QUESTION 1

You are backing up a group of clients that have varying schedules. Using the EMC NetWorker Administration interface, you need to perform a full backup of all clients in that group. How would you ensure that a full backup is performed for a client when it is backed up during the next save group execution?

- A. Set an override level in the backup schedules to Full in the next date
- B. Change the group level to Override
- C. Uncheck the Force incremental option in the group resource Advanced tab.
- D. Create a staging resource called full and set the destination pool to full.

Correct Answer: A

QUESTION 2

What is the command line alternative to perform a query and generate a report similar to the reports generated within the EMC NetWorker Management Console (NMC)?

- A. gstclreport
- B. mminfo
- C. savefs
- D. ebreport backup

Correct Answer: A

QUESTION 3

An EMC NetWorker Administrator wants to start all of the EMC NetWorker processes on a Solaris server.

Which command would run?

- A. /etc/init.d/networker start
- B. /etc/rc2.d/gst start
- C. /sbin/int.d/networker start
- D. /sbin/init.d/gst start

Correct Answer: A

QUESTION 4

A storage administrator backs up an Exchange server to an EMC Data Domain system. The Data Domain system is configured as an advanced file Device. The administrator now wants to create a copy of the backup and send it to tape. The backup job completed at 8pm. The administrator wants the copy to be created at 9pm. Which option should be used?

- A. Use the Scheduled Cloning attribute to schedule a clone job to start at 9pm.
- B. Run the nsrclone command at 8pm and the second copy will be directed to tape at 9pm.
- C. Enable the "clones" attribute in the client's group setting.
- D. From the Administration window, under Media select Save Sets and then the Query Save Set tab. Create clone copies of the backup at 8pm.

Correct Answer: A

QUESTION 5

An EMC NetWorker administrator has two LTO-4 tape drives configured on an EMC NetWorker server. One of the two tape drives is dynamically shared with an EMC NetWorker storage node. The other tape drive is statically assigned to the EMC NetWorker server. The shared drive stops functioning on the EMC NetWorker server but continues to function on the storage node.

How many nsrmmmd are now running on the storage node?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: A

QUESTION 6

In an EMC NetWorker environment, which access options are required for directed recoveries?

- A. Source client must allow destination client access to its backup data.
- B. Destination client must allow a remote execution request from the source client.
- C. Source client must allow a remote execution request from the destination client.
- D. Administering client must permit the destination client to access the source backup.

Correct Answer: A

QUESTION 7

Which policy in EMC NetWorker determines the length of time that records are retained within the Client File Index (CFI)?

- A. Browse
- B. Retention
- C. Snapshot
- D. Staging

Correct Answer: A

QUESTION 8

You need to integrate snapshot technology on SAP backups in an EMC NetWorker environment. Which module is required?

