QUESTION 1

In an iSCSI environment, which type of authentication can the Celerra use?

- A. CHAP
- B. IPSec
- C. Kerberos
- D. SSL

Correct Answer: A

QUESTION 2

You have just captured a network trace for a customer reporting slow performance on a Data Mover. When you open the trace you see a very large number of TCP retransmissions.

What is the most likely cause for these retransmissions?

- A. Duplicate IP addresses
- B. Invalid broadcast address
- C. Speed and duplex mismatch
- D. TCP window size too large

Correct Answer: C

QUESTION 3

What component of an NDMP backup deployment provides access to the file systems to be backed up?

- A. NDMP server
- B. DMA server
- C. Secondary storage
- D. Backup client

Correct Answer: A

QUESTION 4

Which Celerra NS component is supplied with power by the SPS?

- A. Control Station
- B. Data Mover
- C. First DAE2
- D. Second DAE2

Correct Answer: C

QUESTION 5

You want to create a CIFS server within a VDM loaded on server_2. The action fails. What is the reason?

- A. An existing CIFS server on the physical DM is already consuming all unused interfaces.
- B. There is no file system mounted on the VDM running on the physical Data Mover.
- C. The CIFS service is not started.
- D. The VDM is in a loaded state.

Correct Answer: A

QUESTION 6

A systems administrator requires that Data Movers are highly available over the network. The administrator has multiple switches available with no special configuration.

Which Celerra solution best meets this requirement?

- A. FastEtherChannel
- B. FSN
- C. LACP
- D. VLAN tagging

Correct Answer: B

QUESTION 7

Which Celerra interface can be used to create automatically mounted checkpoints?

- A. Celerra Manager
- B. Celerra Monitor
- C. CLARiiON Navisphere Manager

D. EMC. ControlCenter NAS interface

Correct Answer: A

QUESTION 8

A UNIX client mounts a file system presented by the Celerra. Which name resolution is valid?

A. CIFS

B. NFS

C. NIS

D. WINS

Correct Answer: C

QUESTION 9

What is a minimum requirement when creating a file system using Manual Volume Management?

A. Metavolume

B. Mirror volume

C. Sliced volumes D. Striped volumes

Correct Answer: A

QUESTION 10

How can a user access the data within a SnapSure checkpoint using the Microsoft Shadow Copy Services Client on a Windows 2003 server?

A. Right-click on the file, select Properties, and then the Previous Versions tab

B. In the Control Panel, select Manage Computer and right-click the CIFS server and select the Restore option

C. Access the share, and from the Tools menu select the Previous Versions tab

D. Click Start > Run, and enter the full path of the share followed by ".ckpt"

Correct Answer: A

QUESTION 11

In an attempt to connect to a CIFS share by its UNC. path (\\server_name\share_name), the connection fails. You can successfully ping the server by its IP address.

Which command would verify the IP address resolution to the server name?

- A. NETSTAT
- B. NETVIEW
- C. NSLOOKUP
- D. TRACERT

Correct Answer: C

QUESTION 12

At which component level is the internal usermapper server located?

- A. Control Station
- B. Physical Data Mover
- C. Active Directory
- D. Virtual Data Mover

Correct Answer: B

QUESTION 13

You are asked for a client/server protocol that operates over TCP/IP and allows file uploading and downloading across heterogeneous systems. If TCP is the required transport protocol, what Celerra feature would you implement?

- A. FTP
- B. TFTP
- C. CIFS
- D. NFS

Correct Answer: A

QUESTION 14

What is the number of standby Data Movers required to achieve high availability in a Celerra model using eight Data Movers?

- A. 4
- B. 2
- C. 3

D. 1

Correct Answer: A

QUESTION 15

In a Celerra environment, where does the Celerra Antivirus Agent run?

- A. Control Station
- B. Data Mover
- C. Data Mover and Control Station
- D. Windows Server

Correct Answer: D
