QUESTION 1

The eSpace UC solution provides end-to-end security networking schemes, including (). (Multiple Choice)

- A. Signaling encryption
- B. Open interfaces
- C. Media stream encryption
- D. Distributed networking in peer-to-peer mode

Correct Answer: AC

QUESTION 2

If a company has 150 SIP users (may be expanded to a maximum of 250 SIP users in the future) at its headquarters and 100 SIP users at one of its branches, and if a two-node cluster is required on the primary node, which of the following devices needs to be deployed at the headquarters?

- A. U1911
- B. U1960
- C. U1980
- D. U1981

Correct Answer: B

QUESTION 3

After a user logs in to a mobile client and makes a VoIP call, a message indicating VoIP registration failure is displayed. Which of the following are possible causes? (Multiple Choice)

- A. The area policy is incorrectly configured on the BMU.
- B. The SBC that supports NAT traversal through the media proxy function has both internal and external network IP addresses, but network routing of the external network is not configured.
- C. The MAA service is faulty.
- D. The connection between the MAA and the U1900 is abnormal.

Correct Answer: AB

QUESTION 4

If the console access code duplicates with the short and long numbers of a user, when a user dials the console access

code, the call is directly connected to the short or long number. Then, the console services cannot be implemented.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 5

You can collect logs on eSpace clients, including log files generated during client operation and system information.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 6

In the multi-node centralized remote disaster recovery scenario, which of the following statements is CORRECT about IP phone registration in normal conditions?

- A. Only IP phones on the primary node register with the primary node.
- B. IP phones on the primary node register with the standby node.
- C. All IP phones register with the IP PBX on the primary node.
- D. IP phones on the local node register with the local node.

Correct Answer: C

QUESTION 7

On the AR router on a branch node in the eSpace UC solution, if PRA trunk group 1 needs to connect to the original PBX, PRA trunk group 2 needs to connect to the PSTN, and SIP ATO and SIP IP trunk groups need to connect to the gateway at the central node, which of the following trunks groups need to be bound to the call route? (Multiple Choice)

- A. PRA trunk group 1
- B. PRA trunk group 2
- C. SIP ATO trunk group
- D. SIP IP trunk group

Correct Answer: AB

QUESTION 8

() provides audio resources for multimedia conferences.

- A. Meeting MS
- B. BMU
- C. Unified gateway
- D. Data conference client

Correct Answer: C

QUESTION 9

To prevent toll fraud caused by outgoing call forwarding through trunks or VUs, we can configure the following toll fraud prevention policies: (). (Multiple Choice)

- A. Prefix call attribute configuration
- B. Trunk-based call restriction
- C. Restriction on the automatic switchboard number length
- D. User rights configuration

Correct Answer: ABC

QUESTION 10

Depending on the capacity, the Meeting Server can be co-deployed with other servers or independently deployed.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 11

Which of the following statements are CORRECT as regard to UC multimedia conferencing functions? (Multiple Choice)

- A. Support for questionnaires
- B. Support for file transfer
- C. Support for voice-only conference recording (screen recording is not supported)
- D. Participants can record conference notes on the conference client.

E. Participants can freely turn pages of a shared document locally without affecting other participants.

Correct Answer: ABDE

QUESTION 12

About two-node cluster backup of servers such as the BMU/ eServer, AppAgent, and DB, which of the following statements are CORRECT? (Multiple Choice)

- A. The two-node cluster works in active-active mode.
- B. Only the Linux platform is supported.
- C. Services are interrupted during an active/standby switchover.
- D. After an active/standby switchover the standby node becomes the active one. When the original active node recovers, services are switched back to the original active node.

Correct Answer: BC

QUESTION 13

The process for configuring outgoing calls on an AR router at a branch node is as follows: first configure the call route, then the prefix or trunk group, and last the trunk group or prefix. Which of the following is the logical process for the outgoing call route on the AR router?

- A. callroute -> prefix -> trunk-group
- B. prefix -> callroute -> trunk-group
- C. callroute -> trunk-group -> prefix
- D. prefix -> trunk-group -> callroute

Correct Answer: B

QUESTION 14

In the eSpace UC solution architecture, which of the following NEs provides the service management function?

- A. BMU
- B. eSight
- C. U1900
- D. eServer

Correct Answer: A

QUESTION 15

If a user links his or her eSpace Desktop with an IP phone and both the eSpace Desktop and the IP phone work properly, which of the following statements are CORRECT when another user calls the linked number of the user? (Multiple Choice)

- A. Both the user's eSpace Desktop and IP phone ring simultaneously.
- B. If the user clicks the answer button on the eSpace Desktop, the IP phone then automatically goes off-hook. The user answers the call using the IP phone, and the eSpace Desktop displays the calling window.
- C. If the user clicks the call rejection button on the eSpace Desktop, the user's eSpace Desktop and IP phone both stop ringing.
- D. During a call, the user cannot switch the audio between the eSpace Desktop and the linked IP phone.

Correct Answer: ABC
