## QUESTION 1

A TBO has been created for the custom object type called my\_loan\_application. If the following statement is executed in a Webtop custom component, where is the TBO executed?

```
IDfSysObject loanApp = (IDfSysObject)session.newObject("my_loan_application");
```

- A. The TBO executes on the client browser's JVM.
- B. The TBO executes on the Global Registry computer.
- C. The TBO executes on the application server JVM.
- D. The TBO executes on the Content Server JVM.

Correct Answer: C

---

## QUESTION 2

When is it appropriate to use IDfSysObject.getFile(String fileName) ?

- A. to get a file from the file system for an object
- B. to get the file to a specific location on the client machine with the default format
- C. to get a file and manipulate it in memory
- D. to get a specific page of the object and download it to the default location on the client machine with the default format

Correct Answer: B

---

## QUESTION 3

When IDfWorkflowBuilder.initWorkflow() is executed, what is the initial state of an installed workflow?

- A. Running
- B. Dormant
- C. Halted
- D. Initiated

Correct Answer: B

---

## QUESTION 4

Which pre-defined parameter cannot be substituted at runtime during XSLT transformation using XDQL?

- A. DMS\_SESSION\_ID
- B. DMS\_OUTPUT\_OBJECT\_ID
- C. DMS\_INPUT\_OBJECT\_ID
- D. DMS\_STYLESHEET\_OBJECT\_ID

Correct Answer: B

---

## QUESTION 5

Which method resumes a workflow from a halted state to a running state?

- A. IDfWorkflow.execute()
- B. IDfWorkflow.resume()
- C. IDfWorkflow.resumeAll()
- D. IDfWorkflow.continue()

Correct Answer: C

---

## QUESTION 6

What does the IDfPersistentObject interface represent?

- A. only objects stored in the repository
- B. only objects NOT stored in the repository
- C. only objects with content stored in the repository
- D. only objects WITHOUT content stored in the repository

Correct Answer: A

---

## QUESTION 7

Given an object sysObj with IDfSysObject interface, what is the correct statement to retrieve the long form of the document's format?

- A. sysObj.getContentType();
- B. sysObj.getFormat().getName();
- C. sysObj.getFormat().getDescription();
- D. sysObj.getFormat().getDOSExtension();

Correct Answer: C

---

## QUESTION 8

Which method is used to remove a lifecycle from an IDfSysObject instance?

- A. demote()
- B. detachPolicy()
- C. removePolicy()
- D. detachLifecycle()

Correct Answer: B

---

## QUESTION 9

What can be viewed and manipulated using the IDfClientRegistry interface?

- A. Java CLASSPATH
- B. list of recently viewed Documentum documents
- C. saved username and password for web applications
- D. application to launch to View/Edit a document of a given format

Correct Answer: B

---

## QUESTION 10

What does the following code do?

- A. creates an IDfLoginInfo object that is secure
- B. creates an IDfLoginInfo object that uses secure application tickets
- C. creates an IDfLoginInfo object for use with a repository that has application access control enabled, and application token storage disabled
- D. creates an IDfLoginInfo object for use with a repository that has application access control enabled, and the token has an application ID constraint set

Correct Answer: D

---

## QUESTION 11

Given the following statement for creating a IDfCheckinNode object: IDfCheckinNode node =

(IDfCheckinNode)checkin.add( doc); Which statement should immediately follow?

- A. if ( node == null ) { /\* handle errors \*/ }
- B. node.setFilePath( strFileName );
- C. checkin.execute();
- D. node.setVersionLabels("DRAFT");

Correct Answer: A

---

**QUESTION 12**

Where can DFC tracing be turned on?

- A. in the dmcl.ini file
- B. in program code only
- C. in the dfc.properties file only
- D. in the dfc.properties or in program code

Correct Answer: D

---

**QUESTION 13**

Which statement is true about the includeContent(boolean includeContent) method of the IDfXMLQuery interface?

- A. If set to true, content will be included within an XML element.
- B. The content will always be returned within a element.
- C. The query does not have to include r\_object\_id if the content is to be included.
- D. If set to true, the resulting XML file will contain a link to the location of the content in therepository.

Correct Answer: A

---

**QUESTION 14**

What is the correct hierarchy in the Documentum object model?

- A. dm\_folder inherits from dm\_cabinet, which inherits from dm\_sysobject.
- B. dm\_sysobject inherits from dm\_document.
- C. dm\_document inherits from dm\_folder, which inherits from dm\_sysobject.
- D. dm\_category inherits from dm\_folder, which inherits from dm\_sysobject.

Correct Answer: D

---

### QUESTION 15

The following utility method requires the handling of an exception: How would you handle the exception, so that value either contains the session's ID, or returns an empty string?

- A. You add a try/catch block (in bold) around the value assignment:  
`try{value = session.getSessionId();} catch (DfException dfe) {DfLogger.debug(this,dfe.getStackTraceAsString(),null,null);}`
- B. You add a throws clause (in bold) to the method signature:  
`public String getMySessionId(IDfSession session) throws DfException{...}`
- C. Exception handling is not required because `session.isConnected()` ensures a session is present, and `session.getSessionId()` only throws an exception if the session is not present.
- D. You add a throws clause (in bold) to the method signature AND add a try/catch block (in bold) around the value assignment that throws a new `DfException()`:  
`public String getMySessionId(IDfSession session) throws DfException{String value = "";try{value = session.getSessionId();}catch (DfException dfe){DfLogger.debug(this,dfe.getStackTraceAsString(), null,null);}return value;}`

Correct Answer: A