- A. PowerSnap
- B. SnapImage
- C. SnapView
- D. NMM

Correct Answer: A

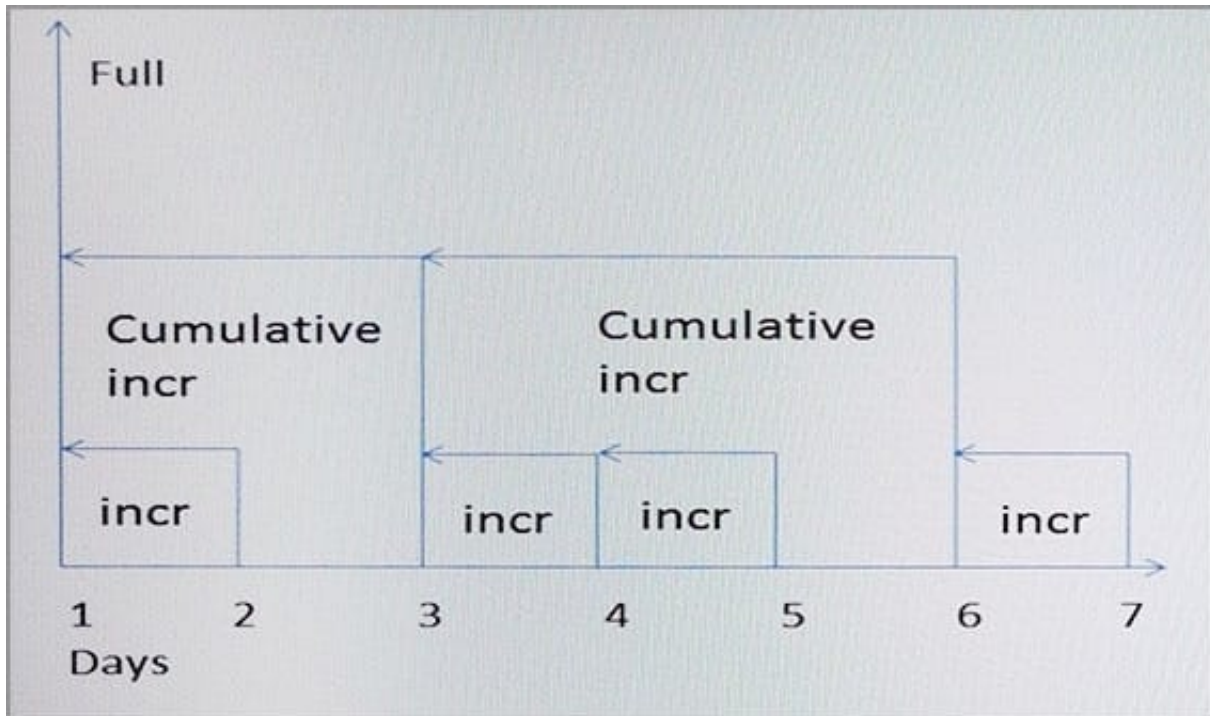

QUESTION 9

What needs to be configured to prevent possible name spoofing in an EMC NetWorker environment?

- A. NAT
- B. Forward and reverse-lookup
- C. routing table
- D. /nsr/res/servers

Correct Answer: B

QUESTION 10

A Dell EMC NetWorker administrator configured their backups for save set "C:\Users\" to run daily at 12:00 pm with levels based on the exhibit. At 1:00 am on Day 3, file "C:\Users\John\myscript.txt" was deleted. At

5:00

PM on Day 4, folder "C:

\Users\John" was renamed to "C:\User\John_old".

On Day 7, the administrator decided to recover the entire save set back to Day 6. Based on this

environment, which result can be expected?

A.

myscript.txt will be recovered under "C:\Users\John\"

B.

myscript.txt will not be recovered under "C:\Users\John_old"

C.

myscript.txt will be recovered under "C:\Users\John_old"

D.

myscript.txt will not be recovered under "C:\Users\John\"

Correct Answer: B

QUESTION 11

An EMC NetWorker administrator wants to move NMC from the server where it is currently installed to a new Windows system. The NMC reporting feature is being used.

What must be installed on the new system, in addition to the Console server software?

- A. EMC NetWorker Client software and Java Runtime Environment
- B. Java Runtime Environment and Change Journal Manager software
- C. EMC NetWorker Client software and Change Journal Manager software
- D. EMC NetWorker Storage Node software and Java Runtime Environment

Correct Answer: A

QUESTION 12

An EMC NetWorker administrator wants to determine the RPC port range for a host.

Which directory contains this information?

- A. nsrladb
- B. catalogs
- C. jobsdb
- D. nsrdb

Correct Answer: A

QUESTION 13

After installing EMC NetWorker server software, which resource needs to be created, at a minimum, before performing a backup?

- A. Device
- B. Schedule
- C. Group
- D. Policy

Correct Answer: A

QUESTION 14

What do you use to interpret the EMC NetWorker daemon.raw file?

- A. nsr_render_raw
- B. nsr_support
- C. nsr_render_log
- D. nsr_layout

Correct Answer: C

QUESTION 15

What is the command to manually start the EMC NetWorker processes on a Solaris server?

- A. networker start
- B. ./networker
- C. nsradmin
- D. nsrd

Correct Answer: A
