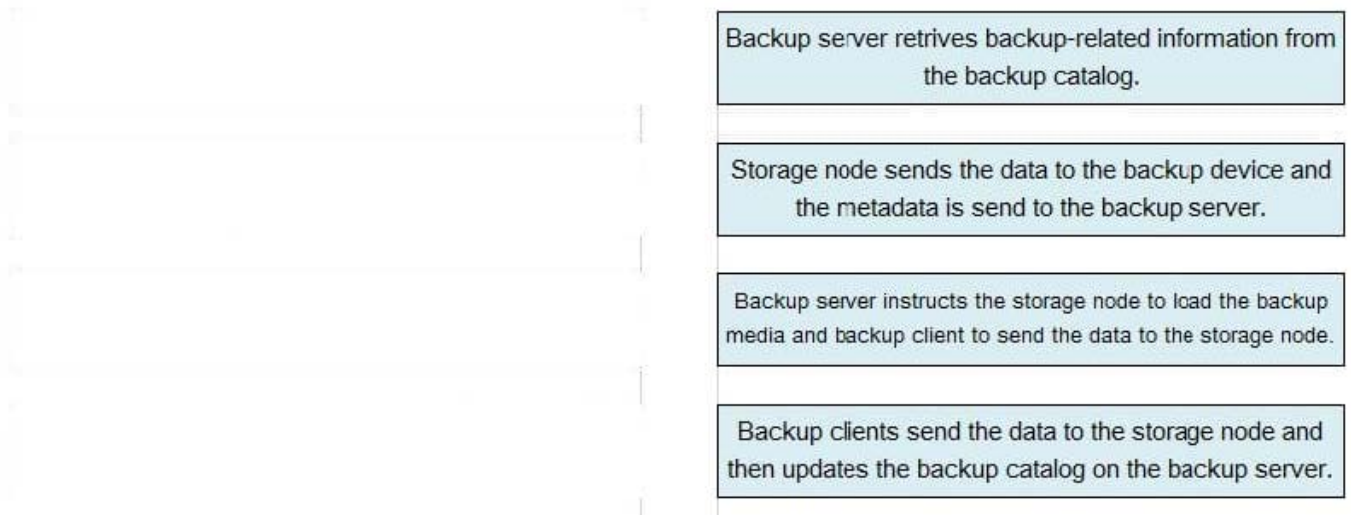

Correct Answer: A

QUESTION 13

Drag and Drop.

In a backup operation, what are the correct sequence of steps after the backup server initiates the scheduled backup process?

Select and Place:

Correct Answer:

| | Backup server retrives backup-related information from the backup catalog. |
	Storage node sends the data to the backup device and the metadata is send to the backup server.
	Backup server instructs the storage node to load the backup media and backup client to send the data to the storage node.
	Backup clients send the data to the storage node and then updates the backup catalog on the backup server.

QUESTION 14

Which environment is represented in the exhibit?

A. Write-back cache

B. Write-through cache

C. Read miss

D. Read hit

Correct Answer: A

QUESTION 15

What is an accurate statement about Platform as a Service?

A. Consumer has control over the deployed applications

B. Consumer has control over the operating system and database management system

C. Consumer has control over the programming languages and tools

D. Consumer has control over the operating system and storage

Correct Answer: A
