## QUESTION 1

A customer has an Isilon cluster with a substantial video editing workload. They ask you how they can create a custom job to archive older data to NL nodes.

What should be your response?

- A. Custom jobs cannot be created. Implement a SmartPools file policy.
- B. Work with Professional Services to implement a custom job.
- C. The job engine can be custom programmed in python.
- D. Schedule AutoBalance to run more frequently.

Correct Answer: A

---

## QUESTION 2

What are some differences between a Major upgrade and a Minor upgrade of OneFS?

- A. Major is a change to either of the first two decimal places of the OneFS version and Minor is a change to either of the last two.
- B. Major is a change to one of the first three decimals of the OneFS version while Minor is a change to the last digit.
- C. Minor is for code patches and Major is for Maintenance releases.
- D. Minor includes core operating system changes and Major is for core operating system changes and new OneFS functionality.

Correct Answer: A

---

## QUESTION 3

Where does the SNMP agent reside?

- A. On each cluster node
- B. On one cluster node, until that node fails
- C. On the management server
- D. On the network monitoring station

Correct Answer: A

---

## QUESTION 4

A customer wishes to install a new cluster and needs an explanation of the features SmartConnect will provide. Which explanation best represents its features?

- A. SmartConnect manages loads across the cluster by directing connections to nodes.
- B. SmartConnect moves connections from one node to another to balance loads across the cluster.
- C. SmartConnect connects users with nodes based on identity and authorization.
- D. SmartConnect connects users with nodes based on protocols and protocol versions.

Correct Answer: A

---

**QUESTION 5**

What best describes a requirement of the CELOG Master Coalescer node?

- A. The node must be connected to the external network.
- B. The node must have LNN 1
- C. The node performs preliminary analysis of other nodes log files
- D. The node only runs the CELOG service isi\_celog\_notification

Correct Answer: A

---

**QUESTION 6**

What background process provides data collection for the "isi statistics" command?

- A. isi\_stat\_d
- B. isi\_celog\_notification
- C. isi\_history\_d
- D. isi\_job\_d

Correct Answer: A

---

**QUESTION 7**

What procedure requires a field service engagement with OneFS 7.0.2?

- A. Drive firmware update
- B. Node firmware update
- C. Upgrade to OneFS 7.1.0

D. All simultaneous upgrades

Correct Answer: B

---

## QUESTION 8

What folder structure is used to store log files in AVP?

- A. Customer Name > Cluster Name > Upload Date
- B. Customer Name > Upload Date > OneFS Version > Cluster Name
- C. Customer Name > SR Number > Node Name-Number
- D. Customer Name > Upload Date > Node Name-Number

Correct Answer: A

---

## QUESTION 9

The customer has an information security policy which forbids DNS delegations to Isilon clusters. What should you tell the customer about the consequences of this?

- A. SmartConnect relies upon DNS delegation to operate, and other load balancing technologies lack SmartConnect's integration with the cluster.
- B. SmartConnect relies upon DNS delegation to operate, but other load balancing technologies can substitute for SmartConnect without disadvantage.
- C. SmartConnect can operate normally without DNS delegation by integrating with Isilon supported external load balancing technologies.
- D. SmartConnect can operate normally without DNS delegation, but licensed features will not be available to the customer.

Correct Answer: A

---

## QUESTION 10

What is an important consideration when upgrading a cluster from OneFS 6.5.x.x to OneFS 7.0.x.x?

- A. Disk pools may need to be reconfigured.
- B. SmartConnect may need to be reconfigured.
- C. SnapshotIQ may need to be reconfigured.
- D. SmartQuotas will have to be reset.

Correct Answer: A

---

**QUESTION 11**

Which command displays details for a specific event?

- A. isi events show -i
- B. isi events list -i
- C. isi events unquiet -i
- D. isi events notifications list

Correct Answer: A

---

**QUESTION 12**

You are troubleshooting LDAP cluster integration.

What could you use to verify that the cluster can communicate with the configured LDAP server?

- A. tcpdump
- B. dcpromo
- C. isi sync
- D. isi job

Correct Answer: A

---

**QUESTION 13**

What file needs to be modified to enable DEBUGging output for InsightIQ?

- A. insightiq.ini
- B. insightiq.conf
- C. autofS
- D. source\_record.xml

Correct Answer: A

---

**QUESTION 14**

What is an important consideration when upgrading a cluster from OneFS 6.5.x.x to OneFS 7.0.x.x?

- A. The node model must be supported.

- B. SmartConnect may need to be reconfigured.
- C. SnapshotIQ must be reconfigured.
- D. SmartQuotas may need to be reset.

Correct Answer: A

---

## QUESTION 15

You have a customer who is using the newest version of OneFS and recently installed switches. The customer is interested in implementing an aggregation method that supports load balancing and interface status monitoring.

Which aggregation method is most likely to meet their needs?

- A. Link Aggregation Control Protocol
- B. Active/Passive Failover
- C. Fast EtherChannel
- D. Round-Robin TX

Correct Answer: A
