- D. HTML

Correct Answer: D

---

## QUESTION 6

Which of the following protocol protections is not provided by the Protocol Security Manager?

- A. FTP
- B. SSH
- C. HTTP
- D. SMTP

Correct Answer: B

---

## QUESTION 7

A security audit has determined that your web application is vulnerable to a cross-site scripting attack. Which of the following measures are appropriate when building a security policy? (Choose 2)

- A. Cookie length must be restricted to 1024 bytes.

- B. Attack signature sets must be applied to any user input parameters.
- C. Parameter data entered for explicit objects must be checked for minimum and maximum values.
- D. Parameter data entered for flow-level parameters must allow some meta-characters but not others.

Correct Answer: BD

---

## QUESTION 8

Which HTTP response code ranges indicate an error condition? (Choose 2)

- A. 1xx
- B. 2xx
- C. 3xx
- D. 4xx
- E. 5xx

Correct Answer: DE

---

## QUESTION 9

Which of the following methods of protection operates on server responses?

- A. Dynamic parameter protection
- B. Response code validation and response scrubbing
- C. Response code validation and HTTP method validation
- D. HTTP RFC compliancy check and meta-character enforcement

Correct Answer: B

---

## QUESTION 10

The BIG-IP ASM System sets two types of cookies to enforce elements in the security policy. The two types are main and frame cookies. What is the purpose of the frame cookie? (Choose 2)

- A. Validates domain cookies
- B. Detects session expiration
- C. Stores dynamic parameters and values
- D. Handles dynamic parameter names and flow extractions

Correct Answer: CD
