## QUESTION 1

Methods of improving architecture acoustics contain( )-(Select 3 answers)

- A. get short reverberation time
- B. get low background noise
- C. get low corridor noises
- D. get low expected noises

Correct Answer: ABC

---

## QUESTION 2

Which of the following statements is not true about videoconferencing service in H.460.( )

- A. A TCP channel is established by a private network terminal.
- B. Call signaling between public and private network terminals complies with H.323.
- C. After a call is established, keep-alive packets must be periodically transmitted to the maintain pinhole path.
- D. After the TCP channel is established, the private network terminal is directly connected to the public network terminal by sending "connect" message to each other.

Correct Answer: D

---

## QUESTION 3

Acoustic echoes are local sounds that are returned from the peer end. In this case, ensure that the speaker sound cannot be returned through the microphone. ( )

- A. TRUE
- B. FALSE

Correct Answer: A

---

## QUESTION 4

Over an H.460 network, communication between the video terminal and client GK complies with ( ).

- A. H.460
- B. H.323
- C. H.460.18/19

D. Q.931

Correct Answer: B

---

## QUESTION 5

The GK must be installed on drive C or D.( )

A. TRUE

B. FALSE

Correct Answer: A

---

## QUESTION 6

The MCU supports ( ) concurrent web users.

A. 1

B. 2

C. 3

D. More than three

Correct Answer: D

---

## QUESTION 7

SIP protocol used to establish, manage, and release sessions.( )

A. TRUE

B. FALSE

Correct Answer: A

---

## QUESTION 8

The function of Proxy server is to forwards requests or responses for SIP clients. The proxy server can be a server and a client at one time and decides forwarding requests of the next hop. ( )

A. TRUE

B. FALSE

Correct Answer: A

---

**QUESTION 9**

Color rendering index affects the( )-(Select 2 answers)

- A. true color reproduction
- B. image color saturation
- C. lighte
- D. Color temperature

Correct Answer: AB

---

**QUESTION 10**

The six call steps of H.323 apply to all H.323 terminals. ( )

- A. TRUE
- B. FALSE

Correct Answer: A

---

**QUESTION 11**

Color temperature is a measure of the quality of optical source and spectrum. The unit of the color temperature is lux (lx).( )

- A. TRUE
- B. FALSE

Correct Answer: B

---

**QUESTION 12**

Originally, MCU cascading involves one cascaded channel, which can transmit one channel of video stream. In a telepresence conference, the channel can transmit only the video for the pane in the center.After multi-channel cascading is supported, each level of MCU can transmit multiple channels of video streams and therefore can transmit all three panes in a telepresence conference, to improve user experience.( )

- A. TRUE
- B. FALSE

Correct Answer: A

---

## QUESTION 13

The GK must support BRQ, BCF, and BRJ messages and accept all requests for changing bandwidth. ( )

- A. TRUE
- B. FALSE

Correct Answer: A

---

## QUESTION 14

MCU Video Firewall Mode has advantages, but it also has limitations, such as ( ). (Select 3 answers)

- A. The MCU supports communication between only two networks. The communication among more than two networks, however, is not supported.
- B. The GEO port must register with a GK. The GE1 port is used only for calls by number
- C. The endpoint at the GE1 side does not support the SiteCall service.
- D. Sites connected through GE1 ports does not support service switchovers.

Correct Answer: ACD

---

## QUESTION 15

Reverberation time refers to the period of time taken for a specified decrease (usually 60 dB) in sound pressure level at a given frequency and point in an enclosed or partly enclosed space, after the sound signal from an acoustic source is interrupted. Generally, the reverberation time is represented using T60. ( )

- A. TRUE
- B. FALSE

Correct Answer: A
