QUESTION 1

See the specifications below:

```

IF      A AND B
THEN   X=10
ELSE
      IF      C OR D
      THEN   Z=1000
      ENDIF
ENDIF
    
```

The test design technique Elementary Comparison Test has been used with coverage type decision points with modified condition/decision coverage. Which is the corresponding graph?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: B

QUESTION 2

Is the checklist drawn up for the purpose of the basis evaluation dependent on the test design technique being applied?

- A. Yes
- B. No

Correct Answer: A

QUESTION 3

What is to be preserved in the activity `preserving the testwar`?

- A. All testware created during the project
- B. Aselection of the testware in consultation with the future administrator

Correct Answer: B

QUESTION 4

Drivers can be used in the Execution phase of a test process. What are drivers for?

- A. to test, at an early stage, a module that has relationships with modules not yet realized
- B. to gain insight into aspects like memory use, CPU use, network load and performance
- C. to determine whether the system continues to function correctly and at the required speeds under the expected production load

Correct Answer: A

QUESTION 5

Business-driven test management allows the business client to control the test process and help determine the test approach. Which aspects can the client control?

- A. The balance between results and risks versus time and costs.
- B. The quality of the test object.
- C. The test design techniques to be used.
- D. Reducing the probability of software failure.

Correct Answer: A

QUESTION 6

Which defects can be detected more effectively with development tests than with system and/or acceptance tests?

- A. defects related to affectivity
- B. defects related to the database and/or the operating system
- C. defects related to the functional specifications
- D. defects related to performance

Correct Answer: B

QUESTION 7

What strongly benefits the quality characteristic 'testability'?

- A. the ease of operation of the system by the end-users
- B. the ease with which an interface can be created with another information system
- C. the ease with which the information system can be placed and maintained in an operational condition
- D. having a regression test and other testware

Correct Answer: D

QUESTION 8

What is the aim of the activity 'assessing the test basis'?

- A. to determine the risk of the various system components
- B. to select the most suitable test design techniques
- C. to determine whether the delivered system components can be tested in a useful manner
- D. to establish the testability of the test basis

Correct Answer: D

QUESTION 9

What is the correct description of the term test level?

- A. the information that defines the required system behavior
- B. a group of test activities with the attention of checking the information system in respect of a number of correlated (part aspects of) quality characteristics

C. a group of test activities that are managed and executed collectively

Correct Answer: C

QUESTION 10

During the test execution of a large customer registration system, the system went down for several times. Although there were no test cases described the tester concluded that the continuity was poor. Which testing method is described here?

A. dynamic explicit testing

B. dynamic implicit testing

C. static testing

Correct Answer: B
