QUESTION 1

A customer has a hybrid infrastructure composed of several UNIX and Windows servers. They are looking for a storage system that all servers can share, but will keep hardware changes to a minimum.

What is your recommendation?

- A. NAS
- B. SAN
- C. DAS
- D. CAS

Correct Answer: A

QUESTION 2

Which data deduplication level provides the greatest granularity?

- A. Fixed block
- B. File
- C. Single instance
- D. Variable block

Correct Answer: D

QUESTION 3

What is a characteristic of EMC NetWorker deduplication with Avamar?

- A. Identifies and stores only unique, variable-sized, subfile data objects
- B. Uses target-based deduplication
- C. Uses file-based deduplication
- D. Identifies and stores only unique, fixed-sized, metafile data objects

Correct Answer: A

QUESTION 4

What is a characteristic of cloud technology?

- A. Uses location-dependent virtual resources
- B. Acquires storage resources on demand
- C. Uses local, private cloud resources only
- D. Employs native deduplication

Correct Answer: B

QUESTION 5

Which database is used to store the location of other databases in Microsoft SQL Server?

- A. master
- B. model
- C. msdb
- D. tempdb

Correct Answer: A

QUESTION 6

Which Microsoft Exchange Server 2007 feature supports single mailbox recovery?

- A. Recovery Database
- B. Database Availability Group
- C. Recovery Storage Group
- D. Checkpoint file

Correct Answer: C

QUESTION 7

A large data warehouse environment consists of millions of files spread across many systems. What is a key backup issue?

- A. Synchronization
- B. Backup retention
- C. Replication
- D. Archiving data

Correct Answer: A

QUESTION 8

Which type of backup should be used to create a backup copy offline without disrupting I/O operations on a production volume?

- A. Cumulative backup
- B. Incremental backup
- C. Full backup
- D. Synthetic full backup

Correct Answer: D

QUESTION 9

A customer wants to run backups for unstructured client data where the level of granularity can be sacrificed for better performance. Which method for backing up the data best fits this situation?

- A. Raw device dump
- B. Cold backup
- C. File copy
- D. Hot backup

Correct Answer: A

QUESTION 10

Which backup media characteristic allows backups and restores to run simultaneously?

- A. Random access
- B. Interleaving
- C. Mirroring
- D. Multiplexing

Correct Answer: A

QUESTION 11

What is a characteristic of RAID 6?

- A. Block-level striping with double distributed parity
- B. Block-level striping with distributed parity
- C. Block-level striping with dedicated parity disk
- D. Byte-level striping with dedicated parity disk

Correct Answer: A

QUESTION 12

Which statement defines retention period?

- A. Amount of time available for restoring a particular version of a backup dataset
- B. Amount of time available for overwriting a volume containing backups
- C. Period of time in which a backup must be restored
- D. Amount of time allocated for full system recovery

Correct Answer: A

QUESTION 13

Refer to the exhibit.

When determining disk drive performance, between which two components is the external transfer rate measured?

- A. HBA and interface
- B. Interface and buffer
- C. Buffer and head disk assembly
- D. Interface and head disk assembly

Correct Answer: A

QUESTION 14

A customer is deciding whether to implement backups to either a single centralized backup server or to individual backup servers at the remote offices.

Which factor supports a decision to select a centralized backup solution?

- A. Deploying multiple servers increases cost and complexity.
- B. WAN connection bandwidth between locations is low.
- C. A short recovery time objective must be met.
- D. Remote offices are in different time zones.

Correct Answer: A

QUESTION 15

A customer's data growth has been increasing steadily over time. The network is saturated and LAN-based tape backups are the likely cause. The backup software is NetWorker.

What is your recommendation for this customer?

- A. Integrate Data Domain with NetWorker
- B. Integrate VTL with NetWorker
- C. Integrate Avamar with NetWorker
- D. Upgrade NetWorker and tape devices

Correct Answer: C
