## QUESTION 1

Why must the USM Engineering mode be enabled in a VNX OE for Block upgrade?

- A. To cancel the upgrade
- B. To revert the upgrade
- C. To get debug information
- D. To override a failed rule

Correct Answer: D

---

## QUESTION 2

You have just replaced a defective component in a Data Mover. Which command can be run to verify the system returns no errors?

- A. # /nas/bin/nas\_checkup
- B. # /nas/bin/nas\_server -info -all
- C. # watch /nasmcd/getreason
- D. # dmesg

Correct Answer: A

---

## QUESTION 3

You are tasked to investigate an issue where a Data Mover has a boot error code of 4. You used the collect\_support\_materials tool to gather data.

Where does the resulting diagnostic file reside?

- A. /nas/var/emcsupport
- B. C:\EMC\dumps
- C. C:\dumps
- D. /nas/log/emcsupport

Correct Answer: A

---

## QUESTION 4

Which VNX models use a disk processor enclosure (DPE)?

- A. VNX5500, VNX5800, VNX7600
- B. VNX5100, VNX5600, VNX7500
- C. VNX5300, VNX5600, VG10
- D. VNX5100, VNX5700, VNX5800

Correct Answer: A

---

**QUESTION 5**

How can users search for hardware issues on a VNX for File storage system using EMC Unisphere?

- A. Once logged in to Unisphere, use the drop-down list to select System > Storage Hardware for File
- B. Once logged in to Unisphere, use the drop-down list to select System > Storage Hardware for Block
- C. Once logged in to Unisphere, navigate to the dashboard section and select System > Storage Hardware for File
- D. Once logged in to Unisphere, navigate to the dashboard section and select System > Storage Hardware for Block

Correct Answer: A

---

**QUESTION 6**

In Unisphere under System > Monitoring and Alerts, how do you determine current system health?

- A. In the Monitoring task pane, click the Storage System Connectivity Status link
- B. In the Monitoring task pane, click the Trespass LUN Status link
- C. In the Monitoring task pane, click the Fault Status Report link
- D. In the Monitoring and Alerts section, click the Alerts

Correct Answer: C

---

**QUESTION 7**

An EMC service engineer is tasked with installing a VNX Block storage system with an SPE. After a period of 10 minutes, SP A has booted successfully and SP B's status LED is still flashing amber. The service engineer verifies that the cabling is correct. What is one explanation for why SP B will not boot?

- A. The top LCC in DAE 0 is faulted
- B. I/O module 1 in the right SP is faulted
- C. The bottom LCC in DAE 0 is faulted
- D. I/O module 1 in the left SP is faulted

Correct Answer: A

---

## QUESTION 8

Refer to the exhibit.

What is the status of the VNX in Unisphere?

- A. Storage system is unmanaged
- B. Storage system is inaccessible
- C. Storage system is unsupported
- D. Component and all of its components are working normally

Correct Answer: A

---

## QUESTION 9

You are examining several log files on a VNX Control Workstation investigating a fault. Which command can be used to view the contents of a log file while on the CS console?

- A. `$ more logfile.log`
- B. `$ file logfile.log`
- C. `$ echo logfile.log`
- D. `$ dmesg logfile.log`

Correct Answer: A

---

## QUESTION 10

A user is manually configuring the Control LUNs for a VNX gateway attached to a Symmetrix. What is the required size for LUN 5?

- A. 64 GB
- B. 2 GB

C. 11 GB

D. 32 GB

Correct Answer: A

---

## QUESTION 11

Refer to the exhibit.

Which RA dashboard function allows direct access to the Storage Processor to use CLI commands to start services?

A. Remote Control

B. Computer Manager

C. Security

D. File Manager

Correct Answer: A

---

## QUESTION 12

What are the minimum components required to configure a VNX5500 for Block storage system?

A. Control Station, SP, DAE

B. Control Station, SP, DME

C. SP, DME, DAE

D. SPS, SPE, DAE

Correct Answer: D

---

## QUESTION 13

What components are prerequisites for UDoctor?

A. ESRS IPClient and ConnectEMC

B. Event Monitor and Management utility

C. Navisphere Agent and CLI

D. Array Health Analyzer and Template

Correct Answer: A

---

## QUESTION 14

You are installing multiple VNX arrays, and find that the different arrays share the same serial number. What will be the result?

A. Unisphere may exhibit unpredictable behavior.

B. Unisphere can still manage each VNX.

C. The SP Cache of the conflicting VNXs will be disabled.

D. Unisphere will fail to discover the arrays.

Correct Answer: A

---

## QUESTION 15

When performing an installation recovery of VNX OE File to pre-VIA initialization state what impact should be considered?

A. Reboot the primary DM to force a configuration backup to the standby DM prior to the cleanup.

B. The back-end cleanup process destroys all file systems and back-end storage.

C. File systems are preserved but the Control Station and Data Movers must be reconfigured.

D. File systems are preserved but exports and share configuration must be restored.

Correct Answer: B
